Case Nos. 19 - ____ (____)
19 - ____ (____)

Chapter 11

**DECLARATION OF JASON P. WELLS IN
SUPPORT OF FIRST DAY MOTIONS AND
RELATED RELIEF**

In re:

**PACIFIC GAS AND ELECTRIC
COMPANY,**

Debtor.

Tax I.D. No. 94-0742640

Date:
Time:
Place:

DECLARATION OF JASON P. WELLS
IN SUPPORT OF FIRST DAY MOTIONS

1 I, Jason P. Wells, pursuant to section 1746 of title 28 of the United States Code, hereby declare
2 that the following is true to the best of my knowledge, information, and belief:

3 I am the Senior Vice President and Chief Financial Officer of PG&E Corporation (“**PG&E**
4 **Corp.**”). In 2007, I joined PG&E Corp. as the Director of Technical Accounting and was promoted to
5 Senior Director of Corporate Accounting and Assistant Controller in 2008. I transferred from PG&E
6 Corp. to Pacific Gas and Electric Company (the “**Utility**”) in 2009 and continued in the role of Senior
7 Director of Corporate Accounting and Assistant Controller. I became Vice President, Finance of the
8 Utility in October 2011, and became Vice President, Business Finance of the Utility in August 2013. I
9 was appointed to my current position at PG&E Corp. in January 2016. I have a bachelor’s degree and
10 a master’s degree in accounting from the University of Florida and I am a Certified Public Accountant
11 in the State of Florida. The Utility is a wholly-owned subsidiary of PG&E Corp.

12 On the date hereof (the “**Petition Date**”), PG&E Corp. and the Utility (collectively, the
13 “**Debtors**” or “**PG&E**”) each commenced with this Court (the “**Court**”) a voluntary case under
14 chapter 11 of title 11 of the United States Code (the “**Bankruptcy Code**”).

15 I am knowledgeable and familiar with the Debtors’ day-to-day operations, business, and
16 financial affairs, and the circumstances leading to the commencement of the Debtors’ chapter 11 cases
17 (the “**Chapter 11 Cases**”). I am authorized to submit this Declaration on behalf of the Debtors.
18 Except as otherwise indicated herein, the facts set forth in this Declaration are based upon my personal
19 knowledge, my review of relevant documents, information provided to me by the Debtors or the
20 Debtors’ legal, restructuring, and financial advisors, or my opinions based upon experience,
21 knowledge, and information concerning the Debtors’ operations and the electricity and natural gas
22 industries in the State of California. If called upon to testify, I would testify to the facts set forth in this
23 Declaration.

24 This Declaration is submitted for the purpose of apprising the Court and other parties in interest
25 of the circumstances that compelled the commencement of the Chapter 11 Cases, and in support of (i)
26 the Debtors’ chapter 11 petitions, and (ii) the motions and applications that the Debtors have filed with
27 the Court contemporaneously with the filing of the chapter 11 petitions (the “**First Day Motions**”).
28

Preliminary Statement

The Debtors' decision to seek relief under chapter 11 followed a comprehensive review of a variety of factors and the issues facing the Debtors. It represents the only viable alternative under the stark circumstances with which the Debtors are faced, and is in the best interests of all of the Debtors' stakeholders, including their millions of customers, employees, wildfire claimants, other creditors, employees, and shareholders. The chapter 11 filings were necessitated by a confluence of factors resulting from the catastrophic and tragic wildfires that occurred in Northern California in 2017 and 2018, and PG&E's potential liabilities arising therefrom. The multitude of pending claims and lawsuits, and the thousands of additional claims that will be asserted, made it abundantly clear that PG&E could not continue to address those claims and potential liabilities in the California state court system, continue to deliver safe and reliable service to its 16 million customers, and remain economically viable. As noted in PG&E's Form 8-K (the "**Form 8-K**") filed on January 14, 2019 with the United States Securities Exchange Commission (the "**SEC**"), PG&E's potential liability with respect to the 2017 and 2018 Northern California wildfires could exceed \$30 billion, without taking into account potential punitive damages, fines and penalties or damages with respect to "future claims." Under certain circumstances, PG&E's potential liability could be substantially greater. Further, as described more fully below, PG&E's potential liability is exacerbated by the unique doctrine of "inverse condemnation," which imposes strict liability on PG&E regardless of whether it was negligent, and by the continuing uncertainty surrounding PG&E's ability to recover costs associated with inverse condemnation.

In view of the circumstances confronting PG&E, it did not have the ability to access the capital necessary to (a) address and resolve the thousands of wildfire claims that already had been asserted and would be asserted against it over the next several months and years; (b) operate its business and provide prudent and efficient electric and gas services to its millions of customers; (c) properly invest in its infrastructure and critical initiatives to provide safe and reliable service, and to mitigate future wildfire risks in an environment impacted by climate change; and (d) service and, as required, refinance or satisfy its approximate \$24 billion in outstanding funded debt obligations.

PG&E’s decision to seek relief under chapter 11 followed a comprehensive review of all realistic alternatives and the consideration and balancing of a variety of factors, including (a) the need for an orderly, fair, and expeditious process to assess and resolve PG&E’s potential liabilities resulting from the 2017 and 2018 Northern California wildfires; and (b) how to best preserve and maximize the value of PG&E’s business enterprise for the benefit of all of its economic stakeholders, including wildfire claimants, PG&E’s other creditors, and PG&E Corp.’s shareholders.

To be clear, the Chapter 11 Cases are not a strategy or attempt to avoid PG&E’s responsibility for the heartbreaking and tragic loss of life, devastating damage and destruction to homes and businesses, and harm to the communities that has been incurred as a result of the 2017 and 2018 Northern California wildfires. Rather, the principal objectives of the Chapter 11 Cases are directly to the contrary:

- First, to establish a process for PG&E to fully address and resolve its liabilities resulting from the 2017 and 2018 Northern California wildfires and to provide compensation to those entitled to compensation from the Debtors fairly and expeditiously – indeed, more quickly and more equitably than those liabilities could be addressed and resolved in the state court system;
- Second, to restore PG&E’s financial stability and assure that PG&E has access to the capital and resources necessary to sustain and support its ongoing operations and to enable PG&E to continue investing in its systems infrastructure and critical safety and wildfire prevention initiatives, including investing in PG&E’s Community Wildfire Safety Program (a program to further reduce wildfire risks and help keep our customers and the communities we serve safe through enhanced real-time monitoring and intelligence, safety measures, and electrical system equipment);
- Third, to work collaboratively and constructively with State regulators and policy makers to (a) address safety, and operational and structural reforms; (b) determine the most effective way for PG&E to provide safe and reliable electric and natural gas service to its customers and communities for the long term; and (c) address the significant increase in wildfire risk

1 in an environment that continues to be challenged by climate change and its ongoing and
2 future impact on California, including on PG&E and its operations; and

- 3 • Fourth, to enable PG&E to continue its extensive restoration and rebuilding efforts to assist
4 the communities affected by the 2017 and 2018 Northern California wildfires.

5 Chapter 11 provides the unique opportunity for all of the wildfire claims asserted and to be
6 asserted against the Debtors to be comprehensively addressed in one forum. It will avoid the lengthy
7 process necessarily attendant to the state court system (including applicable statutes of limitation) and,
8 perhaps more importantly, avoid the risk that, due to PG&E's financial condition, those having their
9 wildfire claims dealt with earlier in the state court process will fare substantially better than other
10 wildfire claimants. Chapter 11 mandates that all wildfire claimants be treated similarly, and provides
11 the statutory framework and tools to accomplish that goal on an expedited basis.

12 PG&E could have accessed a limited amount of secured indebtedness or other alternative forms
13 of capital to temporarily extend its liquidity runway outside of chapter 11. That alternative, however,
14 was not a solution nor was it in the best interests of PG&E's stakeholders, including wildfire claimants
15 (who could face subordination of their claims in certain circumstances). This course of action would
16 not have addressed the fundamental issues facing PG&E – it was not a feasible way to address and
17 resolve the thousands of wildfire claims and to assure PG&E would have the liquidity necessary to
18 sustain ongoing operations, as well as service its outstanding funded debt.

19 It also is important to recognize that Senate Bill 901 (“**SB 901**”), which was enacted by the
20 California legislature in September, 2018, to address a portion of the liabilities PG&E faced in
21 connection with the 2017 Northern California wildfires (through the issuance of recovery bonds
22 (referred to as “**securitization**”)), does not address wildfires occurring in 2018. Since the 2018 Camp
23 Fire and in view of PG&E's potential liabilities relating to the Camp Fire, PG&E has been in regular
24 contact with representatives of the Governor's office and the relevant regulatory agencies, including
25 the staff of the California Public Utilities Commission (the “**CPUC**”), and has apprised those parties as
26 to PG&E's financial condition and its projected liquidity profile.

1 Although, as reported, there were initial indications that relief similar to that provided for the
2 2017 Northern California wildfires might be available for the 2018 Camp Fire, that relief is not
3 available absent further legislation. As of the date hereof, there is no prospect of legislation being
4 enacted on a timely basis, if at all, to implement the extraordinary measures necessary to stabilize
5 PG&E's financial condition and avoid the necessity of seeking relief under chapter 11.

6 Additionally, on January 10, 2019, the CPUC adopted an Order Instituting Rulemaking (the
7 "**OIR**"), which established a process to develop criteria and a methodology to determine the amount of
8 PG&E's cost recovery related to the 2017 Northern California wildfires. Based on the OIR, PG&E
9 believes that any recovery of costs related to the 2017 Northern California wildfires would not occur, if
10 at all, until (a) PG&E has paid claims relating to such wildfires, (b) application for recovery of such
11 costs has been made, and (c) the CPUC has made a determination that such costs are just and
12 reasonable or in excess of the disallowance threshold to be established by the CPUC. Therefore,
13 PG&E does not expect that it would be permitted to securitize costs relating to the 2017 Northern
14 California wildfires on an expedited or emergency basis. Additionally, based on the OIR as well as
15 prior experience and precedent, PG&E also believes that it likely would take years for it to be able to
16 recover through securitization any amount related to the 2017 Northern California wildfires, further
17 exacerbating the situation facing the Debtors.

18 As discussed more fully below, seeking relief under chapter 11, however, has enabled the
19 Debtors to obtain a commitment for debtor in possession financing (the "**DIP Financing**") in the
20 amount of \$5.5 billion. The DIP Financing, which is subject to the Court's approval, together with
21 cash on hand and the revenues generated from operations, will provide the Debtors with the liquidity to
22 fund their operations, administer these Chapter 11 Cases, and to make the necessary expenditures to
23 invest in their infrastructure, including investments to further reduce wildfire risk.

24 The Chapter 11 Cases represent the best means to preserve and maximize the value of the
25 Debtors' business enterprise and are in the best interests of all of their economic stakeholders,
26 including wildfire claimants, the Debtors' other creditors, and PG&E Corp.'s shareholders. Chapter 11
27 will provide the Debtors and all parties in interest with one forum to comprehensively address and
28

1 resolve the Debtors' wildfire liabilities in a fair and expeditious manner, and will assure equality of
2 treatment among all similarly-situated creditors of the Debtors – wildfire claimants, debtholders and
3 others. Additionally, the Chapter 11 Cases will assure that PG&E has the resources, financial and
4 otherwise, to sustain its operations, provide critical utility services safely and reliably, and continue its
5 efforts to rebuild and restore the communities which it serves.

6 **The Company's Business**

7 PG&E Corp. was incorporated in 1995 and is a holding company whose primary operating
8 subsidiary is the Utility, a public utility operating in northern and central California. The Utility was
9 incorporated in 1905 and PG&E Corp. became the holding company of the Utility in 1997. The Utility
10 provides natural gas and utility services to approximately 16 million customers. As of September 30,
11 2018, the Debtors, on a consolidated basis, had reported approximately \$71.4 billion in assets on a
12 book value basis and approximately \$51.7 billion in liabilities on a book value basis.

13 **Employees.** PG&E Corp. and the Utility employ approximately 24,000 regular employees,
14 approximately 20 of whom are employed by PG&E Corp. Of the Utility's regular employees,
15 approximately 15,000 are covered by collective bargaining agreements with local chapters of three
16 labor unions: (i) the International Brotherhood of Electrical Workers; (ii) the Engineers and Scientists
17 of California; and (iii) the Service Employees International Union.

18 **Regulatory Environment.** The Utility's business is subject to the regulatory jurisdiction of
19 various agencies at the federal state, and local levels, including the CPUC in the State of California,
20 and the Federal Energy Regulatory Commission ("FERC") and the Nuclear Regulatory Commission
21 (the "NRC") at the federal level. PG&E Corp. is a "public utility holding company" as defined in the
22 Public Utility Holding Company Act of 2005, and is subject to regulatory oversight by FERC.

23 **Ratemaking.** The Utility's rates for electric and natural gas utility services are set at levels
24 intended to allow the Utility to recover its costs of providing service and have the opportunity to earn a
25 return on invested capital. Before setting rates, the CPUC and FERC conduct proceedings to
26 determine the annual amount that the Utility will be authorized to collect from its customers. The
27 Utility's revenue requirements consist primarily of a base amount set to enable the Utility to recover its
28

1 reasonable operating expenses (e.g., maintenance, administration and general expenses) and capital
2 costs (e.g., depreciation, tax, and financing expenses). In addition, the CPUC authorizes the Utility to
3 collect revenues to recover costs that the Utility is allowed to “pass-through” to customers, including
4 its costs to procure electricity, natural gas and nuclear fuel, to administer public purpose and customer
5 programs, and to decommission its nuclear facilities.

6 **Liquidity and Financial Resources.** The Utility’s ability to fund operations and to finance
7 capital expenditures depends on the levels of its operating cash flows and access to the capital and
8 credit markets. The CPUC authorizes the Utility’s capital structure, the aggregate amount of long-term
9 and short-term debt that the Utility may issue, and the revenue requirements the Utility is able to
10 collect to recover its cost of capital. The Utility has utilized equity contributions from PG&E Corp.
11 and long-term senior unsecured debt issuances to maintain its CPUC-authorized capital structure
12 consisting of 52% equity and 48% debt and preferred stock. Until recently, the Utility relied on short-
13 term debt, including commercial paper, to fund temporary financing needs. Those funding alternatives
14 no longer exist.

15 **Third-Party Monitor.** On April 12, 2017, the Utility retained a third-party monitor at the
16 Utility’s expense as part of its compliance with the sentencing terms of the Utility’s January 27, 2017
17 federal criminal convictions in connection with the natural gas explosion that occurred in the City of
18 San Bruno, California, on September 9, 2010. The Utility was sentenced to, among other things, a
19 five-year corporate probation period and oversight by a third-party monitor for a period of five years,
20 with the ability to apply for early termination after three years. The goal of the monitor is to help
21 ensure that the Utility takes reasonable and appropriate steps to maintain the safety of its gas and
22 electric operations and maintains effective ethics, compliance, and safety-related incentive programs
23 on a Utility-wide basis.

24 **Corporate and Capital Structure**

25 PG&E Corp. and the Utility are public reporting companies under Section 12b of the Securities
26 and Exchange Act of 1934. PG&E Corp.’s common stock is traded on the New York Stock Exchange
27 under the symbol “PCG”.
28

1 **Common Stock.** As of September 30, 2018, PG&E Corp. had 518,674,276 shares of common
2 stock outstanding. PG&E Corp. holds all of the 264,374,809 shares of outstanding common stock of
3 the Utility. On December 20, 2017, the Board of Directors of PG&E Corp. suspended quarterly cash
4 dividends on PG&E Corp.'s common stock, beginning with the fourth quarter of 2017 due to the
5 uncertainty related to the causes of and potential liabilities associated with the 2017 Northern
6 California wildfires. That suspension has remained in effect through the Petition Date.

7 **Preferred Stock.** PG&E Corp. has authorized 75 million shares of no par value preferred
8 stock and 5 million shares of \$100 par value preferred stock. No such preferred stock is outstanding.
9 The Utility has 75 million shares of \$25 par value preferred stock and 10 million shares of \$100 par
10 value preferred stock. As of December 31, 2018, the Utility's preferred stock outstanding included
11 \$145 million of shares with interest rates between 5% and 6% designated as non-redeemable preferred
12 stock and \$113 million of shares with interest rates between 4.36% and 5% that are redeemable
13 between \$25.75 and \$27.25 per share. The Utility's preferred stock outstanding is not subject to
14 mandatory redemption. On December 20, 2017, the Boards of Directors of PG&E Corp. and the
15 Utility determined to suspend quarterly cash dividends on the Utility's preferred stock beginning with
16 the three-month period ending January 31, 2018, due again to the uncertainty related to the causes and
17 potential liabilities associated with the 2017 Northern California wildfires. That suspension has
18 remained in effect through the Petition Date.

19 **Prepetition Indebtedness.** The principal significant pre-Petition Date indebtedness of the
20 Debtors consists of the following (this summary does not include any potential liabilities associated
21 with the 2017 and 2018 Northern California wildfires, which, as stated above, could exceed \$30
22 billion):

23 **Revolving Credit Facilities.** Each of PG&E Corp. and the Utility are party to a separate
24 revolving credit agreement with Bank of America, N.A., and Citibank, N.A., respectively, as
25 administrative agents (each a "**Revolving Credit Facility**" and collectively, the "**Revolving Credit**
26 **Facilities**"). The Revolving Credit Facility to which PG&E Corp. is a party permits borrowings up to
27 an aggregate principal amount of \$300 million. The Revolving Credit Facility to which the Utility is a
28

1 party permits borrowings up to an aggregate amount of \$3 billion. The termination date of each
2 facility was extended in May, 2017, by one year to April 27, 2022. As of December 31, 2018, the
3 Utility's aggregate borrowings under its Revolving Credit Facility included \$2.85 billion of revolving
4 credit loans, and approximately \$80 million of letters of credit outstanding. As of December 31, 2018,
5 PG&E Corp.'s aggregate borrowings outstanding under its Revolving Credit Facility were in the
6 amount of \$300 million.

7 The Revolving Credit Facilities include customary provisions regarding events of default and
8 covenants, including covenants limiting the incurrence of secured debt as permitted under the Utility's
9 senior notes indentures, mergers, and imposing conditions on the sale of all or substantially all assets
10 and other fundamental changes. The Revolving Credit Facilities also have a covenant requiring that
11 PG&E Corp. and the Utility maintain a ratio of consolidated debt to total consolidated capitalization of
12 at most 65% as of the end of each fiscal quarter (the "**Financial Covenant**").

13 All obligations under the Revolving Credit Facilities are unsecured. In addition, the obligations
14 under the Utility's Revolving Credit Facility are not guaranteed by PG&E Corp.; and the obligations
15 under PG&E Corp.'s Revolving Credit Facility are not guaranteed by the Utility.

16 **Term Loans.** PG&E Corp. has an outstanding unsecured term loan in the principal amount of
17 \$350 million that matures on April 16, 2020. The Utility has an outstanding unsecured term loan in the
18 principal amount of \$250 million that matures on February 22, 2019.

19 **Senior Notes.** The Utility has outstanding various issues of senior notes (the "**Senior Notes**")
20 with varying interest rates and maturities ranging from 2020 to 2047, in the aggregate outstanding
21 principal amount of approximately \$17.5 billion. The Senior Notes are unsecured obligations of the
22 Utility and are not guaranteed by PG&E Corp. The indentures governing the Senior Notes contain a
23 provision commonly known as a "negative pledge" including an "equal and ratable" clause requiring
24 generally that in the event the Utility incurs indebtedness secured by Principal Properties (as defined in
25 the indentures) in excess of 10% of the Utility's Net Tangible Assets (as defined in the indentures), the
26 Senior Notes must be simultaneously secured by the same assets on an equal and ratable basis with the
27 newly incurred secured indebtedness.
28

1 **Pollution Control Bonds.** The California Pollution Control Financing Authority and the
2 California Infrastructure and Economic Development Bank have issued various series of fixed-rate and
3 multi-modal tax-exempt pollution control bonds for the benefit of the Utility in the aggregate
4 outstanding principal amount of approximately \$860 million. Approximately \$760 million in principal
5 amount of such pollution control bonds are backed by letters of credit. The obligations under the
6 reimbursement agreements entered into by the Utility in connection with the issuance of the letters of
7 credit are unsecured obligations of the Utility and are not guaranteed by PG&E Corp.

8 **Trade Payables.** As of January 28, 2019, PG&E's outstanding trade payables totaled
9 approximately \$2.1 billion.

10
11 **The Need for Chapter 11 Relief and**
12 **the Events and Circumstances Compelling**
13 **the Commencement of The Chapter 11 Cases**

14 **The Northern California Wildfires**

15 **The 2018 Camp Fire**

16 On November 8, 2018, a wildfire began near the city of Paradise, Butte County, California (the
17 "Camp Fire"), located in the service territory of the Utility. The California Department of Forestry
18 and Fire Protection's ("Cal Fire") Camp Fire Incident Information Website as of January 4, 2019 (the
19 "Cal Fire website"), indicated that the Camp Fire consumed 153,336 acres. On the Cal Fire website,
20 Cal Fire reported 86 fatalities and the destruction of 13,972 residences, 528 commercial structures and
21 4,293 other buildings resulting from the Camp Fire.

22 The cause of the Camp Fire remains under investigation and PG&E is cooperating with those
23 investigations. The Utility has submitted two Electric Incident Reports (the "EIRs") to the CPUC, one
24 on November 8, 2018 and one on November 16, 2018. On December 11, 2018, the Utility publicly
25 released a letter to the CPUC supplementing the EIRs which stated:

- 26 • On Cal Fire's website, Cal Fire has identified coordinates for the Camp Fire near Tower
27 :27/222 on the Utility's Caribou-Palermo 115 Kv Transmission Line and has identified the
28 start time of the Camp Fire as 6:33 a.m. on November 8, 2018.

- 1 • On November 8, 2018, at approximately 6:15 a.m., the utility's Caribou-Palermo 115 Kv
2 Transmission Line relayed and deenergized. At approximately 6:30 a.m. that day, a utility
3 employee observed fire in the vicinity of Tower :27/222, and this observation was reported
4 to 911 by Utility employees. In the afternoon of November 8, the Utility observed damage
5 on the line at Tower :27/222. Specifically, an aerial patrol identified that a suspension
6 insulator supporting a transposition jumper had separated from an arm on Tower :27/222.
- 7 • On November 14, 2018, the Utility observed a broken C-hook attached to the separated
8 suspension insulator that had connected the suspension insulator to a tower arm, along with
9 wear at the connection point. In addition, the Utility observed a flash mark on Tower
10 :27/222 near where the transposition jumper was suspended and damage to the transposition
11 jumper and suspension insulator.
- 12 • In addition to the events on the Caribou-Palermo 115 Kv Transmission Line, on November
13 8, 2018, at approximately 6:45 a.m., the Utility's Big Bend 1101 12 Kv Circuit experienced
14 an outage. On November 9, 2018, a Utility employee on patrol arrived at the location of the
15 pole with Line Recloser ("LR") 1704 on the Big Bend 1101 Circuit and observed that the
16 pole and other equipment were on the ground with bullets and bullet holes at the break
17 point of the pole and on the equipment. On November 12, 2018, a Utility employee was
18 patrolling Concow Road north of LR 1704 when he observed wires down and damaged and
19 downed poles at the intersection of Concow Road and Rim Road. At this location, the
20 employee observed several snapped trees, with some on top of the downed wires.

21 **2017 Northern California Wildfires**

22 As has been well-reported, beginning on October 8, 2017, multiple wildfires spread through
23 Northern California, including Napa, Sonoma, Butte, Humboldt, Mendocino, Lake, Nevada, and Yuba
24 Counties. According to a report issued by Cal Fire, dated October 30, 2017, at the peak of the 2017
25 Northern California wildfires, there were 21 major fires that, in total, burned over 245,000 acres and
26 destroyed an estimated 8,900 structures. The 2017 Northern California wildfires resulted in 44
27 fatalities.

1 Cal Fire has issued its determination on the causes of 18 of the 2017 Northern California
2 wildfires, and alleged that each of these fires involved the Utility's equipment. The remaining 2017
3 Northern California wildfires remain under Cal Fire's investigation, including the possible role of the
4 Utility's power lines and other facilities. Additionally, the 2017 Northern California wildfires are
5 under investigation by the CPUC's Safety and Equipment Divisions.

6 During the second quarter of 2018, Cal Fire issued news releases announcing its determination
7 on the causes of 16 of the 2017 Northern California wildfires (the La Porte, McCourtney, Lobo,
8 Honey, Redwood, Sulphur, Cherokee, 37, Blue, Norrbom, Adobe, Patrick, Pythian, Nuna, Pocket and
9 Atlas fires, located in Mendocino, Lake, Butte, Sonoma, Humboldt, Nevada and Napa counties).
10 According to the Cal Fire news releases, the first four fires "were caused by trees coming into contact
11 with power lines" and the remaining 12 fires "were caused by electric power and distribution lines,
12 conductors and the failure of power poles."

13 On October 9, 2018, Cal Fire issued a news release announcing the results of its investigation
14 into the Cascade fire, located in Yuba County, concluding the Cascade fire "was started by sagging
15 power lines coming into contact during heavy winds" and that "the power line in question was owned
16 by Pacific Gas and Electric Company." During the third quarter of 2018, Cal Fire released its
17 investigation report related to the Point fire, concluding the Point fire was caused by the "failure of the
18 PG&E distribution line" and "could be attributed to limbs falling on the line in high winds."

19 On January 24, 2019, Cal Fire released the results of its investigation of the 2017 Tubbs fire,
20 which concluded that the fire "was caused by a private electrical system adjacent to a residential
21 structure." This conclusion is consistent with PG&E's longstanding belief based on available evidence
22 that its equipment did not cause the Tubbs fire.

23 Cal Fire has not publicly issued any news releases or other determinations with respect to the
24 Maacama and Pressley wildfires. The timing and outcome of the Cal Fire investigation into the
25 remaining fires is uncertain.
26
27
28

Claims and Proceedings Related to the 2017 and 2018 Northern California Wildfires

It is my understanding that California law includes a doctrine of “inverse condemnation” that is routinely invoked in California wildfire damages, claims and litigation. Inverse condemnation imposes strict liability (including liability for attorneys’ fees) for damages as a result of the design, construction and maintenance of utility facilities, including utilities’ transmission lines.

It also is my understanding that if the Utility’s facilities, such as its electric distribution and transmission lines, are determined to be the substantial cause of one or more of the 2017 and 2018 Northern California wildfires, and the doctrine of inverse condemnation applies, the Utility could be liable for property damage, business interruption, interest, and attorney’s fees without having been found negligent. California courts have imposed liability under the doctrine of inverse condemnation in legal actions brought by property holders against utilities on the grounds that losses borne by the person whose property was damaged through a public use undertaking should be spread across the community that benefited from such undertaking, and based on the assumption that utilities have the ability to recover these costs from their customers. Further, courts in California have determined that the doctrine of inverse condemnation is applicable regardless of whether the CPUC ultimately allows recovery by the utility for any such costs. The CPUC may decide not to authorize cost recovery even if a court decision were to determine that the Utility is liable as a result of the application of the doctrine of inverse condemnation.

It also is my understanding that in addition to such claims for property damage, business interruption, interest, and attorneys’ fees, the Utility could be liable for fire suppression costs, evacuation costs, medical expenses, personal injury damages, “future claims,” and other damages under other theories of liability, including if the Utility were found to have been negligent. Further, the Utility could be subject to material fines or penalties if the CPUC or any law enforcement agency brought an enforcement action, including a criminal proceeding, and determined that the Utility failed to comply with applicable laws and regulations.

As of January 11, 2019, the Debtors were aware of approximately 46 complaints on behalf of at least 2,000 plaintiffs related to the Camp Fire, six of which seek to be certified as class actions. The

1 litigation currently pending against PG&E related to the Camp Fire includes claims under multiple
2 theories of liability, including inverse condemnation, trespass, private nuisance, public nuisance,
3 negligence, negligence per se, negligent interference with prospective economic advantage, negligent
4 infliction of emotional distress, premises liability, violations of the Public Utilities Code, violations of
5 the Health & Safety Code, malice and false advertising in violation of the California Business and
6 Professions Code. The plaintiffs principally assert in that litigation that PG&E's alleged failure to
7 maintain and repair its distribution and transmission lines and failure to properly maintain the
8 vegetation surrounding such lines were the causes of the Camp Fire. The plaintiffs seek damages and
9 remedies that include wrongful death, personal injury, property damage, evacuation costs, medical
10 expenses, establishment of a class action medical monitoring fund, punitive damages, attorney's fees
11 and other damages. Less than three months have elapsed since the Camp Fire, a relatively short period
12 of time in which to assert claims. As such, PG&E expects a significant number of additional claims to
13 be asserted with respect to the Camp Fire.

14 As of January 11, 2019, PG&E was aware of approximately 700 complaints on behalf of at
15 least 3,600 plaintiffs related to the 2017 Northern California wildfires, five of which seek to be
16 certified as class actions. These cases have been coordinated in the San Francisco County Superior
17 Court. As of the Petition Date, the coordinated litigation is in the early stages of discovery. A trial
18 with respect to the Atlas fire is scheduled to begin on September 23, 2019. The litigation currently
19 pending against PG&E related to the 2017 Northern California wildfires includes claims under
20 multiple theories of liability, including inverse condemnation, trespass, private nuisance and
21 negligence. The claims principally assert that PG&E's alleged failure to maintain and repair its
22 distribution and transmission lines and failure to properly maintain the vegetation surrounding such
23 lines were the causes of the 2017 Northern California wildfires. The plaintiffs seek damages that
24 include wrongful death, personal injury, property damage, evacuation costs, medical expenses,
25 punitive damages, attorneys' fees and other damages.

26 Insurance carriers that have made payments to their insureds for property damage arising out of
27 the 2017 Northern California wildfires have filed 41 subrogation complaints in the San Francisco
28

1 County Superior Court as of January 11, 2019. These complaints allege, among other things,
2 negligence, inverse condemnation, trespass and nuisance. The allegations are similar to the ones made
3 by individual plaintiffs. Insurance carriers have filed three similar subrogation complaints with respect
4 the Camp Fire in the Sacramento County Superior Court.

5 Various government entities, including Mendocino, Napa and Sonoma Counties and the City of
6 Santa Rosa, also have asserted claims against PG&E based on the damages that these government
7 entities allegedly suffered as a result of the 2017 Northern California wildfires. Such alleged damages
8 include, among other things, loss of natural resources, loss of public parks, property damages and fire
9 suppression costs. The causes of action and allegations are similar to the ones made by individual
10 plaintiffs and the insurance carriers. PG&E expects similar claims to be made by various government
11 entities with respect to the Camp Fire.

12 PG&E also expects to be the subject of thousands of additional claims in connection with the
13 2017 and 2018 Northern California wildfires.

14 **Potential Losses and Claims**

15 As noted above and as set forth in detail in the Debtors' Form 8-K, the Debtors' potential
16 exposure with respect to the 2017 and 2018 Northern California wildfires could exceed \$30 billion,
17 exclusive of potential punitive damages, fines and penalties, or damages with respect to future claims.
18 Notably, the Debtors incurred significant fines and penalties in connection with past incidents – for
19 example, penalties in the amount of \$1.6 billion in connection with the San Bruno explosion in 2015.

20 PG&E has approximately \$840 million of insurance coverage for liabilities, including wildfire
21 events, for the period August 1, 2017 through July 31, 2018. During the third quarter of 2018, PG&E
22 renewed its liability insurance coverage for wildfire events in the aggregate amount of approximately
23 \$1.4 billion for the period from August 1, 2018 through July 31, 2019. The Debtors expect that their
24 losses with respect to the 2017 and 2018 Northern California wildfires will greatly exceed available
25 insurance.

SB 901

In apparent recognition of, among other things, the severe financial strain the potential liability with respect to the 2017 Northern California wildfires would have on PG&E, on September 21, 2018, California enacted SB 901 to provide PG&E with economic relief relating to certain wildfire costs associated with the 2017 Northern California wildfires. That relief included:

- in determining cost recovery in connection with the 2017 Northern California wildfires, directing the CPUC to consider PG&E's financial status and determine the maximum amount PG&E can pay without harming customers or materially impacting its ability to provide adequate and safe service, ensuring that the costs that are disallowed for recovery in rates assessed for the wildfires, in the aggregate do not exceed that amount; and
- authorizing the CPUC to issue a financing order that permits PG&E to recover through the issuance of recovery bonds (securitization), wildfire related costs in excess of the maximum disallowance permitted above.

The enactment of SB 901 in September, 2018, provided PG&E with the prospect that, assuming cost recovery under SB 901 was timely, PG&E would have the ability to continue to access the necessary capital on relatively customary, historical terms to address its liabilities relating to the 2017 Northern California wildfires, its other obligations, and to properly maintain and invest in its business operations. As noted above, however, SB 901 does not address wildfires occurring in 2018 and, accordingly, provides no relief for the Camp Fire. Moreover, again as noted above, despite the securitization relief authorized by SB 901 in connection with the 2017 Northern California wildfires, the recent rulemaking adopted by the CPUC in the OIR has made it clear that any ability of the Debtors to recover costs for the 2017 Northern California wildfires through securitization would not be available for years, if at all, and only after the Debtors have actually paid claims arising from the 2017 Northern California wildfires.

The Debtors' Liquidity and Financial Resources

As a result of the 2017 and 2018 Northern California wildfires, PG&E's potential liability with respect thereto, and the failure to expressly provide relief for 2018 wildfires in SB 901, PG&E's credit

1 profile has deteriorated severely. During 2018 and 2019, the Debtors' credit ratings were subject to
2 multiple downgrades by the credit agencies, and are currently rated below "investment grade" by all
3 three major rating agencies. On November 13, 2018, PG&E Corp. and the Utility drew all amounts
4 available under their respective Revolving Credit Facilities to assure access to additional liquidity.
5 Events in recent weeks have caused significant further deterioration by reason of:

6 (a) Further downgrades of the Debtors' credit ratings on January 7, 2019 and January 10,
7 2019, that triggered a requirement that PG&E post substantial cash collateral in connection with its
8 power purchase and other supply arrangements;

9 (b) other requests for cash collateral made by third parties, including the California State
10 Division of Workers' Compensation, and in connection with State environmental remediation projects;

11 (c) potential impending defaults under the agreements governing PG&E's existing funded
12 debt;

13 (d) significant contraction in customary trade terms;

14 (e) the negative impact and uncertainty created by:

- 15 • the recent CPUC order instituting an investigation to determine whether PG&E
16 violated legal requirements to timely locate and mark natural gas pipelines for safety
17 purposes and falsified records;
 - 18 • the recent CPUC Scoping Memo and Ruling setting forth the scope to be addressed
19 in the next phase of its ongoing investigation into whether the organizational culture
20 and governance of PG&E prioritizes safety and adequately directs resources to
21 promote accountability and achieve safety goals and standards; and
 - 22 • recent orders entered by the United States District Court (a) regarding whether
23 PG&E has been in violation of its "conditions of supervision" in connection with its
24 probation period related to the San Bruno explosion; and (b) proposing new
25 conditions of probation.
- 26
27
28

1 In addition, to preserve liquidity, on January 15, 2019, PG&E did not make the interest payment of
2 approximately \$21.6 million with respect to its outstanding 5.40% of Senior Notes due January 15,
3 2040.

4 As explained above, PG&E believed it could have accessed outside of chapter 11 limited
5 additional capital in the form of secured indebtedness or in more esoteric forms that would have been
6 expensive or dilutive. In addition, the ability to incur additional secured indebtedness would be limited
7 by covenants in PG&E's applicable loan documents, accounting accruals, as well as by "equal and
8 ratable clauses" in its indentures that, if triggered, would have had the effect of subordinating wildfire
9 claims to PG&E's existing funded debt obligations that have the benefit of such clauses and which
10 obligations currently are of the same rank and priority as wildfire claims.

11 After a comprehensive review, the Boards of both PG&E Corp. and the Utility, and
12 management determined that temporarily extending PG&E's liquidity runway was not in the best
13 interests of its economic stakeholders and would not address and, indeed would merely postpone
14 addressing, the fundamental issues facing PG&E and jeopardize its long-term viability.

15 PG&E is faced with a crisis that threatens its ability to continue to operate as a going concern
16 and to provide safe and reliable electric and gas services to its millions of customers. The Chapter 11
17 Cases are the only viable option to fairly and expeditiously resolve PG&E's wildfire liability, to restore
18 PG&E's financial health and stability, and to make sure that PG&E has the liquidity and resources to
19 fund its operations. In connection with the administration of the Chapter 11 Cases, PG&E will
20 continue to consider all possible solutions to improve safety, reliability and service, while assuring fair
21 and equitable treatment for wildfire claimants, other creditors, its employees, customers, communities,
22 shareholders and all other parties in interest. The Chapter 11 Cases will facilitate PG&E working with
23 these various constituencies in one centralized forum to comprehensively address and resolve its
24 liabilities, explore structural alternatives, and implement necessary changes to maximize value for all
25 of its economic stakeholders and to assure PG&E's long-term viability.

First Day Motions

The Debtors have filed their First Day Motions contemporaneously herewith to ensure that the Debtors' businesses continue to function during these Chapter 11 Cases. For the reasons set forth below, I submit that (a) the relief requested in the First Day Motions is necessary to enable the Debtors to operate with minimal disruption during the pendency of their Chapter 11 Cases, and (b) approval of the First Day Motions is warranted.¹

I. MOTION OF DEBTORS PURSUANT TO FED. R. BANKR. P. 1015(b) FOR ENTRY OF ORDER DIRECTING JOINT ADMINISTRATION OF CHAPTER 11 CASES (THE "JOINT ADMINISTRATION MOTION")

Pursuant to the Joint Administration Motion, the Debtors request entry of an order directing joint administration of the Chapter 11 Cases for procedural purposes only pursuant to Bankruptcy Rule 1015(b) and request that each of their Chapter 11 Cases be administered under a consolidated caption, in the following form:

**UNITED STATES BANKRUPTCY COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA
SAN FRANCISCO DIVISION**

In re:	§	Case No. 19-_____ ()
	§	
PG&E CORPORATION <i>et al.</i>,	§	Chapter 11
	§	
Debtors.	§	(Jointly Administered)
	§	

The Debtors further request the Court's direction that a notation substantially similar to the following language be entered on the docket maintained by the Clerk of the Court to reflect the joint administration of the Chapter 11 Cases:

An order has been entered in accordance with Bankruptcy Rule 1015(b) directing the procedural consolidation and joint administration of the Chapter 11 Cases as set forth in the Motion of Debtors Pursuant to Fed. R. Bankr. P. 1015(b) for Entry of Order Directing Joint Administration of Chapter 11 Cases, as filed on the docket in Case No. 19-[] (). The docket in Case No. 19-[] () should be consulted for all matters affecting the case.

¹ Capitalized terms used in this part of the Declaration and not defined herein shall have the meanings ascribed to them in the relevant First Day Motion.

1 Joint administration of the Chapter 11 Cases will provide significant administrative efficiencies
2 without harming the substantive rights of any party in interest. Many of the motions, hearings, and
3 orders that will be filed in the Chapter 11 Cases almost certainly will affect each of the Debtors. I
4 believe that the entry of an order directing joint administration of the Chapter 11 Cases will reduce fees
5 and costs by avoiding duplicative filings, objections, notices, and hearings, and will allow the United
6 States Trustee for Region 17 (the “U.S. Trustee”) and all parties in interest to monitor the Chapter 11
7 Cases with greater ease and efficiency.

8 Accordingly, I respectfully submit that the relief requested in the Joint Administration Motion
9 is in the best interests of the Debtors’ estates, their creditors, their shareholders, and all other parties in
10 interest, and should be granted.

11 **II. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105, 362, 363, 364, 503 AND 507,**
12 **AND FED. R. BANKR. P. 2002, 4001, 6003, 6004 AND 9014 FOR INTERIM AND**
13 **FINAL ORDERS (I) AUTHORIZING THE DEBTORS TO OBTAIN SENIOR**
14 **SECURED, SUPERPRIORITY, POSTPETITION FINANCING, (II) GRANTING**
15 **LIENS AND SUPERPRIORITY CLAIMS, (III) MODIFYING THE AUTOMATIC**
16 **STAY, (IV) SCHEDULING FINAL HEARING AND (V) GRANTING RELATED**
17 **RELIEF (THE “DIP MOTION”)**

18 As the Senior Vice President and Chief Financial Officer of PG&E Corp., I was intimately
19 involved in assessing the Debtors’ financing needs during the course of the Chapter 11 Cases. As of
20 the Petition Date, PG&E Corp. had approximately \$370 million of cash on hand. I anticipate that
21 amount will be more than sufficient for PG&E Corp. to meet its obligations during the course of the
22 Chapter 11 Cases. As reported in the January 14, 2018 Form 8-K filed with the SEC, the Utility had
23 approximately \$1.1 billion in cash on hand as of that date. However, starting in early January 2019, as
24 a consequence of supplier uncertainty, media speculation, credit downgrades, and reactions to the SB
25 901 15 day notice, the Utility’s liquidity was depleted by an aggregate of approximately \$811 million
26 used to satisfy collateral posting needs, address accelerated payment and pre-pay demands of energy
27 commodity suppliers, and address requests from other essential suppliers for shortened payment terms.
28 As of the filing, the Utility had cash on hand of approximately \$240 million, net of customer deposits
and cash held from counterparties of approximately \$250 million.

1 Prior to the commencement of the Chapter 11 Cases, the finance team, under my direction,
2 developed a bottoms up projection of operating cash flows and projected capital investment. The
3 Debtors are net users of cash given the substantial capital invested in the business for routine and
4 replenishment capital expenditures, wildfire prevention and restoration efforts; additionally, the
5 Debtors invest in energy storage, electric vehicle initiatives and related technologies to meet
6 California's carbon reduction goals. In addition, with the help of the Debtors' outside advisors, we
7 developed and applied adjustments to the projections to account for the impacts of chapter 11, the
8 working capital effect of the notice under SB 901 described above and anticipated chapter 11 expenses.
9 That work led us to conclude that the Utility would require \$5.5 billion of debtor in possession
10 financing over a two-year period.

11 The Debtors project capital spending to exceed cash flow from operations by approximately
12 \$1.6 billion in each of 2019 and 2020 largely driven by projected capital spending of \$6.6 billion in
13 2019 and \$6.9 billion in 2020, as well as other investing activities of more than \$300 million
14 forecasted for 2019 and more than \$125 million for 2020. This forecasted level of capital spending is
15 in-line with historical capital spending of \$5.8 billion in 2017 and \$6.6 billion in 2018. Due to the
16 regulated nature of the Utility's businesses, only a small fraction of the capital spending program is
17 discretionary. Cash flow from operations is forecasted to be \$5.3 billion in 2019 and \$5.5 billion in
18 2020. This creates an aggregate operating cash flow deficit after capital expenditures of nearly \$3.2
19 billion over the two-year forecast period which PG&E must finance externally.

20 In addition to the combined operating deficit of \$3.2 billion mentioned above, the Debtors need
21 additional funding to service the DIP Financing and pay related costs. Furthermore, the Debtors'
22 advisors have projected that the Debtors will need to post additional collateral in 2019 of
23 approximately \$500 million to meet, among other things, environmental and other state requirements.
24 The DIP Financing sizing also incorporates projected professional fees for estate-paid professionals to
25 be paid during the pendency of the Chapter 11 Cases.

26 In the event the Chapter 11 Cases extend beyond 2020, the DIP Facility permits the Debtors,
27 subject to Court approval and obtaining commitments from lenders, to access up to \$4 billion of
28

1 incremental DIP Financing. The incremental financing need was derived by assuming that cash flow
2 from operations remain consistent with prior years, capital spending increases slightly from 2020 and
3 all other costs related to the Chapter 11 Cases are extended for an additional year. I believe that the
4 DIP Facility and incremental financing will provide adequate liquidity to the Debtors throughout the
5 pendency of the Chapter 11 Cases, assuming emergence from chapter 11 no later than 2021.

6 The Debtors would experience irreparable harm if the interim order approving the DIP Motion
7 is not entered. Access to immediate financing is essential to ensure that the Utility has sufficient
8 working capital to continue operating. Absent authority to borrow under the DIP Facility on an
9 emergency basis, the Debtors will not be able to continue operations on a normal basis which could
10 potentially create public safety issues due to the inability to provide services to their customers and
11 maintain safe operations, resulting in immediate and irreparable harm to the Debtors and their estates,
12 creditors (including wildfire claimants), employees, customers, and PG&E Corp.'s shareholders, and
13 jeopardize their ability to successfully administer these Chapter 11 Cases.

14 The Debtors enter chapter 11 with only \$860 million of aggregate cash. Approximately \$250
15 million of that cash is comprised of customer deposits that the Debtors believe should not be used to
16 fund their operations and working capital needs. Approximately \$370 million is held by PG&E Corp.
17 for its own uses. As a result, the Utility, which is the operating entity of the Debtors, has access to
18 only \$240 million of cash as of the Petition Date, which is insufficient to meet operating expenses and
19 address short-term working capital needs and to have sufficient additional liquidity to address both
20 ordinary course and non-ordinary course variability in the business. The Debtors believe they need
21 access to \$1.5 billion of post-petition DIP financing during the course of the interim period to operate
22 their businesses in an appropriate and prudent manner.

23 The Debtors evaluated, with the assistance of their advisors, the amount of funding that they
24 will require during the interim borrowing period of the Chapter 11 Cases. The amount was derived
25 from a cashflow projection developed from an analysis of the Debtors' receipts and disbursements (the
26 "**13-Week Budget**," attached to the DIP Motion as Exhibit C). I believe the 13-Week Budget presents
27 a reasonable estimate of the Debtors' cash sources and needs during the next thirteen weeks.

1 Given these estimates, access to the requested portion of the DIP Facility would provide the
2 Debtors sufficient liquidity to stabilize their operations during the Interim Period. Specifically, the
3 DIP Facility will allow the Debtors to: (a) acquire timely energy supply that is essential to the Debtors'
4 ability to provide uninterrupted services to their customers; (b) provide the liquidity necessary to
5 stabilize supply with other non-energy vendors including those performing critical safety, vegetation
6 management, and wildfire restoration services; (c) fund approximately \$260 million of payroll
7 obligations coming due in the first month of the Chapter 11 Cases; (d) fund other essential payments to
8 be made under first day orders; (e) fund collateral that the state has requested to backstop the Debtors'
9 workers' compensation programs; (f) fund the near-term administrative costs of these Chapter 11
10 Cases; and (g) permit the Debtors to maintain a working capital reserve of \$450 million to cover the
11 intra month timing of energy supply costs. The interim DIP funding amount would also provide a
12 reasonable liquidity buffer to the Debtors in the event they underperform their projections, or in case
13 unexpected fluctuations occur in energy markets causing a disruption in supply or requirements to post
14 additional collateral, which could result in the need to access several hundred million dollars within a
15 day's time. Furthermore, the liquidity buffer provides the Utility with the necessary resources to
16 respond to winter storms or other emergency circumstances.

17 By contrast, without the funding provided by the DIP Facility during the Interim Period, the
18 Debtors' access to cash needed to operate their businesses would evaporate and energy suppliers and
19 trade creditors would likely cease extending credit, creating a vicious cycle that would jeopardize the
20 Debtors' ability to operate.

21 Moreover, ensuring that the Debtors continue to operate pending a final hearing on the DIP
22 Motion is not merely a commercial objective. Unlike many other chapter 11 cases, here, it is
23 especially crucial that the Debtors obtain financing to continue their operations because the Debtors
24 provide energy to nearly 16 million people across 700,000 square miles in Northern and Central
25 California. Given the nature of the Debtors' businesses, any interruption of the Debtors' ability to pay
26 vendors and operate their businesses could potentially (i) cause environmental hazards or pose
27
28

1 significant risk to the environment, (ii) pose a threat to health and public safety, or (iii) compromise the
2 ability to provide power to the California electrical grid.

3 Based upon the above, I believe the DIP Facility represents the best option for meeting the
4 Debtors' liquidity needs, and respectfully submit that the Debtors should be authorized to access up to
5 \$1.5 billion of the DIP Facility during the Interim Period.

6 **III. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 363(b), AND 507 AND**
7 **FED. R. BANKR. P. 6003 AND 6004 FOR INTERIM AND FINAL AUTHORITY TO (I)**
8 **(A) CONTINUE EXISTING CASH MANAGEMENT SYSTEM, (B) HONOR CERTAIN**
9 **PREPETITION OBLIGATIONS RELATED TO THE USE THEREOF, (C) CONTINUE**
10 **INTERCOMPANY ARRANGEMENTS, (D) CONTINUE TO HONOR OBLIGATIONS**
11 **RELATED TO JOINT INFRASTRUCTURE PROJECTS, AND (E) MAINTAIN**
12 **EXISTING BANK ACCOUNTS AND BUSINESS FORMS; AND (II) WAIVING THE**
13 **REQUIREMENTS OF 11 U.S.C. § 345(b) (THE "CASH MANAGEMENT MOTION").**

14 Pursuant to the Cash Management Motion, the Debtors are seeking interim and final authority,
15 in the ordinary course of business and consistent with the Debtors' prepetition practices, to (i)(a)
16 continue operating their existing cash management system (the "**Cash Management System**"), as
17 described herein, including the continued maintenance of existing bank accounts at the Debtors' banks
18 (the "**Banks**"), (b) honor certain prepetition obligations related to the Cash Management System, (c)
19 continue certain intercompany arrangements among the Debtors and certain non-Debtor affiliates and
20 subsidiaries (the "**Non-Debtor Affiliates and Subsidiaries**"), (d) continue to honor all obligations
21 with respect to certain Joint Infrastructure Projects (as defined below), and (e) maintain existing
22 business forms; and (ii) waive the requirements of section 345(b) of the Bankruptcy Code to the extent
23 they apply to any of the Bank Accounts (as defined below). Further, pursuant to the Cash
24 Management Motion, the Debtors request that the Court authorize, but not direct, the Banks to receive,
25 process, honor, and pay all checks presented for payment and electronic payment requests relating to
26 the foregoing to the extent the Debtors have sufficient funds standing to their credit with such Bank,
27 whether such checks were presented or electronic request were submitted before or after the Petition
28 Date, and that all such Banks be authorized to rely on the Debtors' designation of any particular check
or electronic payment request as appropriate pursuant to the Cash Management Motion without any
duty of further inquiry and without liability for following the Debtors' instructions.

1 In the ordinary course of business, the Debtors utilize their Cash Management System, which is
2 an integrated, centralized system designed to collect, transfer, and disburse funds generated by their
3 electricity and natural gas operations. The Cash Management System has several main components:
4 (i) cash collection, including the collection of payments made to the Debtors from revenue generated in
5 the ordinary course through the sale and delivery of electricity and natural gas to customers; (ii)
6 relatively minimal cash transfers among the Debtors and certain Non-Debtor Affiliates and
7 Subsidiaries; and (iii) cash disbursements that fund the Debtors' business operations and related
8 obligations. Although the Utility and PG&E Corp. each maintain separate systems, the Cash
9 Management System is an integrated system. Pursuant to that certain *Restated Continuing Services*
10 *Agreement*, dated October 15, 1999, between the Utility and PG&E Corp, (the "**PG&E Corp. CSA**"),
11 the Utility operates the cash management system of PG&E Corp. and all transfers between accounts
12 held by PG&E Corp. and the Utility are made pursuant to wire transfers in accordance with the PG&E
13 Corp. CSA. It is critical that the Cash Management System remains intact during these Chapter 11
14 Cases to ensure the seamless continuation of transactions and the uninterrupted supply of power and
15 electricity to the Utility's customers.

16 The Cash Management System facilitates cash monitoring, forecasting, and reporting and
17 enables the Debtors to maintain control over the administration of the Bank Accounts located at the
18 Banks, including, but not limited to, the accounts listed on Schedule 1 to the proposed interim order
19 annexed to the Cash Management Motion. The Debtors maintain one-hundred eight (108) bank
20 accounts (each, a "**Bank Account**" and, collectively, the "**Bank Accounts**") at various Banks, of
21 which thirty (30) are actively used in the Cash Management System (such accounts, the "**Primary**
22 **Bank Accounts**"). Of the Primary Bank Accounts, sixteen (16) accounts are maintained at The Bank
23 of New York Mellon ("**BNYM**"), six (6) accounts are maintained at Bank of America, N.A.
24 ("**BoAML**"), four (4) accounts are maintained at Citibank, N.A. ("**Citi**"), one (1) account is
25 maintained at Royal Bank of Canada ("**RBC**"), two (2) accounts are maintained at Union Bank of
26 California ("**Union Bank**"), and one (1) account is maintained at U.S. Bank, N.A ("**U.S. Bank**").
27
28

Twenty-one (21) of the Primary Bank Accounts are maintained at Banks designated as authorized depositories by the U.S. Trustee pursuant to the U.S. Trustee's Guidelines (the "**UST Guidelines**").

The remaining seventy-eight (78) Bank Accounts are not utilized in the day-to-day flow of funds throughout the Cash Management System and are comprised mainly of specialized accounts, including: (a) forty-nine (49) tax-exempt bond accounts, maintained in connection with each of the Debtors' tax-exempt debt issuances, held at Deutsche Bank Trust Company Americas (the "**Deutsche Bank Bond Accounts**"), (b) six (6) escrow accounts maintained in connection with ongoing partnerships with third-parties held at U.S. Bank N.A. Global Corporate Trust Services (the "**U.S Bank Escrow Accounts**"), (c) three (3) trust accounts maintained in connection with retirement benefits - two (2) held at Wells Fargo Bank N.A. (Acct No. XX5300 and XX5400) and one (1) at Fidelity Management Trust Company (Acct No. XX0137) (the "**Retiree Benefit Trust Accounts**"), (d) one (1) account to hold certain reserve funds for employees who work with asbestos in the course of their employment required under the Asbestos Hazard Emergency Response Act held at BoAML (Acct No. XX2988) (the "**Asbestos Medical Reserve Account**"), (e) two (2) accounts for contributions to political action committees funded from voluntary deductions from employee payroll held at Bank of Marin (Acct Nos. XX0132 and XX0140) (the "**PAC Accounts**"), (f) two (2) legacy accounts established prior to the transition to payroll at BoAML (Acct No. XX7115) for employees to cash checks held at BNYM (Acct No. XX4017) and at BoAML (Acct No. XX1675) (the "**Legacy Payroll Accounts**"), (g) one (1) account that was used to hold funds from PG&E Corp.'s Commercial Paper Program held at Citi (Acct No. XX9167) (the "**CP Account**" and together with the Deutsche Bank Bond Accounts, the U.S Bank Escrow Accounts, the Retiree Benefit Trust Accounts, the Asbestos Medical Reserve Account, the PAC Accounts, and the Legacy Payroll Accounts, the "**Specialty Accounts**"), and (h) fourteen (14) dormant accounts with no activity or *de minimis* balances (the "**Dormant Accounts**").

The Debtors maintain robust controls relating to the Cash Management System. The Cash Management System is overseen by personnel working in the Banking and Money Management ("**B&MM**") division of the Utility's treasury department (the "**Treasury Department**"). B&MM

1 manages all aspects of the Cash Management System, providing services that include cash positioning,
2 cash concentration, wire transfers, automated clearing house (“**ACH**”) transfers, tax payments, and the
3 issuance of short-term debt and purchase or redemption of investments, as well as managing bank
4 accounts for certain Non-Debtor Affiliates and Subsidiaries. On a daily basis, B&MM prepares a cash
5 summary that reflects the cash position after incoming and outgoing payments (via cash, wire transfer,
6 ACH, or check), including short-term debt and short-term investment purchases or redemptions.
7 Although certain recurring electronic payments are made automatically, disbursements by wire transfer
8 require dual approval, and disbursements by check are reconciled before they clear. In preparing the
9 daily cash summary, B&MM conducts a review of cash account balances, confirms that all manual
10 wire transfers have been properly authorized, and determines whether all investments are in line with
11 the Debtors' short-term investment policy (the “**Short-Term Investment Policy**”). Under the
12 oversight of each of the Debtors’ Controller, corporate accounting reconciles all Bank Account
13 balances against the Debtors’ books and records on a monthly basis. Various levels of authorizations
14 are required for the release of disbursements, which are determined by the size and type of the
15 disbursement.

16 As explained in further detail below, the Cash Management System is generally comprised of
17 four (4) different types of accounts: (a) collection accounts into which cash and other receivables
18 generated from the Debtors' operations are deposited (collectively, the “**Collection Accounts**”), (b)
19 concentration accounts into which cash is automatically swept from the various Collection Accounts
20 on a daily basis (collectively, the “**Concentration Accounts**”), (c) disbursement accounts for
21 designated disbursements (collectively, the “**Disbursement Accounts**”), and (d) the Specialty
22 Accounts. An average of approximately \$81.6 million in receipts and \$86.0 million in disbursements
23 flows through the Cash Management System per banking day. A diagram illustrating the general
24 movement of cash through the Cash Management System is annexed as Exhibit B to the Cash
25 Management Motion.

26 Given the complexity of the Debtors’ operations and the volume of transactions processed
27 through the Cash Management System each day, maintaining the Cash Management System in its
28

current state is crucial to the Debtors' continued operations. Any disruption to the Cash Management System would unnecessarily and significantly disrupt the Debtors' operations, which may result in power outages or other service disruptions to the Debtors' customers, and may impede the successful administration of these Chapter 11 Cases.

A. Collection Accounts

1. Utility Collection Accounts

As part of its daily operations, the Utility collects cash, checks, wire transfers, ACH payments, and credit card and debit card payments from customers and certain third parties. As described below, these funding sources flow into the Utility Master Concentration Account (as defined below) through nine (9) depository accounts (the "**Utility Depository Accounts**"). When the Utility is in receipt of proceeds from non-recurring funding sources such as tax refunds, debt issuances, and rebates issued by regional service operators and/or independent system operators, such proceeds are deposited directly into the Utility Master Concentration Account (as defined below).

a) Customer Depository Accounts

The Utility maintains five (5) Utility Depository Accounts (each a "**Utility Customer Depository Account**") that process customer payments. Two (2) Utility Customer Depository Accounts (Acct Nos. XX5477 and XX7822) are held at BNYM, one (1) account (Acct No. XX1958) is held at Citi, one (1) account (Acct No. XX0817) is held at BoAML, and one (1) account (Acct No. XX5581) is held at Union Bank. The BNYM, BoAML, and Citi Utility Customer Depository Accounts only accept electronic payments posted through online and mobile payment channels and customer ACH debits. The Union Bank Utility Customer Depository Account collects cash and check payments that are either mailed to the Utility or made directly at the Utility's local offices. All of the Utility Customer Depository Accounts, except for the Union Bank Account, are zero balance accounts, meaning they do not carry a cash balance at the end of each business day. The funds in the Citi and BoAML Utility Customer Depository Accounts are swept into the Citi Utility Concentration Account and BoAML Utility Concentration Accounts (each as defined below), respectively, on a daily basis, where the funds ultimately flow into the Utility Master Concentration Account. The BNYM Utility

Customer Depository Accounts are swept into the Utility Master Concentration Account on a daily basis.

b) Utility Campground Collection Accounts

The Utility also maintains two (2) Utility Depository Accounts (the “**Utility Campground Depository Accounts**”) that process payments from customers that use campgrounds owned by the Utility. One (1) Utility Campground Depository Account is held at U.S. Bank (Acct No. XX2311) and one (1) Utility Campground Depository Account is held at BoAML (Acct No. XX2302).

c) Non-Energy Collection Account

The Utility also maintains one (1) Utility Depository Account to collect funds from certain non-energy related revenue sources held at Citi (Acct No. XX2901).

d) Outside Collections Accounts

In the ordinary course of business, the Utility contracts with third-parties to collect on customer accounts that have fallen into delinquency. The proceeds of such activities are deposited into a Utility Customer Depository Account held at Citi (Acct No. XXX2316) (the “**Utility Outside Collection Account**”). The Utility Outside Collection Account is a zero balance account and is swept into the Citi Utility Concentration Account on a daily basis.

2. PG&E Corp. Collection Accounts

As PG&E Corp.’s primary asset is its equity interest in the Utility, it does not maintain any third-party collection accounts.

B. Concentration Accounts²

1. Utility Concentration Accounts

The Utility maintains three (3) accounts where it concentrates and collects cash from its various Depository Accounts (collectively, the “**Utility Concentration Accounts**”): (a) one (1) primary concentration account with BNYM (Acct No. XX9994) (the “**Utility Master Concentration Account**”); (b) one (1) customer deposit concentration account with BoAML (Acct No. XX3212) (the

² Prior to the Petition Date, the Utility issued commercial paper in the ordinary course of business to cover short-term liquidity needs (the “**Commercial Paper Program**”). Citi served as the issuing and payment agent with respect to issuances and redemptions of commercial paper under the Commercial Paper Program. The Commercial Paper Program is not currently active and the Debtors are not currently seeking relief to continue the Commercial Paper Program at this time.

1 “**BoAML Utility Concentration Account**”); and (c) one (1) customer deposit concentration account
2 with Citi (Acct No. XX0901) (the “**Citi Utility Concentration Account**”). The Utility funds its
3 business operations and related expenditures from the revenues and funds that flow through the Utility
4 Concentration Accounts, including payments of principal and interest on account of the Utility's
5 prepetition debt and intercompany payments made to StanPac (as defined below), Gill Ranch (as
6 defined below), and PG&E Corp. (pursuant to the PG&E Corp. CSA). The Utility Master
7 Concentration Account serves as the Utility’s main centralized operating account into which receipts
8 and customer payments are ultimately deposited from the Utility Customer Depository Accounts and
9 from which disbursements are made throughout the Cash Management System as necessary.
10 Historically, the proceeds of financings and draws on the Utility’s \$3 billion prepetition unsecured
11 revolving credit facility were deposited directly into the Utility Master Concentration Account. As of
12 the date hereof, such facility had approximately \$35 million of undrawn capacity. Additionally, from
13 time to time, excess funds in the Utility Master Concentration Account at the close of market may be
14 invested by B&MM on an overnight basis until the following business day, in accordance with the
15 Debtors’ Short-Term Investment Policy, which is discussed in further detail below.

16 Funds in the BoAML Utility Customer Depository Account are automatically swept into the
17 BoAML Utility Concentration Account on a daily basis. The funds in each of the Citi Utility
18 Customer Depository Account and the Citi Utility Outside Collections Depository Account are
19 automatically swept into the Citi Utility Concentration Account on a daily basis. Funds in the BoAML
20 Utility Concentration Account and Citi Utility Concentration Account are manually drawn down to the
21 Utility Master Concentration Account on a daily basis. The Utility Campground Depository Accounts
22 are manual swept into the Utility Master Concentration Account on a periodic basis.

23 2. PG&E Corp. Concentration Accounts

24 PG&E Corp. concentrates and collects its cash in one primary account with BNYM (Acct No.
25 XX9023) (the “**PG&E Corp. Master Concentration Account**”). PG&E Corp. funds its business
26 operations and related expenditures from the revenues and funds that flow through the PG&E Corp.
27 Master Concentration Account, including payments of principal and interest on account of PG&E’s
28 prepetition debt and intercompany payments made to the Utility pursuant to the PG&E Corp. CSA.

The PG&E Corp. Master Concentration Account serves as PG&E Corp.'s main centralized operating account into which funds are ultimately deposited from transfers from the Utility pursuant to the PG&E Corp. CSA and from which disbursements are made throughout the Cash Management System as necessary.

Historically, the proceeds of financings and draws on PG&E Corp.'s \$300 million prepetition unsecured revolving credit facility were deposited directly into the PG&E Corp. Master Concentration Account. As of the date hereof, the revolving credit facility is fully drawn. Additionally, from time to time, excess funds in the PG&E Corp. Master Concentration Account at the close of market may be invested by B&MM on an overnight basis until the following business day, in accordance with the Debtors' Short-Term Investment Policy, which is discussed in further detail below.

C. Disbursement Accounts

1. Utility Disbursement Accounts

The Utility uses the funds in the Utility Master Concentration Account to fund its ongoing operations through nine (9) disbursement accounts (collectively, the "**Utility Disbursement Accounts**"). All of the Utility Disbursement Accounts are zero balance accounts. On a daily basis, the Utility projects its disbursement obligations and funds the Utility Disbursement Accounts accordingly.

The following is a brief summary of the various Utility Disbursement Accounts.

- **Vendor Disbursement Account.** Two (2) disbursement accounts at BNYM (Acct Nos. XX9978 and XX9990) are designated to fund nearly all operating expenses and capital expenditures related to the Utility's business operations, including all third party vendor, supplier payments and customer payments as well as employee expense reimbursements.
- **BoAML Payroll Disbursement Accounts.** One (1) disbursement account at BoAML (Acct No. XX7115) is used to fund employee payroll, which is funded from the BoAML Concentration Account.
- **Disability Disbursement Account.** The Utility maintains an account at BNYM (Acct No. XX8544) dedicated to making distributions to employee participants in the Utility's short-term disability plan.
- **Customer Refund and Rebate Accounts.** The Utility maintains two (2) additional disbursement accounts at BNYM (Acct Nos. XX3044 and XX3532) which distribute refunds, rebates, and reimbursements to the Utility's customers.
- **RBC Currency Exchange Account.** The Utility maintains a disbursement account

with RBC (Acct No. XX0446) to facilitate purchases of natural gas from Canadian entities that only accept payment in Canadian dollars.

- **Gill Ranch Operating Account.** As discussed in more detail below, the Utility maintains an operating account for the Gill Ranch natural gas storage facility at BNYM (Acct No. XX4122).
- **Land Drafts Account.** The Utility maintains a disbursement account with BNYM (Acct No. XX0143) to issue checks in connection with health care and injury claims incurred by individuals and with the Utility's land management activities.

2. PG&E Corp. Disbursement Accounts

PG&E Corp. uses the funds in the PG&E Corp. Master Concentration Account to fund its ongoing operations through five (5) disbursement accounts (collectively, the "**PG&E Corp. Disbursement Accounts**"). All of the PG&E Corp. Disbursement Accounts are zero balance accounts. On a daily basis, PG&E Corp. projects its disbursement obligations and funds the PG&E Corp. Disbursement Accounts accordingly. The following is a brief summary of the various PG&E Corp. Disbursement Accounts.

- **Vendor Disbursement Account.** One (1) disbursement account at BNYM (Acct No. XX4558) is designated to fund nearly all operating expenses and capital expenditures related to PG&E Corp's operations, including all third-party vendor and supplier payments.
- **Payroll Disbursement Accounts.** One (1) disbursement account at BNYM (Account No. XX9946) (the "**PG&E Corp. Payroll Funding Account**") and two (2) payroll disbursement accounts at BoAML (Acct Nos. XX7981 and XX7107), with one utilized for checks and the other for direct deposit payments, each of such accounts is funded from the PG&E Corp. Payroll Funding Account.
- **Union Bank Payroll Account.** PG&E Corp. maintains one (1) payroll account at Union Bank of California (Acct No. XX9557) to comply with certain state law requirements.

D. Intercompany Transactions

In the ordinary course of business, the Debtors maintain business relationships among themselves and with the Non-Debtor Affiliates and Subsidiaries, which result in intercompany receivables and payables (the "**Intercompany Transactions**"). The various categories of Intercompany Transactions are summarized in further detail below. The Debtors maintain records of all transfers and, therefore, can ascertain, trace, and account for all Intercompany Transactions, and will continue to do so during these Chapter 11 Cases. If the Intercompany Transactions were to be

1 discontinued, the Cash Management System and related administrative controls would be disrupted to
2 the detriment of the Debtors and all stakeholders. Accordingly, pursuant to the Cash Management
3 Motion, the Debtors are seeking authority to continue the Intercompany Transactions and make any
4 prepetition payments related thereto.

5 **1. The PG&E Corp. CSA**

6 The Utility and PG&E Corp. are parties to the PG&E Corp. CSA. Under the terms of the
7 PG&E Corp. CSA, PG&E Corp. provides certain corporate services to the Utility, including, among
8 other things, management staffing, strategic planning, and investor relations support (the “**PG&E**
9 **Corp. Affiliate Services**”). From time to time, PG&E Corp. also contributed certain equity securities
10 to the Utility, which the Utility distributed to its employees in accordance with its share-based
11 employee incentive plans (the “**PG&E Corp. Equity Contributions**”). The Utility and PG&E Corp.
12 also share certain corporate services and allocate the relative costs of such services and expenses
13 between each other, including, without limitation, accounting and audit functions, money management
14 and investment services, payroll administration, legal, governance, and public relations (the “**Shared**
15 **Services**”). Furthermore, the Utility funds certain of PG&E Corp.’s operating expenses, including,
16 among other things, the purchase of insurance (the “**Corp. Expenses**”). The intercompany obligations
17 and related transfers that arise under the PG&E Corp. CSA are governed by CPUC Decisions 96-11-
18 017 and 97-12-088, as well as certain other CPUC-approved tariffs, and are generally subject to CPUC
19 oversight. PG&E Corp. invoices the Utility on a monthly basis for reimbursement of the PG&E Corp.
20 Affiliate Services, the Utility’s allocation of the Shared Services, including the costs incurred by
21 PG&E Corp. for the purchase of any associated goods during the preceding month, and, if applicable,
22 the value of any PG&E Corp. Equity Contributions ultimately distributed to the Utility’s employees
23 (collectively, the “**Corp. CSA Claims**”). Likewise, the Utility invoices PG&E Corp. on a monthly
24 basis for reimbursement of the costs of Shared Services allocated to PG&E Corp., including the costs
25 of any associated goods, as well as PG&E Corp.’s allocated share of the Corp. Expenses that were
26 incurred during the preceding month (collectively, the “**Utility CSA Claims**”). Corp. CSA Claims are
27 paid via wire transfer directly out of the Utility Disbursement Account XX9978 (rather than book
28 entry) and must be paid within 30 days of receipt of invoice. Similarly, Utility CSA Claims are paid

1 via wire transfer directly out of the PG&E Corp. Disbursement Account XX4558 (rather than book
2 entry) and must be paid within 30 days of receipt of invoice. During the 12-month period prior to the
3 Petition Date, the monthly average of Corp. CSA Claims that the Utility owed to PG&E Corp. was
4 approximately \$13.8 million, and that PG&E Corp. owed to the Utility was approximately \$1.8
5 million.

6 2. Non-Debtor Affiliates' and Subsidiaries' Continuing Services Agreements

7 The Utility is party to shared services arrangements with certain Non-Debtor Affiliates and
8 Subsidiaries, including the following agreements: (a) that certain *Continuing Services Agreement*
9 between the Utility and PG&E Corporation Support Services, Inc., dated Oct. 15, 1999, (b) that certain
10 *Continuing Services Agreement* between the Utility and Pacific Energy Capital IV, LLC, dated July 27,
11 2010, (c) that certain *Continuing Services Agreement* between the Utility and PCG Capital, Inc., dated
12 March 1, 2011, (d) that certain *Continuing Services Agreement* between the Utility and PG&E
13 Corporation Support Services II, Inc., dated April 16, 2007, (e) that certain *Continuing Services*
14 *Agreement* between the Utility and Certain Subsidiaries, including Eureka Energy Company, Natural
15 Gas Corporation of California, and Pacific Energy Fuels Company, dated March 28, 2008, and (f) that
16 certain *Continuing Services Agreement* between the Utility and Eureka Energy Company, dated
17 February 23, 2009 (collectively, the “**Utility Non-Debtor CSAs**”).

18 PG&E Corp. has also entered into shared services arrangements with certain Non-Debtor
19 Affiliates and Subsidiaries, including the following agreements: (a) that certain *Continuing Services*
20 *Agreement* between PG&E Corp. and PG&E Corporation Support Services, Inc., dated Oct. 13, 1999
21 and (b) that certain *Continuing Services Agreement* between PG&E Corp. and PG&E Corporation
22 Support Services II, Inc., dated April 13, 2007 (collectively, the “**PG&E Corp. Non-Debtor CSAs**”
23 and, together with the Utility Non-Debtor CSAs, the “**Non-Debtor CSAs**”).

24 The Non-Debtor CSAs provide for the exchange of certain corporate services between the
25 Debtors and the applicable Non-Debtor Affiliates and Subsidiaries (the “**Non-Debtor Shared**
26 **Services**”). These Non-Debtor Shared Services are relatively *de minimis* and include, but are not
27 limited to, joint purchasing of third-party services and goods as well as shared services related to joint
28 corporate oversight, governance, support systems and personnel, to the extent such shared services

1 conform to requirements of CPUC Decision 97-12-088. On an annual basis, the net cash impact on the
2 Debtors with respect to amounts owed by the Debtors to the Non-Debtor Affiliates and Subsidiaries
3 and to the Debtors by the Non-Debtor Affiliates and Subsidiaries is effectively neutral. As of the
4 Petition Date, the Debtors estimate that they owe approximately \$500,000 on account of Non-Debtor
5 Shared Services.

6 **3. Standard Pacific Gas Line**

7 The Utility holds an 86% ownership interest in Standard Pacific Gas Line, Inc. (“**StanPac**”).
8 StanPac owns approximately 55 miles of natural gas pipelines located in Contra Costa County and the
9 greater Sacramento area. The Utility operates StanPac and regularly incurs related operating expenses
10 and capital costs (the “**StanPac Costs**”). Pursuant to that certain *System Management and Operating*
11 *Agreement*, dated March 28, 1996, among the Utility, StanPac, and Chevron Pipeline Company (the
12 “**StanPac Operating Agreement**”), the Utility invoices StanPac for the StanPac Costs on a monthly
13 basis. Under the StanPac Operating Agreement, the Utility is obligated to fund its proportional,
14 allocated share of certain non-capital expenses, including taxes (the “**StanPac Non-Capital Costs**”),
15 on a monthly basis or at such time that such StanPac Non-Capital Costs come due. In the ordinary
16 course of business, the Utility wires an amount equal to its allocated share of the previous month’s
17 StanPac Non-Capital Costs directly to StanPac. During the 12-month period prior to the Petition Date,
18 the monthly average of StanPac Non-Capital Costs that the Utility paid to StanPac was approximately
19 \$400,000. To maintain its pipeline connections to the intrastate and interstate natural gas pipeline grid,
20 it is critical that the Utility continue paying the StanPac Costs and StanPac Non-Capital Costs in the
21 ordinary course. As of the Petition Date, the Utility estimates that it owes approximately \$400,000 on
22 account of StanPac Costs and Stanpac Non-Capital Costs. and that approximately \$400,000 of that
23 amount will become due and payable within thirty (30) days after the Petition Date.

24 **4. Gill Ranch Project**

25 The Utility owns a 25% ownership interest in an underground natural gas storage facility (the
26 “**Gill Ranch Project**”) at Gill Ranch, located near Fresno, California, with a capacity of approximately
27 20 billion cubic feet. The other 75% of the Gill Ranch Project is owned by Gill Ranch Storage, LLC
28 (“**Gill Ranch LLC**”), the operator of the Gill Ranch Project, which, in turn, is owned by Norwest

1 Natural Gas. The Gill Ranch Project is linked to the Utility's natural gas mainline transmission
2 system, allowing it to serve customers throughout California. Pursuant to that certain *Joint Project*
3 *Agreement*, dated January 31, 2018, between Gill Ranch LLC and the Utility, and that certain *Operator*
4 *Agreement*, dated January 31, 2008, between Gill Ranch LLC and the Utility (collectively, the "**Gill**
5 **Ranch Agreements**"), the Utility is obligated to fund its proportionate, allocated share of operating
6 costs, capital expenses, and certain other non-capital expenses for the Gill Ranch Project on a monthly
7 basis (the "**Gill Ranch Costs**"). To maintain access to its emergency natural gas reserves it is critical
8 that the Utility continue paying the Gill Ranch Costs in the ordinary course. Pursuant to the Gill
9 Ranch Agreements, and in the ordinary course of business, the Utility deposits an amount equal to its
10 allocated share of the previous month's Gill Ranch Costs into an account maintained by the Utility and
11 held at BNYM (Acct. No. XX4122). The funds in such account are used by Gill Ranch LLC, as
12 operator, to develop, operate and manage the Gill Ranch Project in accordance with approved
13 programs and budgets. During the 12-month period prior to the Petition Date, the monthly average of
14 Gill Ranch Costs that the Utility owed in connection with the Gill Ranch Project was approximately
15 \$200,000. As of the Petition Date, the Utility estimates that it owes approximately \$200,000 on
16 account of Gill Ranch Costs and that approximately \$200,000 of that amount will become due and
17 payable within thirty (30) days after the Petition Date.

18 The Cash Management System is similar to those commonly employed by other large corporate
19 enterprises in which transfers between related entities are tracked as Intercompany Transactions. At
20 any point in time, there may be outstanding amounts due and owing between the Debtors themselves
21 as well as between the Debtors and their Non-Debtor Affiliates and Subsidiaries, all of which are
22 recorded and documented as Intercompany Transactions.

23 It is my understanding based upon discussions with counsel, that the Debtors do not require the
24 Court's approval to continue entering into and performing under the Intercompany Transactions
25 because the Debtors enter into and perform under Intercompany Transactions "in the ordinary course
26 of business." Furthermore, as stated above, transfers that take place pursuant to the PG&E Corp. CSA
27 are subject to CPUC oversight. The Intercompany Transactions between PG&E Corp. and the Utility
28

are integral to their ongoing operations and to providing reliable utility services to their customers. As previously stated, the Intercompany Transaction between the Debtors and the Non-Debtor Affiliates and Subsidiaries are relatively *de minimis*.

In addition, prepetition payments of amount owing with respect to StanPac, the Gill Ranch Project, and the Joint Infrastructure Projects will assure the ongoing operation of those ventures, that the Debtors continue to receive certain basic services on an uninterrupted basis, and allow the Debtors to maintain their investment in such ventures. The Debtors also intend to continue making all post Petition Date payments relating to those ventures in the ordinary course of business.

E. Joint Infrastructure and Co-Ownership Projects

In the operation of its gas delivery and power distribution business, the Utility's infrastructure often interfaces with third-party equipment, including various gas pipeline and electric transmission interconnections. In some instances, certain pipelines, facilities, and transmission infrastructure are jointly owned by the Utility and one or more third-parties (the "**Joint Infrastructure Projects**") and, in some cases, are maintained to comply with regulatory and compliance requirements. The Joint Infrastructure Projects are typically governed by contractual arrangements between the Utility and the applicable third-party that provide for the scope of each party's obligations, including obligations to operate and maintain the infrastructure, contribute capital, and/or pay for services. During the 12-month period prior to the Petition Date, the monthly average that the Utility paid in connection with the Joint Infrastructure Projects was *de minimis* and the monthly average that the Utility received in connection with Joint Infrastructure Projects was approximately \$600,000. As of the Petition Date, the Utility estimates that any amounts owed on account of the Joint Infrastructure Projects are *de minimis*. The Debtors seek authority to pay such amounts, including any amounts relating to the period prior to the Petition Date, as they come due in the ordinary course of business.

F. Short-Term Investment Policy

The Short-Term Investment Policy, a copy of which is annexed as Exhibit C to the Cash Management Motion, provides guidance for the Debtors to sweep excess funds in the Utility Master Concentration Account and the PG&E Corp. Master Concentration Account on an overnight basis. The Debtors move excess funds from those accounts to brokerage accounts held at BNYM (Acct No.

1 XX98400 for the Utility and Acct No. XX18400 for PG&E Corp). The amounts invested pursuant to
2 the Short-Term Investment Policy vary on a daily basis. Pursuant to the Short-Term Investment
3 Policy, (i) investments are limited to highly marketable, interest-earning securities with stable market
4 values and maturities of 12 months or less, and (ii) the Debtors must sufficiently assess the credit
5 rating for parent companies of entities issuing securities prior to investing in those securities.³ The
6 objective of the Short-Term Investment Policy is to achieve the best available yield while ensuring
7 safety and preservation of principal and maintaining adequate liquidity to meet cash flow requirements.
8 Investments made pursuant to the Short-Term Investment Policy are subject to multiple internal
9 controls which require, among other things, that only designated employees may make investments
10 pursuant to the Short-Term Investment Policy, all investments must be in compliance with the
11 Sarbanes–Oxley Act of 2002, financial institutions must send confirmations of investment transactions
12 directly to persons or departments responsible for recording cash transactions, and monthly investment
13 statements must be reconciled to the Debtors’ general ledger accounts. Typically, the following types
14 of investments are approved pursuant to the Short-Term Investment Policy: (i) money market mutual
15 funds, (ii) bank-related securities, (iii) U.S. government and government-sponsored securities, (iv)
16 repurchase agreements, (v) corporate debt securities, and (vi) state and local government obligations.
17 During the pendency of the Chapter 11 Cases, the Debtors will limit investments to U.S. government
18 and government-sponsored securities that are backed by the full faith and credit of the United States.

19 It is my understanding based upon discussions with counsel that section 345(a) of the
20 Bankruptcy Code governs a debtor’s deposit and investment of cash during a chapter 11 case and
21 authorizes such deposits or investments as “will yield the maximum reasonable net return on such
22 money, taking into account the safety of such deposit or investment.” I further understand that, for
23 deposits or investments that are not “insured or guaranteed by the United States or by a department,
24 agency, or instrumentality of the United States or backed by the full faith and credit of the United
25 States,” section 345(b) of the Bankruptcy Code requires that the debtor obtain from the “entity with

26 ³ In addition, B&MM invests certain funds held by the Utility in the Voluntary Disability Plan
27 Insurance (“**VPDI**”) brokerage account (Acct No. XX48400 held at BNYM), which account is
28 maintained to comply with certain state requirements relating to employee contributions to the
Debtors’ VPDI.

1 which the money is deposited or invested a bond in favor of the United States [that is] secured by the
2 undertaking of a[n adequate] corporate surety . . . unless the court for cause orders otherwise.”

3 It is my understanding based upon discussions with counsel that, in chapter 11 cases such as
4 these, strict adherence to the requirements of section 345(b) of the Bankruptcy Code would be
5 inconsistent with the value-maximizing purpose of chapter 11 by unduly hampering a debtor’s ability
6 under section 345(a) to invest money such “as will yield the maximum reasonable net return on such
7 money.” It is my understanding based upon discussions with counsel that, here, the Debtors satisfy
8 both the procedural and substantive requirements necessary to obtain a waiver of section 345(b) of the
9 Bankruptcy Code.

10 First, as set forth above, twenty-one of the thirty Primary Bank Accounts are maintained at
11 banks that have been approved by the U.S. Trustee as “authorized depositories” in accordance with the
12 UST Guidelines. Although BNYM and RBC are not U.S. Trustee-designated authorized depositories,
13 BNYM is a highly rated, nationally chartered bank, and both are subject to supervision by national
14 banking regulators. BNYM is the world’s largest custodian bank and asset servicing company with
15 \$1.9 trillion in assets under management and \$33.3 trillion in assets under custody as of December
16 2017. RBC holds consolidated assets of over \$832 billion, operates in 44 countries, and has been
17 approved as a qualifying foreign banking organization by the Federal Reserve Board, thereby
18 subjecting it to the same comprehensive regulatory regime that governs the operations of U.S.
19 domestic banking entities. To the extent that the accounts at RBC and BNYM are not in technical
20 compliance with the requirements of section 345, pursuant to the Cash Management Motion, the
21 Debtors seek to have such requirements waived so as to allow BNYM and RBC to accept and hold
22 cash in accordance with the Debtors’ prepetition practices. Furthermore, the Short-Term Investment
23 Policy, as modified by the Debtors, is in compliance with section 345(b) as the modified Short-Term
24 Investment Policy limits investments to those that are either “insured or guaranteed by the United
25 States or by a department, agency, or instrumentality of the United States or backed by the full faith
26 and credit of the United States.”

Moreover, there is cause to warrant a waiver of the requirements of section 345(b) of the Bankruptcy Code. It is my understanding based upon discussions with counsel, that courts consider the “totality of the circumstances” in determining whether “cause” exists, with particular regard to the following factors: (i) the sophistication of the debtor’s business; (ii) the size of the debtor’s business operations; (iii) the amount of investments involved; (iv) the bank ratings (Moody’s and Standard and Poor) of the financial institutions where debtor in possession funds are held; (v) the complexity of the case; (vi) the safeguards in place within the debtor’s own business of insuring the safety of the funds; (vii) the debtor’s ability to reorganize in the face of a failure of one or more of the financial institutions; (viii) the benefit to the debtor; (ix) the harm, if any, to the estate; and (x) the reasonableness of the debtor’s request for relief from section 345(b) requirements in light of the overall circumstances of the case.

It is my understanding based upon discussions with counsel that, here, “cause” exists because, among other things: (i) all of the Banks holding significant balances are highly rated, reputable banks that are subject to supervision by national banking regulators; (ii) the Debtors retain the right to close accounts with the Banks and establish new bank accounts as needed; (iii) the cost associated with satisfying the requirements of section 345(b) is needlessly burdensome to the Debtors and their estates; and (iv) the process of satisfying such requirements would lead to needless inconvenience and inefficiencies in the management of the Debtors’ business. The benefits of a waiver would far outweigh any potential harm to the estates from noncompliance with section 345(b). The complex nature of the Debtors’ businesses requires numerous bank accounts. Moreover, a bond secured by the undertaking of a corporate surety would be prohibitively expensive (if such a bond could be obtained at all). Furthermore, based on its experience opening new bank accounts, the Debtors estimate that it would take months to create a new suite of bank accounts to service their business. I respectfully submit that the costs of disruption to the business by having to close dozens of accounts far outweighs the risks of the Debtors continuing to maintain their historic Bank Accounts during the administration of the Chapter 11 Cases. Accordingly, I respectfully submit that the Court should waive the requirements of section 345(b) in these Chapter 11 Cases on a final basis. However, if the U.S.

1 Trustee needs additional time to consider the waiver, in the alternative, the Court should, on an interim
2 basis, extend the Debtors' time to comply with the requirements of section 345(b) of the Bankruptcy
3 Code for sixty (60) days while the Debtors discuss the issue with the U.S. Trustee and any statutory
4 committees appointed in these Chapter 11 Cases.

5 **G. Bank and Payment Processing Fees**

6 In the ordinary course of business, the Debtors incur and pay, honor, or allow to be deducted
7 from the appropriate Bank Accounts, certain service charges, repayments on account of ordinary
8 course ACH credit extensions (e.g., in connection with the Banks' processing of refunds or mistaken
9 payments into Utility Depository Accounts), and other related fees, costs, and expenses charged by the
10 Banks (collectively, the "**Bank Fees**"). To the extent the balance in the applicable Bank Account
11 decreases below a threshold amount established by the applicable Bank, the Debtors may incur
12 additional fees for sending and receiving wire transfers, clearing checks, ACH transfers, and other
13 transactions. In addition, the Debtors pay certain payment processing fees to third parties relating to
14 payment support and processing for customers making payments by credit card, debit card, and ACH
15 bank payment (collectively, the "**Payment Processing Fees**"). The Debtors currently pay
16 approximately \$140,000 per month on account of Bank Fees and approximately \$200,000 per month
17 on account of Payment Processing Fees. As of the Petition Date, the Debtors estimate that
18 approximately \$140,000 in Bank Fees and \$400,000 in Payment Processing Fees are accrued and
19 unpaid and will become due in the first thirty (30) days after the Petition Date. The Debtors seek
20 authority to pay such amounts, including any amounts relating to the period prior to the Petition Date,
21 as they come due in the ordinary course of business.

22 Payment of the Bank Fees is in the best interests of the Debtors, their estates, and all parties in
23 interest as it will prevent any disruption to the Cash Management System. It is my understanding
24 based upon discussion with counsel that because the Banks may have setoff rights with respect to the
25 prepetition Bank Fees, payment of the prepetition Bank Fees should not affect other parties in interest
26 and would merely be a matter of timing. In addition, payment of the Payment Processing Fees will
27 prevent any disruption to the Debtors' ability to collect payments from their customers that pay utility
28 bills via credit card, debit card, or ACH bank payment.

H. The Debtors' Existing Business Forms and Checks

In the ordinary course of business, the Debtors issue checks from time to time and use a variety of correspondence and business forms, including, but not limited to, letterhead, purchase orders, and invoices (collectively, the “**Business Forms**”). To minimize the expense to the Debtors' estates associated with developing and/or purchasing entirely new forms or otherwise complying with Bankruptcy Local Rule 2015-1(a), the delay in conducting business prior to obtaining such forms, and the confusion of suppliers and other vendors, pursuant to the Cash Management Motion, the Debtors seek authority to continue using their Business Forms substantially in the forms used immediately prior to the Petition Date, without reference therein to the Debtors' status as “Debtor in Possession.” The Debtors do not believe that any prejudice will be suffered by any party of this relief is granted.

Strict compliance with the UST Guidelines, which require reprinting such documents, would unnecessarily increase the Debtors' expenses and would risk confusing the Debtors' customers, suppliers, and employees. Accordingly, the Debtors believe it is appropriate to continue to use all Business Forms as such forms were in existence prior to the commencement of these Chapter 11 Cases, without any reference to the Debtors' current status as debtors in possession.

The Cash Management System constitutes an ordinary-course and essential business practice providing significant benefits to the Debtors, including the ability to control corporate funds, ensure the maximum availability of funds when and where necessary, reduce borrowing costs and administrative expenses by facilitating the movement of funds, and ensure the availability of timely and accurate account balance information consistent with prepetition practices. The use of the Cash Management System has historically reduced the Debtors' expenses by enabling the Debtors to use funds in an optimal and efficient manner. Accordingly, the continued use of the Cash Management System without interruption is vital to the Debtors' business operations and the success of these Chapter 11 Cases.

Further, in these Chapter 11 Cases, strict enforcement of the UST Guidelines would severely disrupt the Debtors' ordinary financial operations by reducing efficiencies, increasing administrative burdens, and creating unnecessary expenses. As stated, the Debtors maintain approximately 108 Bank Accounts as part of the Cash Management System. If the Debtors were required to close these Bank

Accounts and open new debtor-in-possession accounts, the Debtors would be forced to reconstruct the Cash Management System in its entirety. This reconstruction would be impractical and cost prohibitive in an enterprise like the Debtors. B&MM, including accounting and bookkeeping employees, would need to focus their efforts on immediately opening new bank accounts and working to establish proper cash flow controls, thereby diverting them from their daily responsibilities during this critical juncture of the Debtors' Chapter 11 Cases. Many accounts could not be replaced in time to effectively continue the Debtors' businesses. Even if possible, the opening of new bank accounts would increase operating costs, and the delays that would result from opening new accounts, revising cash management procedures, and redirecting payments would negatively impact the Debtors' ability to operate their business while establishing these new arrangements, to the detriment of all parties in interest.

The Debtors' transition into chapter 11 will be significantly smoother and more orderly, with minimum disruption and harm to the Debtors' operations, if the Bank Accounts are continued following the Petition Date with the same account numbers. By preserving business continuity and avoiding the disruption and delay to the Debtors' collection and disbursement procedures that would necessarily result from closing the Bank Accounts and opening new accounts, all parties in interest, including employees, vendors, customers, and creditors will be best served. The confusion that would otherwise result, absent the relief requested in the Cash Management Motion, would ill-serve the Debtors' rehabilitative efforts.

Accordingly, for the reasons set forth herein, I respectfully submit that the relief requested in the Cash Management Motion is necessary and appropriate, is in the best interests of their estates and all parties in interest, is necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

IV. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(A), 363(B), AND 507 AND FED. R. BANKR. P. 6003 AND 6004 FOR INTERIM AND FINAL AUTHORITY TO (I) PAY PREPETITION WAGES, SALARIES, AND OTHER COMPENSATION AND BENEFITS; (II) MAINTAIN EMPLOYEE BENEFIT PROGRAMS; AND (III) PAY RELATED ADMINISTRATIVE OBLIGATIONS (THE "EMPLOYEE WAGES AND BENEFITS MOTION")

Pursuant to the Employee Wages and Benefits Motion, the Debtors are seeking interim and final authority to (i) pay, in their sole discretion, all prepetition amounts required under or related to the Debtors' Compensation Obligations, Employee Incentive and Retention Programs, Reimbursable Expenses, Withholding Obligations, Payroll Maintenance Fees, Severance Programs, Employee Benefits Programs, and Supplemental Workforce Obligations (each as defined below, and together with any Employee Program Administrative Obligations (as defined below), the "**Prepetition Employee Obligations**"); (ii) continue their prepetition compensation practices, programs, benefits, and policies for their Employees (as defined below) (collectively, the "**Employee Wage and Benefits Programs**") as such were in effect as of the date hereof and as such may be modified, amended, or supplemented from time to time in the ordinary course of the Debtors' businesses, and (iii) honor and pay any related administrative fees, costs, expenses, and obligations arising thereunder (collectively, the "**Employee Program Administrative Obligations**"). Further, the Debtors request that the Court authorize and direct all applicable Banks to receive, process, honor, and pay all checks issued or to be issued and electronic funds transfers requested or to be requested relating to the Prepetition Employee Obligations.

The following chart sets forth the various categories and approximate outstanding amounts of the Prepetition Employee Obligations⁴ that the Debtors are seeking authority to pay pursuant to the Employee Wages and Benefits Motion within the first thirty days of the Chapter 11 Cases (the "**Interim Period**") and on a final basis. Each of the categories of Prepetition Employee Obligations, including the related Employee Program Administrative Obligations, is defined and discussed in further detail below.

Category	Approx. Amount Seeking to Pay During Interim Period	Approx. Amount Seeking to Pay on Final Basis
Compensation Obligations	\$61,200,000	\$61,200,000
Incentive and Retention Program Obligations (excluding 2018 STIP)	\$970,000	\$35,970,000

⁴ Amounts related to the Employee Program Administrative Obligations are included in the relevant categories in the chart below and also described below.

Reimbursable Expenses	\$3,800,000	\$3,800,000
Withholding Obligations ⁵	\$24,330,000	\$24,330,000
Payroll Maintenance Fees	\$75,000	\$75,000
Severance Obligations	\$630,000	\$820,000
Benefits Program Obligations ⁶	\$73,600,000	\$95,792,000
Supplemental Workforce Obligations	\$25,000,000	\$35,000,000

As discussed above, the Utility is one of the nation's largest utility companies, providing electric and natural gas service to approximately 16 million customers in northern and central California. Together, the Debtors employ approximately 24,000 Employees,⁷ including approximately 14,300 Employees who are paid on an hourly basis and approximately 9,000 Employees who earn salaries.⁸ Of the Debtors' approximately 24,300 Employees, approximately 15,200 Employees are covered under collective bargaining agreements (the "**Represented Employees**") with the local chapters of three (3) labor unions: (i) the International Brotherhood of Electrical Workers ("**IBEW**"), (ii) the Engineers and Scientists of California ("**ESC**"), and (iii) the Service Employees International Union ("**SEIU**") (collectively, the "**Unions**"). The Debtors' Employees perform a variety of critical functions, including operating and maintaining the Debtors' generation units, natural gas facilities, and distribution and transmission assets; performing customer outreach and other critical customer-facing services; collecting payments from the Debtors' customers; and ensuring the safety and reliability of the Debtors' operations. Employees are also responsible for administering PG&E's clean energy, low income and energy efficiency programs as well as administering payroll, benefits, facilities and information systems and technology required to support the operational employees.

⁵ Substantially all of this amount represents amounts withheld from Employee compensation for withholding taxes and the Debtors' payroll tax obligations.

⁶ As noted below, a significant portion of this amount (approximately \$30 million) represents amounts withheld from or contributed by Employees.

⁷ For purposes of the Employee Wages and Benefits Motion, "**Employees**" means all persons entitled to, as of the Petition Date, compensation, benefits, reimbursement, and any other similar payments as a consequence of their being employed by either Debtor. The term "Employees" does not include any Supplemental Workers (as defined below).

⁸ The Debtors' Employees reside in nearly every county in California, as well as in thirty-six other states including, Arizona, Pennsylvania, Texas, and Virginia.

1 It is my understanding based upon discussions with counsel that the Debtors have twelve (12)
2 Employees who constitute “insiders” for purposes of section 503 of the Bankruptcy Code (the
3 “**Insiders**”).

4 In addition to their Employees, the Debtors use the services of approximately 1,900
5 independent contractors and, through various staffing agencies (the “**Staffing Agencies**”), temporary
6 workers to assist with their operations (each, a “**Supplemental Worker**” and, collectively, the
7 “**Supplemental Workforce**” and, together with the Employees, the “**Personnel**”). Members of the
8 Supplemental Workforce, who complement the efforts of the Debtors’ Employees, primarily perform
9 specialized tasks that, for various reasons, the Employees cannot perform on their own, including, for
10 example, certain maintenance and repair work on transmission lines following weather-related events.

11 The Debtors’ Personnel are the lifeblood of the Debtors’ businesses—without them, the
12 Debtors’ operations would come to a halt. Due to the highly technical, specialized, and regulated
13 nature of the electricity generation and energy transmission and distribution industry, the Debtors must
14 maintain a uniquely skilled workforce, whose knowledge base is critical to the Debtors’ businesses and
15 ongoing operations and, as a result, to the success of the Chapter 11 Cases. Further, all of the Debtors’
16 customers, located throughout an approximately 70,000-square-mile service area in northern and
17 central California, rely on the Debtors’ Personnel to receive electricity and natural gas service.
18 Without the Debtors’ Personnel, the Debtors’ customers in northern and central California would not
19 receive essential utility services.

20 **A. Compensation Obligations**

21 The Debtors pay their Employees salaries, wages, and other compensation, including overtime
22 pay, for the Employees’ services (collectively, the “**Compensation Obligations**”). Employees who
23 are paid wages on an hourly basis are paid bi-weekly in arrears, and the Debtors’ salaried Employees
24 receive payment on a monthly basis on approximately the 23rd day of each month for services
25 rendered from the 1st to the 23rd of that month as well as for services yet to be rendered for the
26 remainder of the month. Approximately 14,300 Employees are paid hourly and approximately 9,000
27 Employees are paid a monthly salary. Although the vast majority of the Debtors’ Employees elect to
28

1 have their compensation deposited directly into their bank accounts through an electronic funds
2 transfer, approximately 700 Employees are paid by check.

3 On average, the Debtors pay approximately \$297,400,000 each month on account of
4 Compensation Obligations. As of the Petition Date, the Debtors estimate that the aggregate amount of
5 accrued, but unpaid, Compensation Obligations totals approximately \$61,200,000, all of which will
6 come due during the Interim Period. On a per-Employee basis, the outstanding prepetition
7 Compensation Obligations average approximately \$4,400, below the statutory caps imposed by
8 sections 507(a)(4) and 507(a)(5) of the Bankruptcy Code. The Debtors do not believe that payment of
9 the prepetition Compensation Obligations will result in any Employee receiving more than \$12,850 on
10 account thereof. Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to
11 pay the Compensation Obligations in the ordinary course of business, including all prepetition amounts
12 relating to such obligations.

13 **B. Employee Incentive and Limited Retention Programs**

14 The Debtors maintain certain incentive and retention programs⁹ (collectively, the “**Employee**
15 **Incentive and Retention Programs**” and, all amounts required under or relating thereto, the
16 “**Incentive and Retention Program Obligations**”) to motivate and reward certain Employees. The
17 Employee Incentive and Retention Programs include (i) the Short-Term Incentive Plan, (ii) the
18 Rewards and Recognition Program, (iii) the Temporary Assignment Program, (iv) the Service Award
19 Program, and (v) the Limited Retention Programs (each as defined below).¹⁰ The Employee Incentive
20 and Retention Programs are critical components of Employees’ general compensation structure and
21 bring substantial value to the Debtors’ estates. The incentive programs align eligible Employees’
22 interests with those of the Debtors by linking awards under the incentive programs to the overall

23 ⁹ Unless otherwise specified, programs and practices mentioned in Employee Wages and Benefits
24 Motion benefit Employees of both Debtors, although they may be maintained or administered by only
one of the Debtors.

25 ¹⁰ The Debtors also maintain an annual long-term incentive program (“**LTIP**”) for certain Employees.
26 At this time, the Debtors are not seeking authority to make any cash payments under such programs,
27 and are not seeking authority to implement an LTIP and grant awards for 2019. Earned and previously
28 granted equity awards under existing LTIPs will continue to be provided (but no cash payments or
dividend payments thereon). In addition, the Debtors reserve the right to seek Court approval to
implement a key employee retention plan, a key employee incentive plan, and a short term incentive
plan for 2019.

1 performance and efficiency of the Debtors' operations. The Limited Retention Programs include a
2 discrete program at the department level and a CPUC-approved retention program for Employees at
3 the Debtors' Diablo Canyon Nuclear Plant.

4 Pursuant to the Employee Wages and Benefits Motion (except with respect to the Insiders), the
5 Debtors seek authority to pay obligations in connection with the Employee Incentive and Retention
6 Programs in the ordinary course of business (except as otherwise provided in the Employee Wages and
7 Benefits Motion), including all prepetition amounts on account of such obligations, and to continue to
8 administer the Employee Incentive and Retention Programs as set forth herein in the ordinary course of
9 business. Each of the Employee Incentive and Retention Programs is described in further detail below.
10 Although Insiders of the Debtors have historically been eligible to receive payments or awards under
11 certain of the Employee Incentive and Retention Programs, the Debtors are not requesting authority at
12 this time to make any payments under any Employee Incentive and Retention Programs to the Insiders.

13 **1. Short-Term Incentive Plan**

14 The Debtors maintain a broad-based program (the "**Short-Term Incentive Plan**") through
15 which certain Employees are eligible for annual cash awards based on the Debtors' achievement of
16 certain enterprise-wide performance targets and such Employees' individual performance. Awards
17 under the Short-Term Incentive Plan (collectively, "**STIP Awards**") are based on a formula that is
18 unique to each Employee and that takes into account each Employee's base pay rate, job position, and
19 individual performance, as well as the Debtors' performance as a whole. The STIP Awards are an
20 integral component of the compensation of Employees who participate in the plan and upon which
21 they rely on an annual basis. The Debtors believe that the STIP Awards incentivize strong Employee
22 performance and are critical to ensuring that Employees stay motivated and reach higher performance
23 standards, which in turn maximizes the value of the Debtors' business for all parties in interest.

24 For fiscal year 2018, approximately 14,000 Employees were eligible to receive STIP Awards at
25 a total aggregate expected cost to the Debtors of approximately \$130,000,000 for 2018 performance,
26 which is to be paid in March, 2019. The average individual STIP Award for 2018 is expected to be
27 approximately \$13,000, and individual STIP Awards are expected to range from approximately \$5,000
28 to \$90,000, exclusive of the Insiders. Annually, the Compensation Committee of the PG&E Corp.

1 Board of Directors (the “**Compensation Committee**”) certifies the Debtors’ level of achievement of
2 the enterprise-wide performance targets for the applicable fiscal year, and approves the final STIP
3 score, as well as final STIP Awards. A STIP Award is forfeited if an Employee leaves prior to
4 December 31 of the year in which the STIP Award is earned, unless the Employee is severed without
5 cause or is qualified as a Retiree (as defined below), in which case the person is entitled to a prorated
6 award based on the percentage of the year they were an active Employee.

7 Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to pay
8 Employees the STIP Awards earned for 2018, except that they are not requesting authority to pay STIP
9 Awards to any Insiders or to any officers to the extent earned during the period they were officers.
10 Further, the Debtors are not requesting authority to pay any STIP Awards on an interim basis.
11 Consideration of the relief sought in the Employee Wages and Benefits Motion with respect to the
12 STIP Awards will be deferred to the final hearing on the Employee Wages and Benefits Motion.

13 2. Rewards and Recognition Program

14 The Debtors maintain a program (the “**Rewards and Recognition Program**”) to promote
15 timely recognition of Employees in good standing who have gone above and beyond their normal job
16 responsibilities, such as emergency response or participation in special initiatives outside their regular
17 job duties. Awards under the Rewards and Recognition Program (collectively, “**R&R Awards**”) may
18 be monetary, non-monetary, or both, and are made by the Debtors on a discretionary basis and in
19 discretionary amounts. Non-monetary awards are provided in the form of gift cards. Members of
20 management establish and distribute guidelines for the Rewards and Recognition Program to help
21 ensure consistency throughout the various departments, but R&R Awards are granted on a
22 departmental basis. R&R Awards are subject to the Debtors’ policies and practices, which control the
23 amount of R&R Awards at each level that the leadership of each department may approve. On an
24 annual basis, approximately 6,300 Employees receive R&R Awards at a total cost to the Debtors of
25 approximately \$15,200,000. In 2018, the average R&R Award was approximately \$1,200. R&R
26 Awards are processed through the Debtors’ employee and leadership SAP portal, and can be submitted
27 at any time. The Debtors disburse R&R Awards throughout the year, depending on the department.
28 As of the Petition Date, the Debtors estimate that approximately \$650,000 in value of R&R Awards are

1 outstanding on account of the Rewards and Recognition Program with respect to the prepetition period,
2 all of which will come due during the Interim Period. Pursuant to the Employee Wages and Benefits
3 Motion, the Debtors request authority to pay all R&R Awards, including all prepetition amounts
4 relating thereto.

5 **3. Temporary Assignment Program**

6 The Debtors maintain a program (the “**Temporary Assignment Program**”) to provide awards
7 (collectively, “**Temporary Assignment Awards**”) to Employees who are temporarily transferred to
8 positions in so-called “temporary positions” (the “**Temporary Positions**”). Awards are paid in
9 discretionary amounts based on the eligible Employee’s performance and duration of employment in
10 the Temporary Position. On an annual basis, approximately 350 Employees receive Temporary
11 Assignment Awards at an aggregate cost to the Debtors of approximately \$2,600,000. In 2018, the
12 average Temporary Assignment Award was approximately \$5,400, and individual Temporary
13 Assignment Awards ranged from approximately \$160 to \$28,650. The Debtors generally disburse
14 Temporary Assignment Awards upon Employees’ completion of their placements in Temporary
15 Positions. As of the Petition Date, the Debtors estimate that approximately \$250,000 is outstanding on
16 account of the Temporary Assignment Program, all of which will come due during the Interim Period.
17 Pursuant to the Employee Wages and Benefits Motion, the Debtors request authority to pay all
18 Temporary Assignment Awards, including all prepetition amounts relating thereto.

19 **4. Service Award Program**

20 The Debtors maintain a program (the “**Service Award Program**”) that recognizes Employee
21 service milestones every five years and at retirement for all Employees. Full- or part-time Employees
22 with at least five years of service are eligible to participate and may elect to receive a non-monetary
23 award, such as gift cards and tickets to sporting events and concerts, or to make a donation in an
24 amount determined by the Debtors, to one of the following pre-selected nonprofit organizations:
25 REACH Program, California State Parks Foundation, or the American Red Cross Bay Area Chapter.
26 Eligible Employees select their service award through the Debtors’ service award portal operated by BI
27 Worldwide.
28

1 On an annual basis, approximately 5,300 Employees and Retirees receive awards under the
2 Service Award Program at a total cost to the Debtors of approximately \$850,000. In 2018, the average
3 award ranged from \$43 for those with five years of service to \$419 for those with 25 years or more of
4 service. The Debtors disburse service awards throughout the year. As of the Petition Date, the
5 Debtors estimate that approximately \$70,000 is outstanding on account of the Service Award Program,
6 all of which will come due during the Interim Period. Pursuant to the Employee Wages and Benefits
7 Motion, the Debtors request authority to pay all obligations arising under the Service Award Program,
8 including any prepetition amounts.

9 5. Limited Retention Programs

10 The Debtors maintain a limited retention-based awards program at the departmental level,
11 which provides cash awards to certain key, hard-to-replace Employees to ensure that they continue
12 their employment with the Debtors (the “**Retention Program**”). The Retention Program does not
13 include any Insiders. To receive an award (each, a “**Retention Award**”) pursuant to the Retention
14 Program, an Employee’s manager must articulate a business case explaining, among other things, the
15 need for the award and why that need cannot be met through other means. The Retention Program
16 awards Employees who are identified as key Employees either because they have indicated that they
17 are planning to leave and their job function is critical, or they are identified by the Debtors as key
18 based on a specific work assignment. On an annual basis, approximately 50 Employees receive
19 Retention Awards at a total cost to the Debtors of approximately \$1,200,000. In 2018, the average
20 Retention Award was approximately \$27,000, and Retention Awards ranged from approximately
21 \$2,583 to \$150,000. The Debtors disburse Retention Awards throughout the year. As of the Petition
22 Date, the Debtors estimate that there are no amounts outstanding on account of the Retention Program.

23 The Debtors also maintain a separate retention program for Employees (none of whom are
24 Insiders) at Diablo Canyon Power Plant (“**DCPP**”), the Utility’s nuclear generation facility.
25 Approximately 1,360 Employees are currently participating in the program. The Debtors made a
26 decision not to seek relicensing of the DCPP which will ultimately result in the plant’s closure. The
27 operation of the DCPP will, however, continue for several years and the Debtors need skilled and
28 knowledgeable personnel to operate the plant safely and reliably. In order to incentivize Employees to

1 remain at DCPD, the Debtors proposed a retention plan, which was initially approved by the CPUC in
2 January of 2018 with certain modifications. The California legislature subsequently passed legislation
3 (Public Utilities Code Section 712.7, effective January 1, 2019) requiring the CPUC to approve full
4 funding for the retention program and in December 2018, the CPUC issued a decision approving full
5 funding for the retention program initially proposed (the “**Diablo Canyon Retention Program**”).
6 Pursuant to such legislation, the retention payment percentage was raised from 15% to 25% for each
7 retention plan participant. As a result, in April of 2019, the Debtors will be required to make
8 retroactive payments on account of each DCPD retention plan participant. The Debtors estimate that
9 this retroactive payment will aggregate approximately \$35,000,000. Normal ongoing payments with
10 respect to the program will be made in the Fall of 2019.

11 The Diablo Canyon Retention Program includes a base retention program that is provided to
12 the Debtors’ Employees who satisfy the following criteria: (i) they work in a regular active full-time
13 status at DCPD or solely support DCPD operations, (ii) their job or job functions will be eliminated as a
14 result of the cessation of operations at DCPD, (iii) they work during the entirety of one or both of the
15 commitment periods, and (iv) they sign a base retention program payback agreement. The first
16 commitment period is a four- (4) year commitment of employment which covers years 2016 through
17 2020. The second period is a three- (3) year commitment which covers years 2020 through 2023.
18 Pursuant to the Diablo Canyon Retention Program, eligible Employees will receive a payment equal to
19 25% of the Employee’s base salary plus overtime for each yearly segment of the commitment period.
20 The Debtors make each yearly segment payment between October 1 and December 31 of each year.
21 At the end of the Employee’s assignment at DCPD, the Employee will have the option to select to
22 remain on the payroll for six months while conducting a job search for internal employment. If the
23 Employee is not successful in finding internal employment, their final severance payment (under the
24 DCPD Severance Program, discussed below) will be reduced by the amount the Employee was paid
25 during the six months. Employees who must relocate to secure an employment opportunity will be
26 reimbursed for moving expenses to a maximum of \$5,000. As stated, no amounts related to the Diablo
27 Canyon Retention Program are payable during the Interim Period. Because, among other things, the
28

CPUC has authorized full funding for this program, the Debtors intend to continue the program in the ordinary course.

C. Reimbursable Expenses

In the ordinary course of business, the Debtors reimburse their Employees for reasonable and customary expenses incurred in the scope of their employment (collectively, the “**Employee Reimbursable Expenses**”). The Employee Reimbursable Expenses can include those expenses related to business travel, relocation, certain meals, fitness memberships, and communications (e.g., certain cell phone expenses), depending on the position, department, and seniority of the Employee.

In connection with this practice, the Debtors provide certain Employees with credit cards (the “**Employee Credit Cards**”) to be used for paying certain Employee Reimbursable Expenses. The Debtors’ vendor, U.S. Bank, requires that the Debtors pre-fund the accounts for the Employee Credit Cards.

Employees also use the Debtors’ expense reimbursement portal operated by Concur Expense Management to seek reimbursement for expenses charged to Employee Credit Cards and for business-related purchases that are not charged to an Employee Credit Card.

In addition to the Employee Credit Cards, certain Employees are provided with purchasing cards (the “**Employee Purchasing Cards**” and, together with the Employee Credit Cards, the “**Employee Cards**”) to pay for certain emergency expenses, meals for large groups of Employees, and expenses related to various operational materials and services necessary for the Debtors’ operations. The Debtors’ vendor, U.S. Bank, also requires that the Debtors pre-fund the accounts for the Employee Purchasing Cards. The Debtors typically fund the accounts on a bi-weekly basis and maintain approximately \$20 million on account with U.S. Bank to cover obligations relating to the Employee Cards. All Employee Cards issued by the Debtors to their Employees have pre-funded account limits and detailed restrictions on permissible expenditures.

The Debtors also reimburse the members of their Boards of Directors for expenses incurred in connection with the performance of their duties as directors (collectively with the Employee Reimbursable Expenses, the “**Reimbursable Expenses**”).

1 The Debtors estimate that Reimbursable Expenses aggregate approximately \$17,200,000 per
2 month, including the pre-funded accounts for the Employee Cards. As of the Petition Date, the
3 Debtors estimate that approximately \$3,800,000 is outstanding on account of Reimbursable Expenses,
4 all of which will come due during the Interim Period. Pursuant to the Employee Wages and Benefits
5 Motion, the Debtors seek authority to satisfy all prepetition obligations related to Reimbursable
6 Expenses, including those incurred through the use of Employee Cards, as and when they arise and to
7 continue in the ordinary course the usage of the Employee Cards as described herein.

8 Payment of the Reimbursable Expenses is an exercise of sound business judgment and
9 necessary to facilitate a successful reorganization because any other treatment of would be highly
10 inequitable. Employees and Directors who have incurred Reimbursable Expenses on behalf of the
11 Debtors should not be forced to bear the cost of such expenses personally, especially because the
12 Reimbursable Expenses were incurred for the Debtors' benefit, in the course of their employment or
13 service, and with the understanding that they would be reimbursed. In addition, as stated, substantial
14 obligations with respect to the Employee Cards have been pre-funded prior to the Petition Date to
15 cover charges.

16 **D. Withholding Obligations**

17 As employers, the Debtors are required by law to withhold from their Employees' salaries,
18 wages, and other compensation amounts related to federal, state, and local income taxes, as well as
19 Social Security and Medicare taxes (collectively, the "**Withholding Taxes**") and to remit them to the
20 appropriate taxing authorities (collectively, the "**Taxing Authorities**"). The Debtors also are required
21 to make payments from their own funds on account of Social Security and Medicare taxes and to pay,
22 based on a percentage of gross payroll (and subject to state-imposed limits), additional amounts to the
23 Taxing Authorities for, among other things, state and federal unemployment insurance (collectively,
24 the "**Employer Payroll Taxes**" and, together with the Withholding Taxes, the "**Payroll Tax**
25 **Obligations**"). In the aggregate, the Debtors' monthly Payroll Tax Obligations total approximately
26 \$95,000,000. As of the Petition Date, the Debtors estimate that they owe approximately \$22,000,000
27 on account of Payroll Tax Obligations relating to the prepetition period, all of which will come due
28 during the Interim Period.

1 In the ordinary course of processing payroll for the Employees, the Debtors also may be
2 required by law, in certain circumstances, to withhold from certain Employees' wages amounts for
3 various garnishments, such as tax levies, child support, and other court-ordered garnishments
4 (collectively, the "**Garnishments**"). Each pay cycle, the Debtors withhold Garnishments from
5 applicable Employees' paychecks and remit them to the appropriate authorities or entities. On
6 average, the Debtors withhold approximately \$1,000,000 in Garnishments per month from Employees'
7 wages and salaries. As of the Petition Date, the Debtors estimate that they currently have withheld
8 approximately \$300,000 on account of Garnishments that have not been remitted.

9 Further, at Employees' request, the Debtors withhold certain amounts from Employees' wages
10 and salaries for transmittal to third parties, including for the following categories: (i) the payment of
11 dues that Represented Employees owe to the Unions (collectively, the "**Union Obligations**"), (ii)
12 amounts to be transferred via a third-party non-profit administrator, YourCause LLC, to charitable
13 organizations selected by Employees pursuant to the Campaign for the Community (collectively, the
14 "**Community Campaign Obligations**"), (iii) amounts to be transferred to various employee-funded
15 political action committees ("**PAC**"), as selected by the Employee (collectively, the "**PAC**
16 **Obligations**"), and (iv) amounts to be transferred to the Pacific Service Employees Association, a not-
17 for-profit mutual benefit organization for dues and other benefits ("**PSEA Obligations**" and together
18 with Union Obligations, Community Campaign Obligations, and PAC Obligations, the "**Employee**
19 **Elective Deduction Obligations**" and together with the Payroll Tax Obligations and Garnishments,
20 the "**Withholding Obligations**").

21 The Debtors withhold the Employee Elective Deduction Obligations from participating
22 Employees' paychecks and remit them to the applicable recipient as described above. On average, the
23 Debtors withhold approximately \$3,000,000 in Employee Elective Deduction Obligations each month
24 from participating Employees' wages and salaries. As of the Petition Date, the Debtors estimate that
25 they are currently withholding but have not yet remitted approximately \$2,000,000 on account of
26 Employee Elective Deduction Obligations. Additionally, the Debtors also pay approximately \$16,000
27 per month in administrative fees to YourCause LLC. The Debtors estimate that, as of the Petition
28

1 Date, they owe approximately \$32,000 in such administrative fees, all of which will come due during
2 the Interim Period.

3 Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to continue
4 remitting and paying the Withholding Obligations (whether pre- or postpetition) to the appropriate
5 authorities and entities in the ordinary course of business and to pay any administrative fees with
6 respect to the Withholding Obligations.

7 **E. Payroll Maintenance Fees**

8 To manage the efficient processing and payment of the various obligations described above, the
9 Debtors rely on the services of certain third-party vendors (collectively, the “**Payroll Maintenance**
10 **Vendors**”), including, but not limited to, Concur, ADP, Inc. (“**ADP**”), and TALX Corp. (“**TALX**”).
11 As discussed above, the Debtors rely on Concur to administer their expense reimbursement portal.
12 The Debtors use ADP to administer wage garnishments and TALX for employment verification. The
13 Debtors pay each of the Payroll Maintenance Vendors on a monthly basis for the aforementioned
14 services (the “**Payroll Maintenance Fees**”).

15 On average, the Debtors pay Payroll Maintenance Vendors approximately \$75,000 in the
16 aggregate, on a monthly basis on account of Payroll Maintenance Fees. As of the Petition Date, the
17 Debtors estimate that they owe approximately \$75,000 on account of Payroll Maintenance Fees
18 relating to the prepetition period, all of which will come due during the Interim Period. Failure to pay
19 the Payroll Maintenance Fees could lead to delayed disbursement of payments to the Debtors’
20 Employees, to the detriment of the Employees and the Debtors’ operations. In addition, replacing any
21 of the Payroll Maintenance Vendors would take a significant amount of time and expense and result in
22 a disruption to normal employee payment practices. Accordingly, pursuant to the Employee Wages
23 and Benefits Motion, the Debtors seek authority to pay Payroll Maintenance Fees in the ordinary
24 course of business, including all prepetition amounts on account of such Payroll Maintenance Fees.

25 **F. Severance Programs and Obligations**

26 In the ordinary course of business, the Debtors maintain three severance programs for the
27 benefit of all Employees except Represented Employees. Severance for Represented Employees is
28 covered by their respective labor agreements (the “**Represented Employee Severance Obligations**”).

1 The three programs are: (i) the DCPD Severance Program, (ii) the Senior Officer Severance Program,
2 and (iii) the General Severance Program (each as defined below, and collectively, the “**Severance**
3 **Programs**”). Although Employees are eligible to receive benefits under the Severance Programs, the
4 level of benefits that a particular eligible Employee receives varies.

5 Under the Senior Officer Severance Program, the forty (40) eligible Employees are entitled,
6 upon a qualifying termination, to receive (i) a lump-sum payment equal to one year’s base pay and
7 target STIP payout; (ii) a lump-sum payment which is the equivalent of 18-months of COBRA
8 coverage to cover transition expenses, which may include items such as medical benefits and life
9 insurance coverage; and (iii) career counseling services, which include outplacement services for the
10 length of their severance consideration period (the “**Senior Officer Severance Obligations**”). Absent
11 further order of the Court, and, based upon discussions with counsel, consistent with section 503 of the
12 Bankruptcy Code, the Debtors will not make any severance payments to the Insiders.

13 Pursuant to the General Severance Program, eligible Employees, upon termination, are entitled
14 to receive benefits which vary based on the Employees’ experience and title. Eligible Employees who
15 are in non-director positions are eligible to receive: (i) a lump-sum payment equal to three weeks’ pay
16 per year of credited service, with a 12-week minimum and a 52-week maximum; (ii) a lump-sum
17 payment of \$9,000 to cover transition expenses, which may include items such as medical benefits and
18 life insurance coverage; and (iii) career counseling services, which include outplacement services for
19 the length of their severance consideration period. Eligible Employees in director positions are entitled
20 to receive (i) a lump-sum payment equal to three weeks’ base pay per year of credited service, with a
21 12-week minimum and a 52-week maximum, plus a similar ratable share of their STIP Award; (ii) a
22 lump-sum payment of \$16,650 to cover transition expenses, which may include items such as medical
23 benefits and life insurance coverage; and (iii) career counseling services, which include outplacement
24 services for the length of their severance consideration period (collectively, the “**General Severance**
25 **Obligations**”).

26 Employees at DCPD are covered by a separate severance program (the “**DCPD Severance**
27 **Program**”). The DCPD Severance Program is similar in all respects to the General Severance Program
28

1 except for the maximum lump-sum payment, which is 78 weeks (the “**DCPP Severance Obligations**”
2 and together with the Senior Officer Severance Obligations and the General Severance Obligations, the
3 “**Severance Obligations**”). The Debtors have not made any payments on account of the DCPP
4 Severance Program in the past two years and do not anticipate making any payments under this
5 program in 2019.

6 In addition to the foregoing, less than ten (10) Employees whose positions are eliminated
7 because of automated meter reading are eligible to select a transitional leave program where they
8 receive the same applicable General Severance Obligations but such obligations are payable on an
9 ongoing basis for the designated time period.

10 The Debtors have substantial business justification for continuing the Severance Programs in
11 the ordinary course as requested in the Employee Wages and Benefits Motion. The Debtors’ ability to
12 provide terminated Employees with their severance is critical to maintaining positive Employee morale
13 and loyalty. Increased instability in the Debtors’ workforce will only undermine the Debtors’
14 reorganization efforts and their long-term viability. The Severance Programs have been designed with
15 a specific focus on the utility industry which is highly specialized and less saturated, which may result
16 in challenges for Employees seeking new employment in the same or other industries. Additionally, as
17 a condition to receiving benefits under the Severance Programs, the Debtors require each severed
18 Employee to release all potential claims against the Debtors. As stated, no authority for severance
19 payments to Insiders is being sought pursuant to the Employee Wages and Benefits Motion.

20 Pursuant to the Employee Wages and Benefits Motion, the Debtors are seeking authority
21 (except as indicated above) to continue the Severance Programs and to pay all Severance Obligations
22 and all Represented Employee Severance Obligations in the ordinary course of business, whether
23 arising prior to or after the Petition Date. On average, the Debtors pay approximately \$500,000 each
24 month on account of Severance Obligations. Additionally, the Debtors pay approximately \$70,000
25 each month on account of Represented Employee Severance Obligations. As of the Petition Date,
26 because the Severance Programs provide for largely lump sum payments, the Debtors estimate that
27 there are no amounts outstanding under the DCPP Severance Program or the Senior Officer Severance
28

1 Program. The Debtors also estimate that there is approximately \$600,000 owed under the General
2 Severance Program, all of which is payable during the Interim Period. Additionally, as of the Petition
3 Date, the Debtors estimate that they owe approximately \$220,000 on account of existing Represented
4 Employee Severance Obligations, and expect that approximately \$30,000 in Represented Employee
5 Severance Obligations will be required to be paid during the Interim Period.

6 **G. Employee Benefits Programs**

7 In the ordinary course of business, the Debtors maintain various employee benefits plans,
8 policies, and programs (collectively, the “**Employee Benefits Programs**” and, all amounts required
9 and payable under or relating thereto, the “**Benefits Program Obligations**”). These Employee
10 Benefits Programs generally fall into the following categories: (i) Paid Leave, (ii) Health Insurance
11 Programs, (iii) Retirement Programs, (iv) Life and Disability Insurance Programs, and (v) Work/Life
12 Benefits (each as defined and discussed in further detail below). Pursuant to the Employee Wages and
13 Benefits Motion, the Debtors request authority to continue the Employee Benefits Programs and to pay
14 all Benefits Program Obligations in connection therewith in the ordinary course of business, whether
15 related to the period prior to or after the Petition Date.

16 **1. Paid Leave**

17 In the ordinary course of business, the Utility maintains a policy for providing Employees paid
18 leave (collectively, “**Paid Leave**”) in the form of paid vacation (“**Vacation**”) and paid holidays¹¹
19 (“**Paid Holidays**”) as well as certain other items, such as sick pay (“**Sick Time**”). The Utility provides
20 Vacation to most Employees, which may be used for any reason. Vacation generally accrues at
21 specified rates up to a maximum amount based on an Employee’s length of service and whether an
22 Employee is a Represented Employee. For most Utility Employees, the maximum yearly Vacation is
23 thirty (30) days per year.

24 PG&E Corp. maintains a separate Paid Leave policy for its Employees (including all
25 management and administrative and technical Employees, which includes paid time off (“**PTO**”) and
26 paid holidays.

27 ¹¹ Paid holidays include twenty four (24) hours of paid leave in the form of “floating holidays” in
28 addition to 10 specific holidays.

1 Although significant accrued Vacation, PTO, and Paid Holidays exist as of the Petition Date,
2 Employees only are entitled to cash payouts for their accrued and unused Vacation, PTO and Paid
3 Holidays upon termination of their employment or on an annual basis pursuant to a lump-sum payment
4 each February for unused Vacation or PTO that exceeds the maximum amounts that Employees are
5 permitted to carry over into the next calendar year. Pursuant to the Employee Wages and Benefits
6 Motion, the Debtors seek authority to pay any “cash out” amounts due or that may come due with
7 respect to accrued but unused Vacation, PTO, Paid Leave or Paid Holidays and to continue
8 administering such policies and programs and making payments thereunder in the ordinary course of
9 business.

10 In addition, the Debtors also provide certain other forms of Paid Leave to Employees in the
11 form of:

- 12 (a) leave under the Family and Medical Leave Act and other similar statutes; and
13 (b) other leave for personal reasons, many of which are required by law, including statutory
14 sick leave, workers’ compensation leave, missed work time in the ordinary course of
business for bereavement leave, jury duty or court attendance, and time spent voting.

15 These other forms of Paid Leave do not involve incremental cash outlays beyond standard
16 payroll obligations, and, therefore, no amounts are outstanding as of the Petition Date.

17 The Debtors’ Paid Leave policies are broad-based programs upon which all Employees have
18 come to depend and are an integral element of their compensation. Continuation of the Paid Leave
19 policies in accordance with the Debtors’ prior practice is essential to maintaining positive Employee
20 morale during the Chapter 11 Cases and maximizing the value of the Debtors’ business enterprise.

21 As of the Petition Date, the Debtors estimate that they owe approximately \$6,200,000 on
22 account of excess unused Vacation, all of which will be required to be paid during the Interim Period.

23 2. Health Insurance Programs

24 Employees are eligible to participate in a number of health insurance programs, including the
25 Medical Plans, the Dental Plan, the Vision Plan, the Health Account, and the Flexible Spending
26 Accounts (each as defined below and, collectively, the “**Health Insurance Programs**”). The Debtors
27 also subsidize or continue to provide health benefits to certain former Employees, including health
28 benefits provided in accordance with the Consolidated Omnibus Budget Reconciliation Act of 1985

1 (“**COBRA**”). Each of the Health Insurance Programs is described in further detail below. Pursuant to
2 the Employee Wages and Benefits Motion, the Debtors seek authority to pay all obligations in
3 connection with the Health Insurance Programs and to pay all obligations in connection with COBRA
4 in the ordinary course of business, including all prepetition amounts on account of such obligations,
5 and to continue to administer and pay all amounts payable under the Health Insurance Programs and
6 under COBRA in the ordinary course of business.

7 **a) Medical Plans**

8 The Debtors offer medical and prescription-drug insurance coverage (the “**Medical Plans**”) to
9 Employees. The Medical Plans primarily are administered by Blue Cross of California, Inc. d/b/a
10 Anthem Blue Cross (“**Anthem**”) and Kaiser Foundation Health Plan, Inc. (“**Kaiser**”). Certain
11 prescription drug benefits are administered by Express Scripts Holding Company (“**Express Scripts**”) and
12 Willis Towers Watson (“**WTW**”), and certain mental health benefits are administered by Beacon
13 Health Options, Inc. (“**Beacon**” and, together with Anthem, Kaiser, and Express Scripts, the “**Medical**
14 **Plan Administrators**”). The coverage provided to eligible Employees under the Medical Plans differs
15 depending on the level of coverage an Employee elects to receive, and monthly healthcare premiums
16 differ depending on the Medical Plan in which an Employee is enrolled and whether the Employee has
17 dependents covered by the applicable plan. The total cost of the Medical Plans is approximately
18 \$33,200,000 per month, of which approximately \$2,600,000 is covered by Employee contributions.

19 The Debtors self-insure their portion and, after accounting for Employee contributions, spend
20 approximately \$29,400,000 per month on medical and prescription-drug claims asserted under the
21 Medical Plans (collectively, the “**Medical Claims**”). The Debtors make payments on account of such
22 Medical Claims on a weekly basis. Employees typically submit Medical Claims forty-six (46) days
23 after incurring the relevant expenses, and, thus, the Debtors are unable to ascertain with certainty the
24 prepetition amounts due and outstanding on account of the Medical Claims. Based on historical
25 trends, the Debtors estimate that, as of the Petition Date, they owe approximately \$53,000,000 on
26 account of prepetition Medical Claims, approximately \$32,000,000 of which will come due during the
27 Interim Period.

1 The Debtors also maintain an account for each Employee who is enrolled in one of the Medical
2 Plans (each, a “**Health Account**”). Health Accounts do not have cash values; rather, Health Accounts
3 hold “credits” that can be redeemed to cover out-of-pocket medical expenses incurred by Employees.
4 In essence, each credit in an Employee’s Health Account represents a commitment by the Debtors to
5 reimburse such Employee for out-of-pocket expenses up to a certain dollar amount. On January 1 of
6 each year, the Debtors contribute the equivalent of \$500 per Employee or \$1,000 per family of credits
7 to each eligible Employee’s Health Account. If eligible Employees participate in health screenings
8 and/or verify that they are not tobacco users, the Debtors contribute up to \$500 per Employee or
9 \$1,000 per family of additional credits for each of these activities to each eligible Employee’s Health
10 Account. The full balance of credits remaining in an Employee’s Health Account is carried over into
11 the next calendar year. Employees redeem the credits in their Health Accounts by submitting a claim
12 with the Debtors. The Health Accounts for 2019 have been funded.

13 The Debtors also pay approximately \$1,900,000 per month in administrative fees payable to the
14 Medical Plan Administrators. The Debtors estimate that, as of the Petition Date, they owe
15 approximately \$1,900,000 in such administrative fees, all of which will come due during the Interim
16 Period.

17 Additionally, the Debtors pay monthly administrative fees of approximately \$315,000 to
18 Mercer Benefits Administration, which manages the eligibility- and enrollment-related processes for
19 the Medical Plans, as well as the Dental Plan and the Vision Plan (as discussed below). The Debtors
20 estimate that, as of the Petition Date, they owe approximately \$315,000 in such administrative fees, all
21 of which will come due during the Interim Period.

22 **b) Dental Plan**

23 The Debtors offer dental insurance coverage (the “**Dental Plan**”) to Employees. The Dental
24 Plan is administered by Delta Dental of California (the “**Dental Plan Administrator**”). The total cost
25 of the Dental Plan is approximately \$2,700,000 per month, of which approximately \$80,000 is covered
26 by Employee contributions.

27 The Debtors self-insure their portion and make payments on account of claims asserted under
28 the Dental Plan (the “**Dental Claims**”) on a weekly basis. Dental Claims are typically submitted

1 approximately twenty (20) days after the relevant expense is incurred, and, thus, the Debtors are unable
2 to ascertain with certainty the prepetition amounts due and outstanding on account of the Dental
3 Claims. Based on historical trends, the Debtors estimate that, as of the Petition Date, they owe
4 approximately \$2,100,000 on account of prepetition Dental Claims, all of which will come due during
5 the Interim Period.

6 In addition, the Debtors pay administrative fees of approximately \$120,000 per month to the
7 Dental Plan Administrator. The Debtors estimate that, as of the Petition Date, they owe the Dental
8 Plan Administrator approximately \$120,000 in such administrative fees, all of which will come due
9 during the Interim Period.

10 **c) Vision Plan**

11 The Debtors offer vision insurance coverage (the “**Vision Plan**”) through a plan administered
12 by Vision Service Plan, Inc. (the “**Vision Plan Administrator**”). The Debtors spend approximately
13 \$300,000 per month on claims asserted under the Vision Plan (collectively, the “**Vision Claims**”). The
14 Debtors make payments on account of the Vision Claims on a monthly basis. Vision Claims are
15 typically submitted approximately fifteen (15) days after the relevant expense is incurred, and, thus,
16 the Debtors are unable to ascertain with certainty the prepetition amounts due and outstanding on
17 account of the Vision Claims. Based on historical trends, the Debtors estimate that, as of the Petition
18 Date, they owe approximately \$240,000 on account of prepetition Vision Claims, all of which will
19 come due during the Interim Period.

20 The Debtors pay administrative fees of approximately \$30,000 per month to the Vision Plan
21 Administrator. The Debtors estimate that, as of the Petition Date, they owe approximately \$30,000 in
22 such administrative fees, all which will come due during the Interim Period.

23 **d) Flexible Spending Accounts**

24 In addition to offering the medical benefits described above, the Debtors offer Employees the
25 option to enroll in certain flexible spending accounts, including a healthcare flexible spending account
26 and a dependent care flexible spending account (collectively, the “**Flexible Spending Accounts**”).
27 Participating Employees can make pre-tax payroll contributions (the “**Flexible Spending Account**
28 **Contributions**”) to the Flexible Spending Accounts up to the maximum amounts permitted by the

1 Internal Revenue Service. Employees then may use the proceeds of Flexible Spending Accounts to
2 cover the cost of eligible health care expenses incurred by such Employees and/or their dependents,
3 depending on the Flexible Spending Account in which they are enrolled. Employees who participate
4 in the Flexible Spending Accounts may use such proceeds by, among other means, utilizing a
5 designated debit card provided to participating Employees or submitting claims for reimbursement.

6 The Debtors withhold approximately \$1,000,000 per month from Employees' compensation on
7 account of the Flexible Spending Account Contributions and transfer such amounts to either Wage
8 Works, Inc. or Kaiser Foundation Health Plan Inc. SF (together, the "**Flexible Spending Account**
9 **Administrators**"), depending on the Medical Plan in which an Employee is enrolled. As of the
10 Petition Date, the Debtors estimate that they currently are withholding approximately \$1,000,000 on
11 account of Flexible Spending Account Contributions. Pursuant to the Employee Wages and Benefits
12 Motion, the Debtors seek authority to transfer all withheld amounts and to continue to withhold
13 amounts on account of the Flexible Spending Account Contributions and to transfer such amounts to
14 the Flexible Spending Account Administrators in the ordinary course of business.

15 The Debtors pay administrative fees of approximately \$30,000 per month to the Flexible
16 Spending Account Administrators. The Debtors estimate that, as of the Petition Date, they owe
17 approximately \$30,000 in such administrative fees, all of which will come due during the Interim
18 Period.

19 3. Retirement Programs

20 The Debtors offer various programs to help current Employees and retired Employees
21 ("**Retirees**") to plan for and manage their retirements (collectively, the "**Retirement Plans**"). The
22 Retirement Plans are comprised of the Pension Plan, 401(k) Plan, Retiree Health Care Plan, the
23 Retirement Excess Benefit Plan, the Supplemental Retirement Savings Plan, and Postretirement Life
24 Insurance Plan (each as defined below).¹² Participation in particular Retirement Plans is based on a
25 number of criteria, including the nature of an Employee's job responsibilities and duties, whether an

26 ¹² The Debtors offer Supplemental Executive Retirement Plans ("**SERPs**") and a Defined Contribution
27 Executive Supplemental Retirement Plan ("**DC-ESRP**") for officers and certain key employees of the
28 Debtors and their subsidiaries. The Debtors are not requesting authority at this time to make any
payments pursuant to the SERPs and DC-ESRP.

1 Employee is a Represented Employee, and an Employee's date of hire and length of service. Each of
2 the Retirement Plans is discussed in further detail below. Pursuant to the Employee Wages and
3 Benefits Motion, the Debtors seek authority to pay all obligations in connection with the Retirement
4 Plans in the ordinary course of business, including all prepetition amounts on account of such
5 obligations, and to continue to administer the Retirement Plans in the ordinary course of business.

6 **a) Qualified Defined Benefit Pension Plan**

7 The Utility provides a tax-qualified defined benefit plan for the benefit of all of the Debtors'
8 Employees and Retirees (the "**Pension Plan**"). The assets in the Pension Plan are not assets of the
9 Debtors' estates. Participants in the Pension Plan receive a fixed pension benefit upon retirement
10 (collectively, the "**Pension Obligations**"), in the form of a final average pay benefit or a cash balance
11 benefit. An Employee's final average pay benefit is calculated by utilizing formulas that reflect,
12 among other things, an Employee's length of service, pay, age upon retirement, and the date when
13 retirement benefits begin. The cash balance benefit was added to the Pension Plan on January 1,
14 2013. Employees hired on or after that date participate in the cash balance benefit and Employees
15 hired prior to that date were given a one-time opportunity to irrevocably select to switch from the final
16 average pay benefit to the cash balance benefit on a go-forward basis. For the cash balance benefit, on
17 the last day of each year (or on the date of benefit commencement, if earlier), an Employee's cash
18 balance account is credited with pay credits based on a point system of age plus service and eligible
19 pay during the year. At the end of each calendar quarter, the account is credited with interest credits,
20 based on an average of the 30-year Treasury rates for the three months before the calendar quarter.
21 Additionally, a cash balance participant may elect a lump-sum payout that is eligible for rollover into
22 an Individual Retirement Account or other tax-advantaged employer plan. Cash balance participants
23 may elect to receive their vested benefit when they leave employment, regardless of whether they have
24 attained age 55.¹³ Approximately 23,000 Employees and 4,000 former Employees are enrolled in the
25 Pension Plan, and approximately 26,000 Retirees, previously-deferred pensioners, and beneficiaries
26 receive benefits in connection with the Pension Plan. To fund the Pension Obligations, the Debtors

27
28 ¹³ The availability of the lump sum may be impacted by the chapter 11 filings.

1 contribute, on a quarterly basis, amounts (collectively, the “**Pension Contributions**”) into a trust (the
2 “**Pension Trust**”), from which the Pension Obligations are satisfied.

3 On average, the Debtors make Pension Contributions to the Pension Trust in the amount of
4 approximately \$81,750,000 each fiscal quarter. In addition, the Debtors pay for certain administrative
5 costs associated with the Pension Plan, such as actuarial studies (the “**Pension Administrative**
6 **Costs**”). These costs are approximately \$200,000 per year. On average, approximately \$62,000,000 is
7 paid each month from the Pension Trust on account of Pension Obligations to eligible participants. As
8 of the Petition Date, the Debtors estimate that there will be no amounts outstanding with respect to the
9 Pension Obligations, excluding Pension Administrative Costs.

10 As of the Petition Date, the Debtors are current with respect to the Pension Contributions and
11 the Debtors intend to make future quarterly Pension Contributions as and when they become payable.

12 The Debtors estimate that outstanding Pension Administrative Costs relating to the prepetition
13 period are in the amount of approximately \$20,000, which they seek authority to pay pursuant to the
14 Employee Wages and Benefits Motion

15 **b) 401(k) Plan**

16 The Debtors maintain a qualified defined contribution savings plan for the benefit of most of
17 their Employees (the “**401(k) Plan**”), which is designed to meet the requirements of sections 401(a)
18 and 401(k) of title 26 of the United States Code. The 401(k) Plan is administered by Fidelity
19 Management Trust Company (the “**401(k) Plan Administrator**”). Approximately 22,000 active
20 Employees are enrolled in the 401(k) Plan. Employees who are enrolled in the 401(k) Plan contribute
21 approximately \$25,000,000 per month in the aggregate to the 401(k) Plan, which contributions are
22 withheld by the Debtors from such Employees’ compensation. The Debtors “match” Employees’
23 contributions by contributing \$0.75 per dollar that an Employee contributes, with such “matches”
24 capped at up to either 6% or 8% of an Employee’s gross pay, depending on certain characteristics of
25 the Employee, such as an Employee’s date of hire, Union membership, and their participation in the
26 Pension Plan (the “**401(k) Matching Obligations**”).

27 The Debtors pay approximately \$9,100,000 each month on account of 401(k) Matching
28 Obligations. As of the Petition Date, the Debtors estimate that they owe approximately \$1,400,000 on

1 account of 401(k) Matching Obligations relating to the prepetition period, all of which will come due
2 during the Interim Period.

3 In addition, the Debtors pay administrative fees and independent fiduciary fees of
4 approximately \$140,000 per month to the 401(k) Plan Administrator and Gallagher Fiduciary
5 Advisors, LLC (“**Gallagher**”). The Debtors estimate that, as of the Petition Date, they owe
6 approximately \$140,000 in such administrative fees, all of which will come due during the Interim
7 Period. In addition, the Debtors pay an annual fee of approximately \$90,000 to Financial Engines,
8 which provide employees with access to additional financial planning tools, information, and services
9 to better manage their 401(k) investments. The Debtors estimate that, as of the Petition Date, there
10 will be no amounts outstanding on account of fees to the Financial Engines. Pursuant to the Employee
11 Wages and Benefits Motion, the Debtors seek authority to pay all amounts withheld from Employees’
12 paychecks as contributions to the 401(k) Plan, and all outstanding prepetition 401(k) Matching
13 Obligations and administrative fees.

14 **c) Retiree Health Care Plans**

15 The Debtors offer medical and prescription-drug insurance coverage (the “**Retiree Health**
16 **Care Plans**”) to Retirees who satisfy age and service requirements, which coverage is administered by
17 the Medical Plan Administrators, as well as Blue Cross of California, Inc. d/b/a Anthem Blue Cross
18 (“**Anthem**”) and Kaiser Foundation Health Plan, Inc. (“**Kaiser**”), Blue Shield of California, and
19 Health Net. Certain prescription drug benefits are administered by Express Scripts Holding Company
20 (“**Express Scripts**”), and certain mental health benefits are administered by Beacon. Some of the
21 Debtors’ Obligations under the Retiree Health Care Plans are self-insured, while others are covered by
22 insurance as to which the Debtors pay the premiums. The total cost of the Retiree Health Care Plans is
23 approximately \$12,500,000 per month, of which approximately \$10,000,000 is covered by Retiree
24 contributions, which is deducted from their pension benefit payments. To fund their self-insured
25 portion of the Retiree Health Care Plans, the Debtors contribute, on an annual basis, amounts into a
26 trust (the “**Postretirement Medical Plan Trust**”), from which the costs of the Retiree Health Care
27 Plans are paid. In 2018, the Debtors contributed approximately \$28,300,000 into the Postretirement
28 Medical Plan Trust. The vast majority of the Debtors’ contributions to the Postretirement Medical

1 Plan Trust are made at the end of the calendar year. The money contributed by the Debtors to the
2 Postretirement Medical Plan Trust, the Postretirement Life Insurance Plan Trust, and the Utility Long-
3 Term Disability Plan Trust (as discussed and defined below), is received from ratepayers for the
4 specific purpose of funding the trusts. It is my understanding based upon discussions with counsel that
5 these trusts are segregated funds that do not constitute assets of the Debtors' estates.

6 The medical and prescription-drug claims submitted under the Retiree Health Care Plans
7 (collectively, the "**Retiree Medical Claims**") are funded from the Postretirement Medical Plan Trust.
8 Payments are made from the Postretirement Medical Plan Trust on account of the Retiree Medical
9 Claims on a weekly basis. Retirees typically submit Retiree Medical Claims thirty-seven (37) days
10 after incurring the relevant expenses, and thus the Debtors are unable to ascertain with certainty the
11 prepetition amounts due and outstanding on account of the Retiree Medical Claims. In addition, as
12 stated, the Debtors pay insurance premiums on account of some of the Retiree Health Care Plans
13 (collectively, the "**Retiree Health Care Premiums**"), which are also funded from the Postretirement
14 Medical Plan Trust. Based on historical trends, the Debtors estimate that, as of the Petition Date,
15 approximately \$13,900,000 is outstanding on account of prepetition Retiree Medical Claims and the
16 Retiree Health Care Premiums, \$12,500,000 of which will come due during the Interim Period and all
17 of which will be funded by the funds in the Postretirement Medical Plan Trust. As of the Petition
18 Date, the Debtors' contributions to the Postretirement Medical Plan Trust and insurance premiums
19 related thereto are current.

20 **d) Retirement Excess Benefit Plan**

21 The Debtors provide certain Retirees and Employees whose pension benefit under the Pension
22 Plan is reduced by reason of the application of Section 415 and/or Section 401(a)(17) of the Internal
23 Revenue Code, the ability to participate in a retirement excess benefit plan (the "**Retirement Excess**
24 **Benefit Plan**"). The Retirement Excess Benefit Plan provides participants with the monthly benefit
25 which would be payable under the Pension Plan if the limitation under Section 415 and/or Section
26 401(a)(17) of the Internal Revenue Code had not applied. Currently, ten (10) Retirees (none of whom
27 were officers) are receiving benefits under this plan in an aggregate monthly amount of \$6,000.
28 During the Interim Period, \$6,000 will become payable to such Retirees.

e) **Supplemental Retirement Savings Plan**

The Debtors also maintain Supplemental Retirement Savings Plans (“**SRSP**”) for the benefit of officers and other key Employees. The SRSPs are unfunded deferred compensation plans, which both (1) permit participants to defer certain of their compensation and earn investment returns on those deferred amounts, and (2) allow participants to receive matching amounts that were elected under the 401(k) Plan, but were not provided due to tax code limitations. The SRSP is funded primarily by eligible Employee contributions and by certain amounts funded by the Debtors. The SRSP has approximately 300 active Employee participants (the “**Active Participants**”), and approximately 90 inactive participants, comprised largely of Retirees or those who have been terminated without cause (the “**Inactive Participants**”). Under the SRSP, most distributions are not made until seven months after a participant retires, although minimal distributions may be made while the participant is active. Pursuant to the Employee Wages and Benefits Motion, the Debtors are not seeking authority to make any distributions with respect to the SRSP to currently Inactive Participants. Additionally, no further funds are being contributed to the SRSP by the Debtors.

The balances in the SRSP as to Active Participants aggregate approximately \$29,000,000, of which 85% represents funds contributed directly by the Active Participants. Under the SRSP, no amounts will be paid to Active Participants in 2019 unless any of such participants retire. Assuming the same level of retirements of Active Employees that occurred in 2018, the Debtors estimate that an aggregate of approximately \$2,000,000 would be distributed to Active Employees who retire in 2019, or an average of approximately \$60,000 per person. Based on the fact that 85% of the funds in the SRSP attributable to Active Employees constitutes their contributions, approximately \$51,000 of such average distribution would be comprised of Active Employee contributions. The Debtors seek authority pursuant to the Employee Wages and Benefits Motion to continue the SRSP only for Active Employees on the Petition Date and to make all distributions thereunder. Because the Active Employees are an integral part of the Debtors’ ongoing operations and because most of the funds to be distributed under the SRSP consist of contributions made by the Active Employees, the Debtors believe the relief requested is fair and appropriate. In addition, the Debtors pay for certain administrative costs associated with the SRSP (the “**Retirement Plan Administrative Costs**”). These

1 costs are approximately \$200,000 per quarter. As of the Petition Date, the Debtors estimate that they
2 owe approximately \$200,000 on account of Retirement Plan Administrative Costs, all of which will
3 come due during the Interim Period.

4 **f) Postretirement Life Insurance Plan**

5 The Debtors provide life insurance coverage (the “**Postretirement Life Insurance Plan**”) to
6 Retirees who satisfy an age requirement through Metropolitan Life Insurance Company (the “**Life**
7 **Insurance Administrator**”). All Employees of the Debtors and certain subsidiaries are eligible to
8 receive a life insurance coverage benefit under the Postretirement Life Insurance Plan. For eligible
9 Retirees who have more than fifteen (15) years of service, the Postretirement Life Insurance Plan
10 provides coverage in an amount equal to twelve (12) months of a Retirees’ base salary prior to
11 retirement. Coverage for certain of these Retirees, due to their position at the time of their retirement
12 or the date on which they were promoted to a management position, is capped at \$50,000. Separately,
13 coverage for a small number of these Retirees, who were eligible to make an election prior to 2005, is
14 payable seven months after retirement as a cash lump sum, rather than as life insurance. For eligible
15 Retirees who have less than fifteen (15) years of service, the Postretirement Life Insurance Plan
16 provides coverage of \$8,000. To fund the insurance premiums for the coverage, the Debtors
17 contributed approximately \$8,000 into a trust (the “**Postretirement Life Insurance Plan Trust**”). In
18 addition, in 2018, the Debtors paid directly approximately \$3,200,000 in costs in the form of life
19 insurance premiums for coverage over \$50,000 and life insurance coverage converted to a lump sum
20 payment at retirement per the election of eligible Employees, and fiduciary and compliance costs. As
21 of the Petition Date, the Debtors estimate that approximately \$10,000 is owed in administrative costs
22 with respect to the Postretirement Life Insurance Plan related to the prepetition period, all of which
23 will come due during the Interim Period. It is my understanding based upon discussions with counsel
24 that the Postretirement Life Insurance Plan Trust is a separate trust and is not an asset of the Debtors’
25 estates. Absent further order of the Court, no life insurance coverage will be converted to a lump sum
26 payment at retirement nor will any outstanding lump sum payments be made.

12
4. Life and Disability Insurance Programs

The Debtors offer active Employees life insurance and various programs to aid Employees during periods in which they are physically unable to perform their duties (collectively, the “**Life and Disability Insurance Programs**”), including (i) the Short-Term Disability Plans, (ii) the Supplemental Wage Continuation Plans, (iii) the Long-Term Disability Plan, (iv) the Supplemental Industrial Injury Plan, (v) the Life Insurance Plan, (vi) the AD&D Insurance Plan, (vii) the Voluntary AD&D Plan, and (viii) the Business Travel Insurance Plan (each as defined below). Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to pay all obligations in connection with the Life and Disability Insurance Programs in the ordinary course of business, including all prepetition amounts due on account of such programs, and to continue to administer the Life and Disability Insurance Programs in the ordinary course of business. Each of the Life and Disability Insurance Programs is described in further detail below.

The Utility Long-Term Disability Plan, Supplemental Wage Continuation Benefits, Voluntary Plan (each as defined below), and the leave of absence plans are administered by Sedgwick Claims Management Services, Inc. (the “**Leave of Absence and Disability Plan Administrator**”). The Debtors pay administrative fees of approximately \$280,000 per month to the Leave of Absence and Disability Plan Administrator. As of the Petition Date, the Debtors estimate that approximately \$280,000 is owed to the Leave of Absence and Disability Plan Administrator related to the prepetition period, all of which will come due during the Interim Period.

20
a) Short-Term Disability Plans

Since January 1, 2018, the Utility has provided short-term disability payments and paid family leave benefit payments to its eligible Employees located in California pursuant to the Voluntary Disability and Paid Family Leave Benefit Plan (the “**Voluntary Plan**”). The Utility’s Voluntary Plan is an alternative to the assistance that would otherwise be provided to Utility Employees by the California State Disability Insurance (SDI) plan (the “**State Plan**” and together with the Voluntary Plan, the “**Short-Term Disability Plans**”) and is provided to Employees in the event they become disabled due to a short-term illness or must take leave for certain familial reasons (“**Paid Family Leave**”). More than 85% of the Utility’s eligible workforce has elected to be covered under the

Voluntary Plan, including both non-Represented and Represented Employees. Employees also have the option to remain covered by the State Plan. There is also an assessment fee imposed by the California Employment Development Department to be paid by employers for administrative costs arising out of the Voluntary Plan. This fee is paid quarterly and calculated based on taxable wages for Employees covered under the Voluntary Plan.

Both the Voluntary Plan and State Plan are funded by mandatory Employee contributions that are withheld from Employees' paychecks. For both of the Short-Term Disability Plans, the Debtors withhold 1% of Employees' taxable earnings, up to a specified maximum (set at \$1,149.67 for 2018 and \$1,183.71 for 2019). Employees of the Utility contributed approximately \$25,000,000 to the Voluntary Plan in 2018. Employees covered under the State Plan contributed approximately \$820,000 to the State Plan in 2018. With the exception of the case of a shortfall under the Voluntary Plan (as described below), all benefits under the Short-Term Disability Plans are funded through Employee contributions, which are deducted from Employee payroll and contributed to either the State Plan trust or the Voluntary Plan trust.

The State Plan pays disability and paid family benefits of 60-70% up to a specified maximum weekly benefit. The Voluntary Plan provides the greater of (i) 55-60% of base pay without a capped weekly benefit amount or (ii) the State Plan weekly benefit amount. Employees may be eligible for up to 52 weeks of disability benefits under the Voluntary Plan or the State Plan. For Employees of the Utility, all Sick Time must be exhausted prior to eligibility for the disability benefits under the Short-Term Disability Plans. In addition, under the State Plan, eligible Employees may receive up to six weeks of Paid Family Leave benefits within a 12-month period. Under the Voluntary Plan, eligible Employees may receive up to eight weeks of Paid Family Leave benefits within a 12-month period.

To the extent there are not sufficient amounts contributed to the Voluntary Plan from Employee contributions to compensate an Employee if they become disabled due to a short-term illness or are on Paid Family Leave or to cover the assessment fee paid to the State, the Utility will fund the shortfall. Employee contributions to the Voluntary Plan in 2018 did not fully cover the disability and Paid Family Leave benefits paid by the Voluntary Plan or the assessment fee paid to the State. The Utility

1 funded the shortfall, which to date has totaled \$4,000,000. As of the Petition Date, the Debtors
2 estimate that an additional approximately \$620,000 is owed in connection with funding the shortfall
3 for the Voluntary Plan related to the prepetition period, all of which will come due during the Interim
4 Period.

5 All California PG&E Corp. Employees participate in the State Plan. PG&E Corp. also
6 provides a separate supplemental short-term disability program (the “**Corporation Short-Term**
7 **Disability Plan**”) for its Employees. The Corporation Short-Term Disability Plan is insured by the
8 Standard Insurance Company. PG&E Corp. pays the premiums on such insurance monthly. The total
9 cost in 2018 was approximately \$20,000. As of the Petition Date, the Debtors estimate that they owe
10 approximately \$1,000 on account of the Corporation Short-Term Disability Plan, all of which will
11 come due during the Interim Period.

12 PG&E Corp. also provides supplemental disability benefits (“**PG&E Corp. Short-Term**
13 **Supplemental Benefits**”) if the Corporation Short-Term Disability Plan benefit of 66 2/3% of base
14 pay is limited by the maximum insured benefit. These supplemental benefits are not insured benefits
15 and are paid for by PG&E Corp directly. No payments were made on account of PG&E Corp. Short-
16 Term Supplemental Benefits in 2018 and no amounts are currently outstanding.

17 In addition, the PG&E Corp. provides a supplemental paid family leave payment (“**Paid**
18 **Family Leave Wage Continuation**”) which increases the six weeks of State Plan benefit payments up
19 to a total of 100% of base pay, fully taxable, within a 12-month period. Employees may be eligible for
20 an additional two weeks of Paid Family Leave Wage Continuation benefits for up to a total of eight
21 weeks of Paid Family Leave benefits within a 12-month period. No payments were made on account
22 of Paid Family Leave Wage Continuation in 2018 and no amounts are currently outstanding.

23 Beginning on July 1, 2019, contributions to fund a new paid leave program through the District
24 of Columbia will be withheld from Employees’ paychecks who work in the District of Columbia. The
25 contributions are made by covered employers who are required to contribute quarterly an amount equal
26 to 0.62% of the total wages of each of its covered employees to implementation of the universal paid
27 leave. Covered Employees become eligible for benefits starting in 2020.

b) **Supplemental Wage Continuation Plans**

The Utility provides eligible Employees who are covered under the Voluntary Plan with additional benefits to increase the percentage of base pay that such Employees receive when disabled due to a short-term illness or when on Paid Family Leave.

For California non-Represented and ESC-Represented eligible Employees covered by the Voluntary Plan, the Utility provides a supplemental disability payment (the “**Supplemental Wage Continuation**”) which increases the benefit payment from 60% up to a total benefit of 70% of base pay, after tax. The Utility provides eligible non-Represented and ESC-Represented Employees who do not work in California supplemental wage continuation benefits and may supplement any state disability or paid family leave program for which the Employee may be eligible. The IBEW and SEIU Represented Employees are not eligible for Supplemental Wage Continuation.

In addition, for Employees in California covered in the Voluntary Plan, the Utility provides a supplemental Paid Family Leave payment (“**Paid Family Leave Wage Continuation**” and together with the Supplemental Wage Continuation, the “**Supplemental Wage Continuation Plans**”), which increases the benefit payments from 60% up to a total of 100% of base pay for up to eight weeks within each 12-month period.

Amounts payable under the Supplemental Wage Continuation Plans are paid for by the Utility. The total annual cost of the Supplemental Wage Continuation Plans is approximately \$10,400,000. As of the Petition Date, the Utility estimates that it owes approximately \$860,000 on account of the Supplemental Wage Continuation Plans, all of which will come due during the Interim Period and which is included in the Compensation Obligations described above.

c) **Long-Term Disability Plans**

The Debtors provide long-term disability benefits, including partial income replacement and continued medical and life insurance coverage (the “**Long-Term Disability Plans**”), to certain of their Employees in the event that they become disabled due to an accident or a long-term illness. The Utility and PG&E Corp. provide separate Long-Term Disability Plans for their Employees (respectively, the “**PG&E Corp. Long-Term Disability Plan**” and the “**Utility Long-Term Disability Plan**”).

1 The PG&E Corp. Long-Term Disability Plan is insured and administered by The Standard
2 Insurance Company (the “**PG&E Corp. Long-Term Disability Plan Administrator**”). PG&E Corp.
3 pays the full cost of all premiums for the PG&E Corporation Long-Term Disability Plan monthly. The
4 total cost in 2018 was approximately \$25,000. Employees may be eligible for benefits after six (6)
5 months of disability (the “**PG&E Corp. Long-Term Disability Contributions**”). PG&E Corp. also
6 provides supplemental disability benefits (“**PG&E Corp. Long-Term Supplemental Benefits**”) if the
7 PG&E Corp. Long-Term Disability Plan benefit of 66 2/3% of base pay is limited by the maximum
8 insured benefit. These supplemental benefits are not insured benefits and are paid for by PG&E Corp.
9 As of the Petition Date, PG&E Corp. estimates that it owes approximately \$2,000 on account of the
10 PG&E Corp. Long-Term Disability Plan insurance premiums, all of which will come due during the
11 Interim Period. Additionally, P&E Corp. estimates that there are no amounts outstanding on account
12 of PG&E Corp. Long-Term Supplemental Benefits.

13 The Utility Long-Term Disability Plan provides that an eligible Employee may receive 70% of
14 base pay during the period of disability for a maximum of two (2) years (unless the Employee qualifies
15 for Social Security Disability Insurance). An Employee’s benefit amount is offset by any benefits the
16 Employee receives from government programs. To fund the payments made to eligible Employees
17 under the Utility Long-Term Disability Plan, the Utility contributes an annual amount of
18 approximately \$32,000,000 into a trust, from which the benefits are paid (the “**Utility Long-Term**
19 **Disability Trust**”). Payments are made out of the Utility Long-Term Disability Trust on account of
20 claims under the Utility Long-Term Disability Plan on a weekly basis (the “**Long-Term Disability**
21 **Claims**”). In 2018, approximately \$45,400,000 was paid from the Long-Term Disability Trust on
22 account of Long-Term Disability Claims, including certain administrative costs associated with the
23 Utility Long-Term Disability Plan. Based on historical trends, the Debtors estimate that, as of the
24 Petition Date, approximately \$3,800,000 is outstanding on account of prepetition Long-Term
25 Disability Claims, all of which will come due during the Interim Period and all of which will be paid
26 from funds in the Utility Long-Term Disability Trust. As discussed above, the moneys contributed by
27 the Utility to the trust are received from ratepayers for the specific purpose and the Utility has made
28

1 the entire contribution for 2018. In addition, as stated above, it is my understanding based upon
2 discussions with counsel that the Utility Long-Term Disability Trust is a separate trust and is not an
3 asset of the Debtors' estates.

4 **d) Supplemental Industrial Injury Plan**

5 The Debtors provide supplemental insurance coverage (the "**Supplemental Industrial Injury**
6 **Plan**") to Employees, which provides Employees with a source of income—above Employees' income
7 received in connection with workers' compensation coverage—in the event that they sustain an injury
8 or illness on the job. Depending on the Employee's job title and the date of the onset of his or her
9 injury or illness, when combined with other benefits, an eligible Employee may receive between 50%
10 and 85% of his or her basic weekly wage rate. The Debtors bear the entire cost of the Supplemental
11 Industrial Injury Plan.

12 The Debtors spend approximately \$100,000 per month on claims asserted under the
13 Supplemental Industrial Injury Plan (collectively, the "**Supplemental Industrial Injury Claims**").
14 The Debtors make payments on account of the Supplemental Industrial Injury Claims on a daily basis.
15 Based on historical trends, the Debtors estimate that, as of the Petition Date, they owe approximately
16 \$100,000 on account of prepetition Supplemental Industrial Injury Claims, all of which will come due
17 during the Interim Period.

18 **e) Life Insurance Plan**

19 The Debtors provide life insurance coverage (the "**Life Insurance Plan**") to Employees
20 through the Life Insurance Administrator. The Life Insurance Plan provides the vast majority of
21 Employees with \$10,000 in coverage, although some Employees have selected higher coverage limits
22 under the Life Insurance Plan, with the cost of the coverage over \$10,000 paid by the Employees
23 through payroll deductions. The Debtors withhold approximately \$800,000 per month from Employee
24 paychecks for those Employees who have selected the higher coverage limit. The total annual cost to
25 the Debtors of the Life Insurance Plan is approximately \$450,000, all of which is paid by the Debtors
26 in the form of premiums remitted to the Life Insurance Administrator (collectively, the "**Life**
27 **Insurance Obligations**"). Premiums for the Life Insurance Plan are paid monthly. As of the Petition
28 Date, the Debtors estimate that they owe approximately \$40,000 on account of Life Insurance

Obligations, all of which will come due during the Interim Period. The Debtors also seek by the Employee Wages and Benefits Motion to remit all amounts withheld from Employee paychecks, which have not yet been remitted.

f) AD&D Insurance Plan

The Debtors provide accidental death and dismemberment insurance coverage (the “**AD&D Insurance Plan**”) to Employees through the Life Insurance Administrator. The AD&D Insurance Plan provides the vast majority of Employees with \$10,000 in coverage; certain members of the Debtors’ management team receive \$250,000 in coverage. The total annual cost of the AD&D Insurance Plan is approximately \$80,000, all of which is paid by the Debtors in the form of premiums remitted to the Life Insurance Administrator (collectively, the “**AD&D Insurance Obligations**”). AD&D Insurance Obligations are paid monthly. As of the Petition Date, the Debtors estimate that they owe approximately \$10,000 on account of AD&D Insurance Obligations, all of which will come due during the Interim Period.

g) Voluntary AD&D Insurance Plan

The Debtors provide eligible Employees with the option to purchase additional accidental death and dismemberment coverage (the “**Voluntary AD&D Insurance Plan**”) through the Life Insurance Administrator. The benefits provided pursuant to the Voluntary AD&D Insurance Plan are funded entirely by amounts withheld from Employees’ paychecks and then transferred as premium payments to the Life Insurance Administrator. The Debtors withhold and transfer approximately \$100,000 per month on account of the Voluntary AD&D Insurance Plan. As of the Petition Date, the Debtors estimate that they are currently withholding approximately \$100,000 on account of the Voluntary AD&D Insurance Plan. Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to transfer amounts withheld to the Life Insurance Administrator in the ordinary course of business, including all prepetition amounts withheld on account of the Voluntary AD&D Insurance Plan.

h) Business Travel Insurance Plan

The Debtors provide business travel insurance coverage (the “**Business Travel Insurance Plan**”) to Employees through Life Insurance Company of North America (the “**Business Travel**

1 **Insurance Administrator**”). In the event that an Employee suffers an injury during work-related
2 travel, the Business Travel Insurance Plan provides an eligible Employee between \$125,000 and
3 \$1,000,000 in coverage, in addition to any benefits payable from the Life Insurance Plan, the AD&D
4 Insurance Plan, or the Voluntary AD&D Insurance Plan. The total annual cost of the Business Travel
5 Insurance Plan is approximately \$300,000, all of which is paid by the Debtors in the form of premiums
6 remitted to the Business Travel Insurance Administrator (the “**Business Travel Insurance**
7 **Obligations**”). The Debtors pay Business Travel Insurance Obligations on an annual basis. As of the
8 Petition Date, the Debtors estimate that they owe no amounts on account of Business Travel Insurance
9 Obligations relating to the prepetition period.

10 **5. Work/Life Benefits Programs**

11 The Debtors offer Employees the opportunity to participate in a number of ancillary benefits
12 programs (collectively, the “**Work/Life Benefits Programs**”), including (i) the Employee Assistance
13 Program, (ii) the Wellness Programs, (iii) Compliance Programs, (iv) the Employee Discount Program,
14 (v) the Adoption Expense Reimbursement Program, (vi) the Tuition Reimbursement Program, (vii) the
15 Commuter Transit Program, (viii) the Relocation Program, and (ix) the Child Care Program (each as
16 defined below). Pursuant to the Employee Wages and Benefits Motion, the Debtors seek authority to
17 pay all obligations in connection with the Work/Life Benefits Programs in the ordinary course of
18 business, including all prepetition amounts on account of such obligations, and to continue to
19 administer the Work/Life Benefits Programs in the ordinary course of business. Each of the Work/Life
20 Benefits Programs is described in further detail below.

21 **a) Employee Assistance Program**

22 The Debtors offer three services through a program administered by Beacon (the “**Employee**
23 **Assistance Program**”). The Debtors provide Employees with professional counseling, consultation,
24 and referral services which services are intended to assist Employees to cope with issues such as
25 family and relationship problems, workplace concerns, alcohol- and substance-abuse issues, depression
26 and anxiety, stress, and financial or legal concerns (collectively, the “**Counseling Services**”). The
27 Counseling Services are provided at no cost to Employees. Additionally, the Debtors offer Employees
28 the opportunity to speak with licensed attorneys and certified financial advisors by telephone if such a

1 need arises. Employees can obtain cost-free advice relating to legal and financial topics such as
2 alimony and child support, adoptions, living wills, powers of attorney, foreclosures, savings strategies,
3 debt management, retirement planning, and credit scores. The Debtors also offer consultation services
4 for Employees who need assistance locating quality child-care or elder-care services.

5 The Debtors pay administrative fees of approximately \$200,000 per month to Beacon to
6 administer the Employee Assistance Program, which administrative fees cover the entire cost of the
7 Employee Assistance Program. The Debtors estimate that, as of the Petition Date, they owe
8 approximately \$200,000 in such administrative fees, all of which will come due during the Interim
9 Period.

10 **b) Wellness Programs**

11 The Debtors maintain programs to offer various services to Employees with the aim of
12 increasing their general wellness (the “**Wellness Programs**”). Pursuant to the Wellness Programs,
13 Employees have access to, among other things, health advocacy services, health screenings, an
14 industrial athlete program, telephonic health coaching, onsite clinics in San Francisco, Fresno, San
15 Carlos, and at the DCPD (the “**Onsite Clinics**”), an online health risk questionnaire, an online health
16 and wellness portal, a tobacco cessation program, and discounted gym and health club memberships.

17 The Debtors pay administrative and other fees of approximately \$750,000 per month in
18 connection with the Wellness Programs. As of the Petition Date, the Debtors estimate they owe
19 approximately \$750,000 in administrative and other fees, all of which will come due during the Interim
20 Period.

21 **c) Compliance Programs**

22 As part of the Debtors’ ongoing operations, the Debtors require that certain current and all
23 prospective employees be subject to random drug screening tests (the “**Drug Screening Program**”).
24 These tests are performed pursuant to Department of Transportation requirements and the Debtors’
25 internal policies. Approximately 740 drug screens are conducted on a monthly basis. The Debtors pay
26 approximately \$60,000 per month to EScreen for administration of the drug screens. The Debtors
27 estimate that, as of the Petition Date, they owe approximately \$120,000 to EScreen related to the
28 prepetition period, all of which will come due during the Interim Period. EScreen has the capacity to

1 provide screening throughout the Debtors' service area and its service would be extremely difficult to
2 replicate on a timely basis to meet Department of Transportation screening requirements.

3 The Debtors also maintain a Department of Motor Vehicle Pull Notice Program, as required by
4 California Vehicle Code section 1808.1 (the "**DMV Compliance Program**"). The DMV Compliance
5 Program is administered by SambaSafety, which monitors the safety of the Debtors' approximately
6 3,500 commercial drivers on a daily basis. The Debtors pay SambaSafety approximately \$4,000 per
7 month. The Debtors estimate that as of the Petition Date, they owe approximately \$4,000 on account of
8 prepetition obligations under the DMV Compliance Program, all of which will come due during the
9 Interim Period. The DMV Compliance Program is mandatory and, as a practical matter, it is not
10 feasible to obtain another party to administer the program in a timeframe necessary for ongoing
11 operations.

12 **d) Employee Discount Program**

13 Pursuant to tariffs adopted by the CPUC, the Utility offers its Employees and Retirees a 25%
14 discount on Utility-supplied gas and electric service (the "**Employee Discount Program**"). Generally,
15 discounts under the Employee Discount Program only may be applied to gas and electric service at a
16 Utility Employee's primary residence. Utility Employees are eligible for the Employee Discount
17 Program after six months of continuous service. The Employee Discount Program is not available to
18 Employees of any subsidiary of the Utility or to Employees of PG&E Corp.

19 **e) Adoption Expense Reimbursement Program**

20 The Debtors reimburse Employees for up to \$2,000 of expenses related to the adoption of a
21 child under the age of eighteen (18), including any stepchildren (the "**Adoption Expense**
22 **Reimbursement Program**"). Expenses eligible for reimbursement under the Adoption Expense
23 Reimbursement Program include legal, court, adoption agency, and placement fees; medical expenses
24 for the adopted child that are not covered by a health insurance plan; and transportation expenses
25 associated with picking up the adopted child.

26 The Debtors spend approximately \$2,000 per month on account of obligations associated with
27 the Adoption Expense Reimbursement Program (the "**Adoption Expense Reimbursement**
28 **Obligations**"). Employees have up to one year following the Decree of Final Adoption to submit an

1 application for reimbursement of eligible fees, and thus the Debtors are unable to ascertain with
2 certainty the prepetition amounts due and outstanding on account of the Adoption Expense
3 Reimbursement Obligations. Based on historical trends, the Debtors estimate that, as of the Petition
4 Date, they owe approximately \$2,000 on account of prepetition Adoption Expense Reimbursement
5 Obligations, all of which will come due during the Interim Period.

6 **f) Tuition Reimbursement Program**

7 The Debtors reimburse Employees for expenses related to their enrollment in approved
8 educational courses that are designed to assist Employees in performing their current duties and/or
9 provide Employees with additional skills to advance their careers within the Debtors' organizational
10 structure (the "**Tuition Reimbursement Program**"). Under the Tuition Reimbursement Program, the
11 Debtors reimburse Employees for 100% of their tuition, registration fees, laboratory and technology
12 fees, program and academic fees, and the costs of textbooks associated with approved educational
13 courses up to a maximum of between \$5,250 and \$8,000 per year.

14 The Debtors spend approximately \$300,000 per month on account of the Tuition
15 Reimbursement Program. Employees have up to 90 days after they complete a course to submit a
16 claim for reimbursement of relevant expenses, and thus the Debtors are unable to ascertain with
17 certainty the prepetition amounts due and outstanding on account of the Tuition Reimbursement
18 Program. Based on historical trends, the Debtors estimate that, as of the Petition Date, they owe
19 approximately \$300,000 on account of prepetition obligations associated with the Tuition
20 Reimbursement Program, all of which will come due during the Interim Period.

21 **g) Commuter Transit Program**

22 The Debtors offer Employees the opportunity to purchase transit passes and pay for certain
23 parking expenses with pre-tax contributions (the "**Commuter Transit Program**"). Under the
24 Commuter Transit Program, a portion of Employees' wages is withheld and contributed into accounts
25 on a pre-tax basis. Employees then utilize the proceeds of such accounts to purchase transit passes and
26 pay for certain parking expenses. Approximately 2,400 Employees participate in the Commuter
27 Transit Program.
28

1 The Commuter Transit Program is administered by WageWorks, Inc. (the “**Commuter Transit**
2 **Program Administrator**”). The Debtors pay administrative fees of approximately \$10,000 per month
3 to the Commuter Transit Program Administrator. The Debtors estimate that, as of the Petition Date,
4 they owe approximately \$10,000 in such administrative fees, all of which will come due during the
5 Interim Period. Pursuant to the Employee Wages and Benefits Motion, the Debtors also seek authority
6 to remit to the accounts all withheld amounts as of the Petition Date.

7 **h) Relocation Program**

8 The Debtors offer a relocation program to new or transferring Employees whose work location
9 is fifty (50) miles or greater than the distance from the Employees’ former residence to the previous
10 work location (the “**Relocation Program**”). The services that are offered under the Debtors’
11 Relocation Program, which vary based on the level of the Employee, include temporary housing,
12 movement of household goods, reimbursement of certain moving related expenses, assistance with the
13 sale and purchase of a home, and in some cases a lump sum cash payment. Eligible Employees have
14 up to twelve (12) months to complete their relocation from the time they begin their position. In 2018,
15 the Debtors paid approximately \$4,400,000 under the Relocation Program.

16 The Relocation Program is administered by Altair Global (the “**Relocation Program**
17 **Administrator**”). The Debtors pay administrative fees of approximately \$10,000 per month to the
18 Relocation Program Administrator. The Debtors estimate that, as of the Petition Date, they owe
19 approximately \$1,400,000 on account of prepetition obligations associated with the Relocation
20 Program, inclusive of administrative fees, approximately \$100,000 of which will come due during the
21 Interim Period.

22 **i) Child Care Program**

23 The Debtors offer on-site child care services at their San Francisco corporate headquarters for a
24 limited number of Employees’ children who are between the ages of six weeks and five years (the
25 “**Child Care Program**”). The Child Care Program is paid for in part by participating Employees and
26 is subsidized by the Debtors and administered by Bright Horizons Family Solutions LLC (the “**Child**
27 **Care Program Administrator**”). The Debtors withhold approximately \$1,500,000 from Employee
28 payroll annually in connection with the Child Care Program. The Debtors subsidy contribution is

1 approximately \$1,000,000 annually. The Debtors estimate that, as of the Petition Date, they owe
2 approximately \$250,000 on account of the Child Care Program, which includes amounts withheld from
3 payroll and the Debtors' contributions, all of which will come due during the Interim Period.

4 **H. Supplemental Workforce Obligations**

5 As set forth above, in addition to their Employees, the Debtors use the services of
6 approximately 3,200 Supplemental Workers. To compensate the Supplemental Workforce, the
7 Debtors either pay members of the Supplemental Workforce directly or pay Staffing Agencies, which
8 then make payments to the Supplemental Workforce on the Debtors' behalf (collectively, the
9 "**Supplemental Workforce Obligations**"). It is critical that the Debtors be able to continue honoring
10 their obligations with respect to the Supplemental Workforce Obligations. Staying current with respect
11 to the obligations owed to the Supplemental Workforce will minimize unnecessary disruption to the
12 Debtors' businesses. This is particularly important, given that the Debtors heavily rely on members of
13 the Supplemental Workforce to perform specialized tasks that, for various reasons, the Employees
14 cannot perform on their own in connection with the Debtors' operation and maintenance of their
15 generation units, electric transmission and distribution and natural gas facilities. For example,
16 members of the Supplemental Workforce perform tasks for which Employees otherwise lack the
17 training or licensure, as well as tasks for which there are a shortage of Employees, including
18 maintenance and repair work on transmission lines following weather-related events. If the Debtors
19 fail to pay the Supplemental Workforce Obligations, members of the Supplemental Workforce may
20 refuse to continue to perform services for the Debtors. Thus, failure to make timely payments on
21 account of the Supplemental Workforce Obligations could interrupt the Debtors' ability to provide
22 electric and natural gas service to their customers in northern and central California.

23 The Debtors average approximately \$180,000,000 in annual aggregate Supplemental
24 Workforce Obligations. As of the Petition Date, the Debtors estimate that they owe approximately
25 \$35,000,000 on account of Supplemental Workforce Obligations relating to the prepetition period,
26 \$25,000,000 of which will come due during the Interim Period. Pursuant to the Employee Wages and
27 Benefits Motion, the Debtors seek authority to pay the Supplemental Workforce Obligations in the
28 ordinary course of business, including all prepetition amounts on account of such obligations.

1 Accordingly, I respectfully submit that it is an exercise of sound business judgment and necessary to
2 facilitate a successful reorganization to pay the Supplemental Workforce Obligations.

3 Payment of the Prepetition Employee Obligations, including the Employee Program
4 Administrative Obligations, is an exercise of sound business judgment and necessary to facilitate a
5 successful reorganization. The Employees—many of whom possess unique skills, licenses, or
6 certifications—are vital to the continued operation of the Debtors’ businesses and vital to the success
7 of the Chapter 11 Cases. The Debtors believe that the majority of the Employees rely exclusively on
8 their compensation and, as applicable, the benefits provided under the Employee Wage and Benefits
9 Programs to satisfy their daily living expenses and other basic needs such as access to health, dental,
10 and vision care coverage. Consequently, Employees will be exposed to significant financial
11 difficulties if the Debtors are not permitted to honor obligations with respect to the Prepetition
12 Employee Obligations. Moreover, honoring the Prepetition Employee Obligations and continuing the
13 Employee Wage and Benefits Programs will help maintain morale and minimize the adverse effect of
14 the commencement of these Chapter 11 Cases on the Debtors’ ongoing business operations, as well as
15 their relationships with the Unions. The failure to honor the Prepetition Employee Obligations could
16 lead to turnover, attrition, and instability at this critical time in the Chapter 11 Cases, which is a risk
17 that is especially consequential in these Chapter 11 Cases due to the highly specialized nature of many
18 of the duties that the Employees perform and the critical nature of the Debtors’ business as the sole
19 utility provider to approximately 16 million customers.

20 The Debtors also believe that it is an exercise of sound business judgment and necessary to
21 facilitate a successful reorganization to pay the Employee Program Administrative Obligations,
22 including administrative costs and expenses owed to the Payroll Maintenance Vendors, which provide
23 compensation and other benefit-related services and products and which have institutional knowledge
24 of the Debtors’ operations that would be difficult and costly to replace. Absent the relief requested the
25 Debtors would be unable to maintain their Employee Wage and Benefits Programs in an efficient and
26 cost-effective manner.

1 The Debtors cannot risk the damage to their businesses, and the potential disruption of their
2 ability to provide essential utility service to 16 million Californians, that would follow any decline in
3 Employee morale and the resulting attrition that likely would occur if the Debtors are not granted the
4 relief requested herein. Accordingly, the Debtors respectfully request that the Court authorize them to
5 pay the Prepetition Employee Obligations including the Employee Program Administrative
6 Obligations, and continue the Employee Wage and Benefits Programs in the ordinary course of
7 business, consistent with past practice.

8 Accordingly, I respectfully submit that the relief requested in the Employee Wages and
9 Benefits Motion is necessary and appropriate, is in the best interests of their estates and all parties in
10 interest, is necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

11 **V. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 363(b), AND 507(a)(7)**
12 **AND FED. R. BANKR. P. 6003 AND 6004 FOR INTERIM AND FINAL ORDERS**
13 **(I) AUTHORIZING DEBTORS TO (A) MAINTAIN AND ADMINISTER CUSTOMER**
14 **PROGRAMS, INCLUDING PUBLIC PURPOSE PROGRAMS, AND (B) HONOR ANY**
15 **PREPETITION OBLIGATIONS RELATING THERETO; AND (II) AUTHORIZING**
16 **FINANCIAL INSTITUTIONS TO HONOR AND PROCESS RELATED CHECKS AND**
17 **TRANSFERS (THE “CUSTOMER PROGRAMS MOTION”)**

18 Pursuant to the Customer Programs Motion, the Debtors request interim and final authority, in
19 the ordinary course of business and consistent with past practices, to (a) maintain and administer their
20 Customer Programs (as defined below) including the (i) Deposit and Reimbursement Programs (as
21 defined below), (ii) Public Purpose Programs (as defined below), (iii) Environmental Cleanup
22 Programs (as defined below), (iv) Third-Party Programs (as defined below), (v) GHG Credit Programs
23 (as defined below), and (vi) Customer Support Programs (as defined below), and (b) pay and otherwise
24 honor all obligations relating to each of the foregoing, whether arising prior to, or after, the Petition
25 Date, as necessary and appropriate in the Debtors’ business judgment. Additionally, the Debtors seek
26 authority to issue new postpetition checks or effect new electronic funds transfer requests on account
27 of such obligations to replace any prepetition checks or electronic funds transfer requests that may be
28 lost, dishonored, or rejected as a result of the commencement of these Chapter 11 Cases.

As a regulated, investor-owned utility, the bulk of the Debtors’ business operations are subject
to oversight by the CPUC. The complex regulatory and statutory framework within which the Debtors

1 operate mandates that, in the ordinary course of business, the Debtors maintain certain programs and
2 initiatives for the benefit of a customer base that includes, in the aggregate, over 16 million residential
3 and non-residential customers (collectively, the “**Customers**”). It is my understanding based on
4 discussions with counsel that, as virtually all of such programs are mandated pursuant to state or local
5 laws, federal law, regulations, tariffs, and regulatory decisions¹⁴ the failure of the Debtors to continue
6 to honor and maintain these programs would result in noncompliance with such laws, regulations, and
7 tariffs, and could materially disrupt the Debtors’ operations and jeopardize their ability to successfully
8 reorganize. Additionally, applicable legislation requires that the projected costs associated with
9 several of the programs discussed in the Customer Programs Motion be funded through various
10 surcharges and fees collected by the Debtors through rates from Customers and earmarked to pay the
11 costs of such programs. In other words, in many instances the Debtors act as a conduit for collected
12 funds, which the Debtors pass through to the programs’ beneficiaries and use to pay other program
13 costs.

14 **A. The Customer Programs.**

15 As set forth below, these programs include the following: (a) programs made available to and
16 measures taken for Customers in the ordinary course of providing utility services including the
17 Security Deposit Programs, the MLX Programs, the UG Programs, and the Other Customer Programs
18 (each, as defined below) (collectively, the “**Deposit and Reimbursement Programs**”); (b) programs
19 designed to advance public policy goals such as local and state energy efficiency, renewable energy,
20 carbon reduction, and energy conservation (collectively, the “**Public Purpose Programs**”); (c)
21 programs designed to manage the Debtors’ environmental cleanup and nuclear power plant
22 decommissioning efforts (collectively, the “**Environmental Cleanup Programs**”); (d) third-party
23 programs pursuant to which the Debtors invoice Customers on behalf of third parties that have

24 ¹⁴ Such statutes, regulations, tariffs, and decisions include, without limitation: Cal. Pub. Util. Code
25 §§ 379, 380.5, 381, 381.1, 382, 399.4, 399.8, 454.55, 454.56, 890-899, 2790, and 8326; Cal. Water
26 Code § 80110a; PG&E Elec. Rules 6, 7, 9G, 15, 16, 17, 17.1, 17.2, and 20; PG&E Gas Rules 6, 7, 9G,
27 15, 16, 17, 17.1, and 17.2 (available at <https://www.pge.com/tariffs/index.page>); and California Public
28 Utilities Commission Decision Nos. 94-05-020, 01-03-073, 06-01-024, 07-11-045, 08-10-036, 10-01-
022, 14-12-024, 16-01-044, 17-12-022, 18-01-004, 18-06-027, and 18-12-015. *See also*, the California
Global Warming Solutions Act of 2006, Cal. Health and Safety Code §§ 38500, *et. seq.*; Low Carbon
Fuel Standard (LCFS), Cal. Code of Regs. tit. 17, §§95480-95503.

1 purchased and provide electricity or natural gas to Customers using the Debtors' transmission and
2 distribution facilities (collectively, the "**Third-Party Programs**"); (e) greenhouse gas ("**GHG**")
3 emissions reduction programs required by the California Air Resources Board that provide certain
4 credits to customers (collectively, the "**GHG Credit Programs**"); and (f) customer support programs
5 pursuant to which the Debtors support Customers by engaging contractors and other third parties to
6 complete certain Customer projects (collectively, the "**Customer Support Programs**" and, all such
7 programs collectively, including the Deposit and Reimbursement Programs, the Public Purpose
8 Programs, the Environmental Cleanup Programs, the Third-Party Programs, the GHG Credit Programs,
9 and the Customer Support Programs collectively, the "**Customer Programs,**" and any and all fees,
10 costs, reimbursement obligations, credits, refunds, or expenses incurred, whether prior to or after the
11 Petition Date, in connection with the Customer Programs, the "**Customer Program Obligations**").
12 Each of the aforementioned Customer Programs is discussed in further detail below.¹⁵

13 **1. The Deposit and Reimbursement Programs**

- 14 • ***The Security Deposit Programs.*** Pursuant to the Debtors' security deposit
15 programs, which have been approved by the CPUC and, as I understand based on
16 discussions with counsel, have the effect of state law¹⁶ (the "**Security Deposit**
17 **Programs**"), Customers must demonstrate sufficient creditworthiness before the
18 Debtors begin providing gas and electric services. In some cases, the existence of a
19 third-party guarantor or a demonstrable ability to pay will satisfy the Debtors'
20 creditworthiness requirements. In many cases, however, if a potential Customer's
21 gas and/or electric services were discontinued in the past due to non-payment, or if a
22 Customer has no previous service history with the Debtors, the Debtors will require
23 such Customers, pursuant to the Security Deposit Programs, to provide a security
24 deposit to the Debtors before initiating service ("**Security Deposit**"). Certain of the
25 Debtors' nonresidential Customers provide letters of credit to the Debtors to fulfill
26 such creditworthiness requirements. In the ordinary course of business, upon
27 discontinuance of service and payment of all obligations owed to the Debtors, the
28 Debtors return the letters of credit back to such Customers. The Debtors intend to
continue such practice in the ordinary course.

15 The Debtors are also obligated to perform under other miscellaneous customer-benefiting programs and services, including, without limitation, certain customer-benefiting programs and obligations required in connection with settlements entered into by the Debtors and approved by the Bankruptcy Court in their prior chapter 11 case, such as the payment of certain disputed claims from escrowed funds and donation of land and land conservation easements to public agencies or non-profit conservation organizations. The Debtors intend to comply with such obligations.

16 See PG&E Electric Rules 6 and 7; PG&E Gas Rules 6 and 7. All tariffs applicable to the Debtors are available at <https://www.pge.com/tariffs/index.page>.

In the ordinary course of business, the Debtors refund Security Deposits with accrued interest (the “**Security Deposit Refunds**”) to Customers if (a) a Customer has no more than two past-due bills during the twelve-month period after commencing service and/or has not had service otherwise discontinued for non-payment during such twelve-month period; (b) a Customer voluntarily discontinues service; or (c) a Customer otherwise meets the Debtors’ criteria for creditworthiness and requests the return of a Security Deposit. Once the Debtors determine that the Customer is entitled to a Security Deposit Refund, the deposit is first used to satisfy the Customer’s outstanding bill or credited to the Customer’s open account. The Debtors also issue Security Deposit Refunds in the form of a check or through an automated clearinghouse transfer directly into a Customer’s bank account. Customers may also elect to receive a refund in the form of a credit to another account held with the Debtors.

In 2018, the Debtors issued approximately \$52.3 million in Security Deposit Refunds to approximately 240,000 residential Customers (on average, approximately \$220 per identified residential Customer) and approximately \$41.5 million in Security Deposit Refunds to approximately 20,000 non-residential Customers. As of the Petition Date, the Debtors hold an aggregate of approximately \$181.2 million in Security Deposits.

Based on historical averages, the Debtors estimate that they will be obligated to refund or credit on a monthly basis approximately \$5 million in Security Deposit Refunds to approximately 20,000 residential Customers (on average \$250 per identified residential Customer) and approximately \$4 million in Security Deposit Refunds to approximately 1,600 non-residential Customers.

- **The MLX Programs.** The Debtors have mainline extension and interconnection (“**MLX**”) programs (collectively, the “**MLX Programs**”) approved by the CPUC that, as I understand based on discussions with counsel, are required by law. Generally speaking, an MLX is an electric line or a gas main that is typically installed to provide permanent gas and electricity service to premises that otherwise lack connection to the Debtors’ extensive natural gas and electric network.¹⁷ As used herein, an MLX may also be used to add load capacity to otherwise grid-connected premises in anticipation of increased energy usage or to interconnect customer generation facilities.¹⁸ The MLX Programs generally work in the following manner: either the Customer builds the MLX and pays for associated construction costs, or the Debtors build the MLX and the Customer provides the Debtors with an up-front deposit corresponding to estimated construction costs. As the Debtors may benefit from an MLX through Customer revenues associated with such MLX over time, the Debtors issue (i) payments to the Customer who built the MLX, and (ii) refunds to Customers who provided the Debtors with up-front deposits (collectively, including refunds of Engineering Advances (as defined below) in excess of remaining project costs, the “**MLX Deposit Refunds**”). The Debtors also receive engineering advances when Customers apply for new line

¹⁷ See PG&E Electric Rules 15 and 16; PG&E Gas Rules 15 and 16.

¹⁸ See PG&E Electric Rule 21.

1 extension or relocation projects (the “**Engineering Advances**”) which are applied to
2 the cost of the project.

3 In 2018, the Debtors paid approximately \$55 million in MLX Deposit Refunds
4 (excluding refunds for Engineering Advances) to approximately 2,100 Customers
5 and approximately \$11.1 million in refunds of Engineering Advances to
6 approximately 5,300 Customers. As of the Petition Date, the Debtors hold an
7 aggregate of approximately \$112.7 million in MLX deposits and Engineering
8 Advances. Based on historical averages, the Debtors estimate that they will be
9 obligated to refund or credit on a monthly basis approximately \$4.6 million in MLX
10 Deposit Refunds (excluding refunds for Engineering Advances) to approximately
11 150 Customers and \$1 million in refunds of Engineering Advances to approximately
12 440 Customers.

- 13 • **The Underground Programs.** The Debtors undertake programs that are approved
14 by the CPUC and are required by law to convert existing overhead electric
15 distribution facilities to underground (“**UG Programs**”).¹⁹ In order for a project to
16 qualify under the program, the project must meet specific criteria outlined in the
17 Debtors’ Rule 20 tariff. Under the UG Programs, the Debtors undertake projects at
18 the request of governmental entities that cover the costs of the conversions (the “**UG**
19 **Costs**”). The governmental entities have the option of covering the conversion
20 costs either through direct payment to the Debtors or, more commonly, through the
21 use of work credits that are allocated to communities according to a formula that is
22 set forth in Debtors’ tariffs. In 2018, the Debtors expended approximately \$33
23 million in connection with the UG Programs. As of the Petition Date, the Debtors
24 estimate that approximately \$5.4 million in UG Costs owed to third parties in
25 connection with the UG Programs are accrued and unpaid, all of which the Debtors
26 estimate will come due within thirty (30) days after the Petition Date.
- 27 • **The Other Customer Programs.** In the ordinary course of business, the Debtors
28 also provide credits to Customers (i) as a result of corrections in rates, metering and
other charges,²⁰ (ii) in connection with the Debtors’ budget billing plan, which is
intended to normalize Customer payments over the course of a year²¹ and the
Debtors’ solar tariffs²² which compensate Customers for surplus energy delivery,
and (iii) to address other similar Customer concerns and issues (collectively, the
“**Other Customer Programs**” and the obligations related thereto, the “**OCP**
Costs”). The Debtors’ monthly Other Customer Program activity is irregular. In
the eleven (11) month period ending November 30, 2018, the Debtors incurred
monthly OCP Costs up to approximately \$4 million.

¹⁹ See PG&E Electric Rule 20.

²⁰ See PG&E Electric Rules 17, 17.1 and 17.2; PG&E Gas Rules 17, 17.1 and 17.2.

²¹ See PG&E Electric Rule 9G; PG&E Gas Rule 9G.

²² See PG&E Electric Rate Schedule NEM2.

2. The Public Purpose Programs.

The Debtors administer, both directly and indirectly, a host of separate Public Purpose Programs across the Debtors' service area in California pursuant to a series of statutory mandates, including those set forth in the California Public Utilities Code, and regulatory mandates and decisions issued by the CPUC and local and regulatory agencies.²³ The Public Purpose Programs are tailored to effectuate public policies supporting energy efficiency ("EE"), carbon reduction, renewable energy, and energy management and conservation by (a) providing direct financial incentives (including rebates) to individuals, businesses, and local governments to install, sell, or manufacture energy efficient and renewable energy equipment, (b) implementing education and outreach initiatives that promote and support the widespread adoption of EE, renewable energy, reductions in GHG emissions, and energy conservation practices, (c) supporting research and development aimed at improving existing and developing new EE, clean energy technologies, and renewable energy technologies, and (d) administering and supporting demand response programs which seek to maximize grid-wide efficiencies through targeted increases and decreases in electricity consumption. A non-exhaustive list and general description of the types of Public Purpose Programs follows.

The Debtors administer mandated programs that cover nearly every market sector and customer type, across all technology families, and use a variety of market intervention strategies, including rebates targeted at manufacturers and distributors. These programs support California's "Long-Term Energy Efficiency Strategic Plan," a framework created by the CPUC that is designed to integrate EE into the everyday activities of ratepayers, to provide a more integrated EE experience for Customers and to provide Customers with access to information and greater financing opportunities.

- Energy Efficiency. The Debtors' CPUC-mandated EE programs (collectively, the "EE Programs") offer incentives, services, education and tools aimed to assist residential, commercial, industrial, and agricultural Customers and local government partners in eliminating unnecessary energy use and saving money. Through strategic energy planning support, technical support services, and financial support through rebates, incentives, education, and financing options, the EE Programs empower Customers to better understand, manage, and eliminate

²³ Such statutes and Commission Decisions include without limitation: Cal. Pub. Util. Code §§ 380.5, 381, 381.1, 382, 399.4, 399.8, 454.55, 454.56, 890-899 and 2790; and California Public Utilities Commission Decision Nos. 01-03-073, 06-01-024, 07-11-045, 08-10-036, 10-01-022, 14-12-024, 16-01-044, 17-12-022, 18-01-004, 18-06-027, and 18-12-015.

unnecessary energy use. A general description of the types of EE Programs follows.

- *Energy Efficiency: Residential Programs.* The Debtors administer twelve (12) residential EE programs (collectively, the “**Residential Programs**”) designed to achieve energy savings for residential Customers. For example, the Debtors provide rebates to residential Customers who purchase energy efficient products like washing machines, dishwashers, and water heaters. In addition, the Debtors offer incentives to Customers who work with contractors to perform home retrofits and who do air conditioning installation and maintenance. Through the Residential Programs, property owners and Customers can receive incentives to install efficient equipment in multifamily housing units, ranging from central systems like boilers to simple lighting fixtures. The Residential Programs offer incentives to manufacturers, distributors, and retailers to manufacture, stock, and sell energy efficient consumer electronics (such as televisions and computers) and lighting. In addition, the Debtors provide audit and energy savings equipment installation services to moderate income residential Customers. Through home energy management tools the Debtors provide residential Customers tools and information to help them maximize energy savings.
- *Energy Efficiency: Commercial Programs.* The Debtors administer a variety of commercial EE programs (collectively, the “**Commercial Programs**”) that target Customers in new and existing facilities and in a variety of sectors including healthcare, hospitality, large office, high tech, and retail. Through the Commercial Programs, the Debtors provide incentives and financing to encourage investment in energy efficient products and services. Typical commercial EE projects focus on equipment upgrades in lighting, HVAC, food service, refrigeration, water heating, and general plug loads. The Debtors also offer strategic energy planning, technical support services, calculation or design assistance, and benchmarking tools to their commercial Customers. The Debtors deliver this suite of Commercial EE Programs through a network of trade professionals, third-party partners, and local government partnerships. The Debtors also offer in-house engineering and project development support to commercial Customers.
- *Energy Efficiency: Industrial Programs.* The Debtors administer a variety of industrial EE programs (collectively, the “**Industrial Programs**”) that are designed to reduce energy consumption, lower GHG emissions, and increase Customers’ profitability by lowering energy costs. The Industrial Programs include rebates, incentives, and financing for efficient equipment and systems; technical support such as facility audits and energy savings analysis; and strategic energy planning. Typical industrial EE projects focus on lighting, pumps, fans, motors, boilers, insulation, heat recovery, process heating, drip irrigation, low pressure sprinkler nozzles, and refrigeration equipment. The Industrial Programs target various facility types including oil production, lumber and paper mills, cement and quarries, metals processing, petroleum refineries, chemical industries, assembly plants, and water and wastewater treatment plants. The Debtors deliver their suite of

Industrial Programs through a network of trade professionals and third-party partners. The Debtors also offer in-house engineering and project development support to industrial Customers.

- *Energy Efficiency: Agricultural Programs.* The Debtors administer a variety of agricultural EE programs (collectively, the “**Agricultural Programs**”) that help agricultural producers and processors manage energy costs and make informed investments in new energy-saving equipment. The Debtors offer a full suite of tools to position agricultural Customers to eliminate unnecessary energy use. Key offerings include rebates, incentives, and financing for efficient equipment and systems; technical support such as facility audits and energy savings analysis; and pump efficiency education. The Agricultural Programs target agricultural growers, post-harvest processors, dairies, irrigation districts/agencies, fruit and vegetable processors, agricultural service providers, wineries, and other beverage manufacturers. The Debtors deliver their suite of Agricultural Programs through a network of trade professionals and third-party partners. The Debtors also offers in-house engineering and project development support to agricultural Customers.
- *Energy Efficiency: Local, State, and Federal Government (Public Sector) Programs.* The Debtors administer a variety of EE programs focused on the public sector (collectively, the “**Public Sector Programs**”). Through Debtors’ government and community partnerships, the Debtors collaborate with public entities to shape EE and sustainability at the local, regional, and statewide levels. These partnerships aim to meet the needs of local and state governments and schools and educational institutions to offer comprehensive solutions that are flexible, innovative, and a reflection of the communities’ needs. The Public Sector Programs also focus on K-12 public schools and offer energy planning services for public entities interested in benchmarking their facilities and pursuing local energy reach codes and ordinances. In addition, the Debtors offer a light emitting diode (“**LED**”) streetlights program serving public sector customers.
- *Energy Efficiency: Financing Programs.* The Debtors administer the on-bill financing program (the “**OBF Program**”) that provides zero-interest loans to help commercial customers invest in efficient products and pay for these investments through their utility bill. The OBF Program is offered in conjunction with other EE Programs to stimulate and enable higher levels of customer participation. Additionally, the Debtors support the California Alternative Energy and Advanced Transportation Financing Authority (CAEATFA) in the development of statewide finance pilots, which include on and off-bill financing options.
- *Energy Efficiency: Codes and Standards Program.* The Debtors administer the codes and standards program (the “**C&S Program**”), which saves energy on behalf of ratepayers by influencing regulatory bodies such as the California Energy Commission and the U.S. Department of Energy to strengthen EE regulations. The C&S Program conducts efforts to increase

1 compliance with existing codes, standards, and regulations to ensure that the
2 State of California realizes the savings from new codes and standards and
3 support local governments that include reach codes as a climate strategy.
4 The C&S Program also provides for planning and coordination with other
5 California investor-owned utilities to optimize collaboration, and code
6 readiness activities to prepare for future codes. The C&S Program advocacy
7 and compliance improvement activities extend to virtually all buildings and
8 appliances sold in California in support of the state's climate and energy
9 goals.

10 ○ *Energy Efficiency: Workforce Education and Training Program.* The
11 Debtors administer a workforce education and training program (the
12 “**WE&T Program**”), which provides professionals who design, build, and
13 operate buildings the relevant skills needed to help eliminate unnecessary
14 energy use in buildings. The WE&T Program provides technical advice to
15 local workforce development organizations, postsecondary educational
16 institutions, and training programs for various trades. The Debtors operate
17 three energy centers that offer courses, technical consultations, and events.
18 The centers include the Pacific Energy Center in San Francisco, which
19 focuses on building design, the Stockton Energy Training Center, which
20 focuses on workforce training, and the Food Service Technology Center in
21 San Ramon. Through the WE&T Program, the Debtors work with
22 educational institutions, community-based organizations and state education
23 agencies to offer energy education to K-12, community colleges, adult
24 education, and higher education institutions.

25 ○ *Energy Efficiency: Emerging Technologies Program.* The Debtors
26 administer an emerging technologies program (the “**ETP**”), which evaluates
27 new and/or promising EE technologies, showcases these technologies, and
28 facilitates the entry of such technologies to market. Through the ETP, the
Debtors communicate and collaborate with entrepreneurs and technology
providers to increase the supply of EE technology solutions and identify and
assesses the performance of emerging EE technology solutions through lab
and field testing and demonstration showcases. The ETP is focused on the
following areas across all customer segments: lighting, HVAC, building
shells, energy management systems, appliances, plug loads, and food
services technologies.

• Statewide, Marketing and Education. The Debtors serve as the fiscal manager for a
joint utility statewide marketing, education, and outreach program that is performed
under contracts with third-party advertising and media firms. The statewide
marketing, education, and outreach program motivates Customers to take action on
EE and energy conservation measures, increases Customer awareness of such
measures, and facilitates Customers' ability to act and incorporate technological
advances.

• Low-Income. The Debtors serve as program administrator for programs aimed at
helping income-qualified Customers pay their energy bills. Over 1.4 million

Customers are receiving a bill discount through the California Alternative Rates for Energy (CARE) program and Family Electric Rate Assistance Program (FERA) program.

- Energy Savings Assistance Program. The Debtors administer the energy savings assistance program which provides income-qualified residential Customers with home energy-saving improvements at no charge. The program supports the EE and weatherization of approximately 100,000 homes per year.
- Self-Generation Incentive Program. The Debtors serve as program administrators for the self-generation incentive program (the “SGIP”) and provide rebates to Customers and renewable energy providers for the installation of new qualifying technologies that meet all or a portion of the electric needs of a facility. The purpose of the SGIP is to achieve GHG emission reductions, electricity demand reductions, and reduced Customer electricity usage.
- California Solar Initiative and Other Solar Programs. The Debtors administer California solar initiative and other solar programs by providing financial incentives for installation of qualifying photovoltaic systems for multi-family and single-family affordable housing and solar thermal technology. These programs include without limitation, the California Solar Initiative Program; the California Solar Initiative Multifamily Affordable Solar Housing Program; the California Solar Initiative Thermal Program; the Single Family Affordable Solar Housing Program; the Multifamily Affordable Housing Solar Roofs Program; the Net Energy Metering Program; the Community Solar Green Tariff Program; the Disadvantaged Communities—Green Tariff Program, and the Disadvantaged Communities—Single Family Solar Homes Program. Under these programs, the Debtors provide financial incentives and other customer assistance including through a contract with a third-party administrator for the installation of solar energy systems on qualifying properties throughout California. The goal of the programs is to encourage the development and installation of solar systems including in California’s disadvantaged communities.
- Demand Response Programs. The Debtors administer demand response programs designed to enable Customers to contribute to energy load reduction during peak times of demand. Demand response programs are designed to be both fiscally and environmentally responsible by responding to occasional and temporary peak demand. The programs offer incentives to businesses that volunteer and participate by temporarily reducing their energy use when demand could outpace supply.
- San Joaquin Valley Disadvantaged Communities Pilot Projects. In December 2018, the CPUC authorized the Debtors and other investor-owned utilities to implement and administer a variety of pilots and various support programs to provide improved utility services to disadvantaged communities in the San Joaquin Valley. The Debtors are responsible for certain of these pilots as well as providing credits and education for impacted customers. The Debtors are also responsible for facilitating the hiring of an independent administrator to oversee the pilots.
- Clean Energy Transportation Programs. The Debtors have been authorized to

1 implement multiple electric vehicle programs, including the “Electric Vehicle
2 Charging Network Program,” which will increase access to charging for electric
3 vehicles within the Debtors’ service territory; the “Electric Vehicle Fleet Ready
4 Program,” which serves to build electric vehicle charging infrastructure for 700 sites
5 to support medium and heavy duty vehicle fleets; the “Priority Review Projects
6 Program,” which pilots new methods and projects to promote deployment of electric
7 vehicles; and the “Electric Vehicle Fast Charge Program,” which targets transit
8 corridors and urban areas to provide them with charging infrastructure that allows
9 electric vehicles to fully charge quickly.²⁴

- 10 • Residential Rate Reform. The Debtors implement residential rate plan changes and
11 increase customer awareness of rate options in preparation for the mandated
12 transition of approximately 2.7 million Customers to “time-of-use” rate plans
13 starting in October 2020 under which energy costs will be directly related to the
14 time of day energy is used. Customer awareness includes an extensive multi-media
15 statewide campaign informing Customers of the importance of energy management
16 and the time of day that energy is used.
- 17 • Mobile Home Park Utility Upgrade Program. The Debtors participate in a program
18 to replace mobile home park (“MHP”) operated utility systems with direct public
19 utility natural gas and electric service for MHP residents. The goal of the program
20 is to provide safe, reliable, and clean energy to MHP residents.

21 On an annual basis, the CPUC commissions studies of California’s residential and commercial
22 buildings, equipment and processes, and industrial and agricultural sectors with the objective of
23 developing energy savings and conservation objectives and determining the annual budget for the
24 Public Purpose Programs. Following approval by the CPUC, the projected costs associated with the
25 Public Purpose Programs (the “**PPP Costs**”) are funded through various surcharges and fees collected
26 by the Debtors through rates from Customers (the “**PPP Funds**”).²⁵ In order to meet the objectives of
27 the Public Purpose Programs, the CPUC has approved approximately \$950 million in PPP Costs for
28 2019. As of the Petition Date, the Debtors estimate that approximately \$131 million in PPP Costs
owed to third parties are accrued and unpaid, all of which the Debtors estimate will come due within
thirty (30) days after the Petition Date.

²⁴ These clean energy transportation programs have been authorized by Decision Nos. 16-12-065, 18-01-024 and 18-05-040 of the CPUC.

²⁵ For a list of examples of such balancing accounts, see PG&E Advice Letter 5376-E, Annual Electric True-Up Submittal – Change to PG&E’s Electric Rates on January 1, 2019, filed with CPUC on September 4, 2018; PG&E Advice Letter 4053-G, Annual Gas True-Up of Gas Transportation Balancing Accounts for Rates Effective January 1, 2019, filed with CPUC on December 21, 2018.

1 The funds collected, allocated, and distributed by the Debtors on account of the Public Purpose
2 Programs are typically tracked by the Debtors through regulatory “balancing accounts” required by the
3 CPUC for legal ratemaking purposes. All costs recorded in these accounts are reserved for the
4 payment of PPP Costs as approved by the CPUC. Surplus funds remaining in these accounts at the end
5 of the year are either rolled over and allocated to Public Purpose Programs for the next fiscal year or
6 refunded to Customers through rate adjustments.

7 3. The Environmental Cleanup Programs

8 The Debtors’ operations include or have included nuclear power plants, manufactured gas plant
9 sites, natural gas gathering system sites, natural gas compressor station sites, electric transmission and
10 distribution facilities, steam-electric power plant sites, and hydroelectric power plant sites. As a result
11 of current and historical operations, that state and federal statutes and agencies such as the Federal
12 Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), the
13 NRC, and the CPUC nuclear safety and cost recovery regulations require the Debtors to administer and
14 maintain the Environmental Cleanup Programs described below.²⁶ The Debtors operate such programs
15 under state and federal regulatory oversight.

16 As a necessary part of their business, the Debtors use, or have used, a variety of different
17 hazardous or radioactive materials in a number of their sites, the cleanup of which is an ordinary and
18 recurring part of the Debtors’ business. In connection therewith, the Debtors (a) evaluate existing and
19 historical operating sites for potential releases of hazardous materials by performing site investigations
20 and conducting human health and ecological assessments, and (b) design, implement, and perform
21 remedial measures at designated sites to address ongoing or potential exposure risks. The Debtors use
22 a number of third-party environmental contracting and consulting firms in the administration of the
23 Environmental Cleanup Programs, as well as outside legal firms to provide guidance and direction on
24

25
26 ²⁶ Such authorities include: Cal. Pub. Util. Code §§ 379, 8325 and 8326, and PG&E’s Electric
27 Preliminary Statement DB (Nuclear Decommissioning Adjustment Mechanism), https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_DB.pdf; and CPUC Decision 94-05-020, and
28 PG&E’s Electric Preliminary Statement Part S (Hazardous Substance Mechanism), [https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_S%20\(Prelim\).pdf](https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_S%20(Prelim).pdf).

1 legal and regulatory issues, to manage regulatory and third-party claims with respect to environmental
2 issues, and to assist in the development of environmental policies.

3 Additionally, the Debtors' routine work includes active decommissioning of the Debtors'
4 Humboldt Bay nuclear facility and decommissioning planning activities of the Debtors' DCCP. I
5 understand based on discussion with counsel that federal law requires all operators of nuclear facilities
6 to create and fund a nuclear decommissioning trust fund with adequate funds to decommission those
7 facilities such that they present no risk to public health and safety or the environment when they are
8 removed from service.²⁷

9 The Debtors collect and recover hazardous substance clean up and litigation costs, net of
10 related insurance recoveries, as approved by the CPUC. The CPUC allows for the recovery of eligible
11 costs at CPUC-approved manufactured gas plant sites, federal superfund sites, and other specified
12 sites. Additionally, I understand based on discussions with counsel that Section 8326 of the California
13 Public Utilities Code and CPUC decisions and orders require that the Debtors periodically estimate the
14 costs associated with the Debtors' nuclear decommissioning efforts, seek CPUC authorization for the
15 funding of such costs, and deposit such funding into externally managed and segregated nuclear
16 decommissioning trusts (collectively, the "**Decommissioning Trusts**").²⁸ The Debtors routinely seek
17 reimbursement from the Decommissioning Trusts for prudent decommissioning expenditures approved
18 by the CPUC.

19 Following approval by the CPUC, the projected costs associated with the Environmental
20 Cleanup Programs (the "**ECP Costs**") are funded through various surcharges and fees collected by the
21 Debtors through rates from Customers (the "**ECP Funds**"). In order to meet the objectives of the
22 Environmental Cleanup Programs, the CPUC has approved \$130.8 million in ECP Costs for 2019. As
23 of the Petition Date, the Debtors estimate that approximately \$39.4 million in ECP Costs owed to third
24 parties are accrued and unpaid, all of which the Debtors estimate will come due within thirty (30) days
25 after the Petition Date.

26
27 ²⁷ 10 CFR 50.82 and 50.75.

28 ²⁸ See Cal. Pub. Util. Code §§ 8325-26.

1 The funds collected, allocated, and distributed by the Debtors on account of the Environmental
2 Cleanup Programs are tracked by the Debtors through regulatory “balancing accounts” or ratemaking
3 adjustments required by the CPUC for legal ratemaking purposes. The ratemaking accounts and
4 mechanisms which recover the costs associated with these activities include the “Hazardous Substance
5 Mechanism’s Hazardous Substance Cost Recovery Account” and the “Nuclear Decommissioning
6 Adjustment Mechanism.”²⁹ All costs recorded in these accounts are reserved for the payment of ECP
7 Costs as approved by the CPUC. Surplus funds remaining in the Hazardous Substance Cost Recovery
8 Account at the end of the year are either rolled over and allocated to Environmental Cleanup Programs
9 for the next fiscal year or refunded to Customers through rate adjustments.

10 4. The Third-Party Programs

11 Under programs authorized by statute and CPUC decisions, the Debtors act as servicing and
12 billing agents to third parties (e.g., private utility providers) that sell electricity or natural gas directly
13 to retail customers using the Debtors’ transmission and distribution facilities.³⁰ Under such
14 arrangements, the Debtors send invoices to, and collect money from, Customers on behalf of the third
15 parties and then remit such payments to the third parties.

16 The programs under which such third parties provide this electricity or natural gas are known
17 as Community Choice Aggregation, Direct Access, and Core Gas Aggregation. The third-party
18 entities providing service under these programs are known, as Community Choice Aggregators
19 (“CCAs”), Energy Service Providers (“ESPs”), and Core Transport Agents (“CTAs”), respectively.
20 In addition, the Debtors act as billing agent for the California Department of Water Resources
21 (“DWR”), which has purchased energy on behalf of Customers and recovers financing costs from
22 Customers using the Debtors’ billing system and other facilities. The Third-Party Programs that
23 deliver electricity serve over 3 million customers and are anticipated to account for approximately 40%
24 of the electricity load in the Debtors’ territory.

25 ²⁹ PG&E’s Electric Preliminary Statement Part S (Hazardous Substance Mechanism), [https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_S%20\(Prelim\).pdf](https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_S%20(Prelim).pdf); and PG&E’s Electric
26 Preliminary Statement DB (Nuclear Decommissioning Adjustment Mechanism), https://www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_DB.pdf.

27 ³⁰ Such statutes include Cal. Pub. Util. Code §§ 365.1 and 366 (direct access), 366.2 (community
28 choice aggregation), and Cal. Water Code § 80110a.

1 The Debtors receive fees and revenues from Customers of the third parties to reimburse the
2 Debtors for their costs of delivering the electricity and natural gas over the Debtors' utility
3 transmission and distribution system and for acting as servicing and billing agent. In addition to
4 amounts owed to the Debtors from such Customers, the Debtors also collect from such Customers
5 amounts owed to the third parties for the electricity and natural gas supplied by the third parties (the
6 **"TPP Funds"**). Remittance of such pass-through revenues by the Debtors to the third parties in
7 connection with the Third-Party Programs (the **"TPP Costs"**) ranges from daily to weekly.

8 Failure to provide third party providers with revenue owed to them under the Third Party
9 Programs for purchases of their electricity and natural gas would improperly interfere with their
10 relationships with their Customers and could jeopardize the continued supply of electricity and natural
11 gas to their Customers who rely on the same. With over 3 million Customers serviced with electricity
12 pursuant to the Third-Party Programs—which is anticipated to account for approximately 40% of the
13 electricity load in the Debtors' territory in 2019—the normal and uninterrupted remittance of Customer
14 payments through the Debtors to CCAs, ESPs, CTAs, and DWR is of the utmost importance in order
15 for such entities to meet their obligations to such customers and their suppliers, contractors, and
16 lenders.

17 Based on historical averages, on a monthly basis the aggregate amount of the TPP Funds
18 received by the Debtors is approximately \$181.2 million. As of the Petition Date, the Debtors estimate
19 that approximately \$52.6 million in TPP Costs are payable to third parties, all of which the Debtors
20 estimate will come due during the Interim Period.

21 **5. The GHG Credit Programs**

22 I understand based on discussion with counsel that, pursuant to statutes enacted by the
23 California Legislature and regulations issued by the California Air Resources Board,³¹ California
24

25 ³¹ Such statutes and regulations include Assembly Bill (AB) 32, the California Air Resources Board
26 regulations implementing AB 32, and the Low Carbon Fuel Standard regulation issued by the
27 California Air Resources Board. *See* California Global Warming Solutions Act of 2006, Cal. Health &
28 Safety Code §§ 38500, *et. seq.*; Low Carbon Fuel Standard (LCFS), Cal. Code of Regs. tit. 17, §§
95480- 95503. Decisions of the California Public Utilities Commission authorize PG&E to issue CC
Credits (as defined below) to retail customers under AB 32, and also authorize PG&E to participate in
the LCFS (as defined below) program and distribute LCFS Credits to customers.

1 businesses that emit GHGs, such as the Debtors, are mandated to reduce their emissions of GHGs and
2 provide credits to Customers to give them incentives to do the same. For example, the Debtors issue
3 semi-annual California Climate Credits for electric Customers and annual California Climate Credits
4 for natural gas Customers (“**CC Credits**”). In addition, the Debtors administer the Low Carbon Fuel
5 Standard (“**LCFS**”) credit program. Pursuant to such program, the Debtors administer and distribute
6 point of purchase rebates to Customers who switch from a gasoline-powered vehicle to an electric
7 vehicle (“**LCFS Credits**”).

8 Following approval by the CPUC, the projected costs associated with the CC Credits (the “**CC**
9 **Costs**”) are funded through various surcharges and fees collected by the Debtors through rates from
10 Customers and revenues accrued from the monetization of credits by the Debtors. The CPUC has
11 approved approximately \$443.1 million in CC Costs for the Debtors’ issuance of CC Credits for 2019.
12 The LCFS Credits provided to Customers are funded by the Debtors’ monetization of LCFS credits
13 earned by the Debtors from the ARB for their GHG compliance. The Debtors sell their LCFS credits
14 in the open market to other GHG emitting businesses who buy them to offset their own compliance
15 costs (the funds collected through rates and revenues from the monetization of CC Credits and LCFS
16 credits collectively, the “**GHG Funds**” and the CC Credits and LCFS Credits provided using the GHG
17 Funds including administrative costs, the “**GHG Costs**”). The GHG Funds are typically tracked by the
18 Debtors through regulatory “balancing accounts” required by the CPUC for legal ratemaking purposes.
19 As of the Petition Date, the Debtors estimate that approximately \$128.9 million in GHG Costs are
20 accrued and unpaid. The Debtors do not expect that any of such amounts will come due during the
21 Interim Period.

22 **6. The Customer Support Programs**

23 In the ordinary course of business, the Debtors support Customers through a variety of product
24 offerings, which provide the Debtors with additional revenue to offset and reduce the rates paid by gas
25 and electric Customers. For example, the Debtors license and lease space on the Debtors’ assets (such
26 as towers, conduit, and fiber network), to enable Customers to install equipment to provide
27 telecommunications services in California. If Customers request installation of or modifications to
28 such equipment, the Debtors engage with contractors and other vendors to perform such work for the

1 benefit of the Customers. The Debtors also support private and public sector Customers seeking
2 sustainable solutions by acting as a general contractor for Customer projects that range from replacing
3 heating systems for large institutional or government Customers to replacing street lights with LED
4 lights for municipalities. The Debtors subcontract such projects to completion. In 2018, the Debtors
5 estimate that they supported more than 100 Customers through their Customer Support Programs.

6 The subcontractors and other vendors engaged by the Debtors to complete Customer Support
7 Program projects perform their work under work authorizations with the Debtors. The Debtors receive
8 invoices from the subcontractor first and then invoice the Customer for the same amount plus a
9 markup. If the Debtors do not remit payment to a subcontractor, the subcontractor may refuse to
10 complete the project and may result in the imposition of liens by the contractors on Customer property.
11 Such refusal could jeopardize the Customer's project, the Debtors' relationship with the Customer, any
12 financing obtained by the Customer to fund the project and, as a result, the Debtors' revenue associated
13 therewith. In addition, a contractor's refusal to perform could result in a breach of the Debtors'
14 performance obligations under its agreement with the Customer. As of the Petition Date, the Debtors
15 estimate that they owe approximately \$12.7 million to contractors and vendors pursuant to the
16 Customer Support Programs (the "**CSP Costs**"), and that approximately \$5.3 million will come due
17 within thirty (30) days after the Petition Date. As noted above, all of such amounts will be recovered
18 from Customers.

19 As indicated above, I understand based on discussions with counsel that most of the Customer
20 Programs are the subject of statutory or regulatory mandates. Additionally, with respect to the Public
21 Purpose Programs and the GHG Credit Programs, California statutes and regulations mandate that all
22 PPP Funds and GHG Funds be set aside for the express purpose of funding public interest programs
23 and issuing credits to Customers that are designed to benefit the broader public interests. Failure to
24 fund the Public Purpose Programs and the GHG Credit Programs with the proceeds specifically
25 designated therefor, including payment of prepetition costs, would be in direct conflict with regulatory
26 requirements and unwarranted under the circumstances. With respect to the Environmental Cleanup
27 Programs, any suspension or delay in administering the Environmental Cleanup Programs is contrary
28

1 to public health and welfare and may exacerbate not only existing circumstances but the ultimate costs
2 of cleanup as well.

3 Furthermore, because of the unique nature and scale of their business operations, the Debtors'
4 Customers will be particularly vulnerable to any suspension of the Debtors' obligations under the
5 Deposit and Reimbursement Programs, and the ripple effects of any suspension could be far reaching.
6 If lower-income residential Customers, for example, are unable to receive their Security Deposit
7 Refunds, they may be deprived of necessary funds and be subject to undue hardship. Customers who
8 have budgeted for the use of the Security Deposit Refunds may be unable to meet their day-to-day
9 financial commitments, including, for Customers who have left the utility's service area, establishing
10 credit with another utility using the funds from their Security Deposit Refund.

11 Accordingly, I respectfully submit that honoring all Customer Program Obligations, including
12 payment of Security Deposit Refunds, MLX Deposit Refunds, UG Costs, OCP Costs, PPP Costs, ECP
13 Costs, TPP Costs, GHG Costs, and CSP Costs in the ordinary course as they come due, including all
14 prepetition amounts, is a prudent and sound exercise of the Debtors' business judgment and should be
15 approved.

16 I respectfully submit that payment of the Customer Program Obligations is necessary to avoid
17 immediate and irreparable harm because (a) failure to make such payments may cause the Debtors to
18 violate statutory and regulatory mandates, (b) failure to pay the Security Deposit Refunds, and MLX
19 Deposit Refunds, may inflict a significant hardship on the Debtors' Customers, (c) failure to pay the
20 prepetition OCP Costs, UG Costs, PPP Costs, ECP Costs, GHG Costs, and CSP Costs will threaten the
21 viability of the UG Programs, Other Customer Programs, Public Purpose Programs, Environmental
22 Cleanup Programs, GHG Credit Programs, and Customer Support Programs and undermine public
23 confidence in the Debtors, and (d) failure to pay the pass-through TPP Costs will threaten the viability
24 of certain third party entities and the continued supply of electricity and natural gas to certain
25 customers.

26 **VI. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 363(b), AND 503(b) AND**
27 **FED. R. BANKR. P. 6003 AND 6004 (I) FOR INTERIM AND FINAL AUTHORITY TO**
28 **PAY PREPETITION OBLIGATIONS OWED TO SHIPPERS, WAREHOUSEMEN,**
AND OTHER LIEN CLAIMANTS, AND (II) GRANTING ADMINISTRATIVE

EXPENSE PRIORITY STATUS FOR CLAIMS ARISING FROM GOODS DELIVERED TO THE DEBTORS POSTPETITION (THE “LIEN CLAIMANTS MOTION”)

Pursuant to the Lien Claimants Motion, the Debtors request (i) interim and final authority to pay the prepetition claims (the “**Lien Claims**”) of certain third-party shippers, warehousemen, vendors, and other service providers or contractors that may be permitted to assert statutory or possessory liens against the Debtors’ property and equipment if the Debtors fail to pay the prepetition amounts owed to those parties for their various goods and services (collectively, the “**Lien Claimants**”), and (ii) granting administrative priority status to all undisputed obligations of the Debtors owing to third-party vendors and suppliers arising from the postpetition delivery of goods ordered prior to the Petition Date and authorizing the Debtors to pay such obligations in the ordinary course of business.

A. The Lien Claimants.

The Debtors routinely transact business with a number of entities that provide goods and services that may be permitted to assert statutory or possessory liens against the Debtors’ property and equipment if the Debtors fail to pay for those parties’ various goods or services. The Lien Claimants generally fall into the following categories: (i) Shippers, (ii) Warehousemen, and (iii) Maintenance and Repairmen (each as defined below). Each of these categories of Lien Claimants is discussed in further detail below.

As of the Petition Date, the Debtors estimate that they owe approximately \$65,500,000 on account of Lien Claims, of which approximately \$25,800,000 will come due during the Interim Period.³² A chart outlining the various categories and approximate amounts of the Lien Claims that the Debtors are seeking authority to pay pursuant to the Lien Claimants Motion on an interim and final basis is set forth below:

³² Concurrently with the Lien Claimants Motion, the Debtors have filed the Operational Integrity Suppliers Motion (as defined below). Although the Debtors have endeavored to provide accurate figures and calculations herein, there may, in some instances, be overlap between the amounts sought to be paid pursuant to the Lien Claimants Motion and the amounts sought to be paid pursuant to the Operational Integrity Suppliers Motion.

Categories	Approx. Amount Seeking to Pay on Interim Basis	Approx. Amount Seeking to Pay on Final Basis
Shippers	\$1,800,000	\$6,000,000
Warehouseman	\$4,800,000	\$4,800,000
Maintenance and Repairmen	\$19,200,000	\$54,700,000
Total Approx. Lien Claims	\$25,800,000	\$65,500,000

Shippers. In the ordinary course of business, the Debtors purchase natural gas (the “**Purchased Natural Gas**”) from entities operating in all of the major natural gas basins in western North America, including basins in western Canada, the Rocky Mountains, and the southwestern United States. Although the Debtors own and operate over 6,400 miles of transmission pipelines, these pipelines do not connect directly to the Debtors’ natural gas sources. Therefore, it is necessary for the Debtors to rely on third-party transportation service providers (the “**Shippers**”) to transport Purchased Natural Gas from their sources to the Debtors’ transmission pipelines so that the Debtors may deliver natural gas to their residential, commercial, industrial, and agricultural customers and to fuel the Utility’s gas-fired electric generation facilities in northern and central California. The Debtors’ ability to operate in the ordinary course, therefore, depends on their ability to take delivery of and transport Purchased Natural Gas in a timely fashion. Additionally, the Debtors also rely on Shippers for the transportation of piping supplies, valves, replacement parts and other materials, all of which are integral to the day to day operations of their business.

It is my understanding based upon discussions with counsel that, if the Debtors fail to pay their Shippers in a timely manner, the Shippers may seek to assert statutory or possessory liens against Purchased Natural Gas or other materials and property that is in their possession with respect to any delinquent charges, potentially blocking the Debtors’ access to the Purchased Natural Gas and such materials and property that is in transport.³³ Further, in many cases, only one third-party transportation

³³ For example, section 7307 of California’s Commercial Code provides in pertinent part that:

1 service provider is capable of transporting Purchased Natural Gas or other materials from a given
2 source, leaving the Debtors with no choice but to rely on a particular Shipper. With millions of
3 dollars' worth of Purchased Natural Gas and other materials and property in transit at any given time,
4 the cost of a disruption to the Debtors' operations that could be caused by the Shippers' exercising
5 their rights likely far outweighs the prepetition amounts owed to the Shippers.

6 The Debtors estimate that the aggregate amount owed to Shippers for services provided during
7 the period before the Petition Date is approximately \$6,000,000, of which the Debtors are requesting
8 authority to pay approximately \$1,800,000 on an interim basis.

9 *Warehousemen.* In the ordinary course of business, the Debtors store natural gas that they
10 purchase in various storage facilities (the "**Stored Natural Gas**"). The Debtors procure gas storage
11 capacity as a tool to ensure reliability, in order to inject and withdraw gas to ensure compliance with
12 system requirements, and to balance their position and serve load. Additionally, the Debtors store
13 large diameter pipes used for natural gas pipelines, valves, natural gas replacement pipes and fittings,
14 cables, wiring, and other parts for the electrical grid, and other property in certain third party
15 warehouse facilities. Because the Debtors operate only three storage facilities of their own, all of
16 which have limited capacity, they rely on the services of these third-party storage providers (the
17 "**Warehousemen**").

18 It is my understanding based upon discussions with counsel that, if the Debtors fail to pay their
19 Warehousemen in a timely manner, the Warehousemen may seek to assert statutory or possessory liens
20 against the Debtors' property that is in their possession; potentially blocking the Debtors' access to the
21
22
23
24

25 A carrier has a lien on the goods covered by a bill of lading or on the
26 proceeds thereof in its possession for charges after the date of the
27 carrier's receipt of the goods for storage or transportation, including
demurrage and terminal charges, and for expenses necessary for
preservation of the goods incident to their transportation or reasonably
incurred in their sale pursuant to law.

28 California Code, Commercial Code – COMM § 7307.

1 Stored Natural Gas and other materials that are necessary for the business operations.³⁴ The Debtors
2 estimate that the aggregate amount owed to Warehousemen for services provided during the period
3 before the Petition Date is approximately \$4,800,000, all of which is estimated to come due during the
4 Interim Period.

5 *Maintenance and Repairmen.* Certain of the Lien Claimants provide maintenance and repair
6 services on the Debtors' vast network of production, transmission, and distribution facilities, including
7 the Debtors' generation units and gas facilities (the "**Maintenance and Repairmen**"). The
8 Maintenance and Repairmen, among other things, maintain, repair, refurbish, and replace components
9 of the Debtors' facilities and equipment and provide fuel and parts for the Debtors' generation units.
10 Many of the Maintenance and Repairmen are not under contract to perform future services, but rather
11 perform work and related services on an order-by-order basis. If the Debtors become delinquent in
12 their payments for such goods provided or services rendered, the Maintenance and Repairmen may
13 assert liens, including mechanics' liens and materialman's liens, against the Debtors' property for the
14 amounts owed. Additionally, those Maintenance and Repairmen that do have contracts with the
15 Debtors may have been granted liens or other interests pursuant to such agreements to secure amounts
16 owed to them under their relevant agreements. The Debtors estimate that the aggregate amount owed
17 to Maintenance and Repairmen for goods and services provided during the period before the Petition
18 Date is approximately \$54,700,000, of which the Debtors are requesting authority to pay
19 approximately \$19,200,000 on an interim basis.

20 In addition to having secured claims, if the Debtors are unable to satisfy the Lien Claims as
21 requested in the Lien Claimants Motion, the Lien Claimants may refuse to provide critical ongoing
22 goods or services to the Debtors or may seek to enforce their rights and liens on account of such
23 claims. Accordingly, the Debtors seek authority to pay and discharge, on a case-by-case basis, the
24 Lien Claims that the Debtors believe have created, or could give rise to, a lien against the Debtors'

25
26 ³⁴ See California Code, Commercial Code – COMM § 7209 ("A warehouse has a lien against the bailor
27 on the goods covered by a warehouse receipt or storage agreement or on the proceeds thereof in its
28 possession for charges for storage or transportation, including demurrage and terminal charges,
insurance, labor, or other charges, present or future, in relation to the goods, and for expenses
necessary for preservation of the goods or reasonably incurred in their sale pursuant to law.")

1 property or equipment, regardless of whether such Lien Claimants already have actually perfected their
2 interests.

3 **B. The Prepetition Orders**

4 In addition to the relief requested with respect to the Lien Claimants, as of the Petition Date,
5 the Debtors have certain prepetition purchase orders outstanding with various third-party vendors and
6 suppliers (the “**Vendors**”) for goods ordered by the Debtors that have not yet been delivered by the
7 Vendors to the Debtors’ facilities (the “**Prepetition Orders**”). These Vendors may be concerned that,
8 because the Debtors’ obligations under the Prepetition Orders arose prior to the Petition Date, such
9 obligations will be treated as general unsecured claims in the Chapter 11 Cases. Accordingly, certain
10 Vendors may refuse to provide goods purchased (or may recall shipments thereof) pursuant to the
11 Prepetition Orders unless the Debtors issue substitute purchase orders postpetition or obtain an order of
12 the Court confirming that all undisputed obligations of the Debtors arising from the postpetition
13 delivery of goods subject to Prepetition Orders are afforded administrative expense priority status
14 under section 503(b) of the Bankruptcy Code.

15 I respectfully submit that the relief requested in the Lien Claimants Motion represents an
16 exercise of sound business judgment and is necessary to facilitate a successful reorganization.
17 Authorizing the Debtors to pay the Lien Claims is in the best interests of the Debtors, their estates, and
18 all parties in interest. The Lien Claimants provide valuable shipping, warehousing, and maintenance
19 and repair services to the Debtors, and certain of the Lien Claimants currently hold goods and property
20 that are necessary to the Debtors’ continued operations. It is my understanding based upon discussions
21 with counsel that, if the Debtors do not pay the Lien Claims, the Shippers and Warehousemen likely
22 will assert possessory liens on the Debtors’ property and thereby prevent access to goods necessary to
23 the Debtors’ ongoing operations. Similarly, the Maintenance and Repairmen will assert mechanics’
24 and materialman’s liens on the Debtors’ properties, thereby securing the outstanding amounts they are
25 owed. Under these circumstances, I respectfully submit that having the authority to satisfy these
26 claims not only will avoid any disruptions to their operations and the ability to provide utility service
27 to their customers, but should not prejudice any other parties in interest by reason of the lien rights
28 held by the Lien Claimants.

1 Accordingly, I respectfully submit that the relief requested in the Lien Claimants Motion is
2 necessary and appropriate, is in the best interests of their estates and all parties in interest, is necessary
3 to avoid immediate and irreparable harm to the Debtors, and should be granted.

4 **VII. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 363(b), AND 503(b)(9)**
5 **AND FED. R. BANKR. P. 6003 AND 6004 FOR INTERIM AND FINAL AUTHORITY**
6 **TO PAY PREPETITION OBLIGATIONS OWED TO CERTAIN SAFETY AND**
7 **RELIABILITY, OUTAGE, AND NUCLEAR FACILITY SUPPLIERS (THE**
8 **“OPERATIONAL INTEGRITY SUPPLIERS MOTION”)**

9 Pursuant to the Operational Integrity Suppliers Motion, the Debtors are seeking interim and
10 final authority to pay the prepetition claims (the **“Operational Integrity Supplier Claims”**) of certain
11 vendors, suppliers, service providers, and other similar parties and entities that are essential to
12 protecting the public health and maintaining the going-concern value and integrity of the Debtors’
13 businesses and operations (the **“Operational Integrity Suppliers”**).

14 In the normal and day to day operation of their business, the Debtors rely heavily on
15 Operational Integrity Suppliers for essential and specialized goods and services so that the Debtors can
16 provide safe and reliable electric and natural gas service to their customers’ homes and businesses,
17 while remaining in compliance with all applicable state and federal laws and regulations.

18 The Debtors spend an average of approximately \$1.9 billion per month on goods and services
19 provided by third party vendors and suppliers. As of the Petition Date, the Debtors estimate that they
20 owe approximately \$116,200,000 on account of Operational Integrity Supplier Claims (the
21 **“Operational Integrity Supplier Cap”**), of which approximately \$30,100,000 will come due in the
22 Interim Period.³⁵ These amounts represent approximately 5.5% of the Debtors’ total outstanding trade
23 debt as of the Petition Date. A chart outlining the representative categories and approximate amounts
24 of the Operational Integrity Supplier Claims that the Debtors are seeking authority to pay pursuant to
25 the Operational Integrity Suppliers Motion on an interim and final basis is set forth below. The
26 estimated amounts of Operational Integrity Supplier Claims set forth herein and in the chart below are

27 ³⁵ Concurrently with the Operational Integrity Suppliers Motion, the Debtors filed the Lien Claimants
28 Motion. Although the Debtors have endeavored to provide accurate figures and calculations herein,
there may, in some instances, be overlap between the amounts sought to be expended pursuant to the
Operational Integrity Suppliers Motion and the amounts sought to be expended pursuant to the Lien
Claimants Motion.

exclusive of any amounts that may be owed to Operational Integrity Suppliers that may be entitled to administrative expense priority pursuant to section 503(b)(9) of the Bankruptcy Code (the “**503(b)(9) Claims**”). Pursuant to the Operational Integrity Suppliers Motion, the Debtors also request authority to pay the 503(b)(9) Claims of any Operational Integrity Supplier to the extent the Debtors determine it is necessary and appropriate in accordance with the procedures and protocol set forth therein; provided, however, any amounts paid by the Debtors in satisfaction of such 503(b)(9) Claims shall not be included in or subject to the Operational Integrity Supplier Cap.

Representative Categories of Operational Integrity Suppliers	Approx. Amount Seeking to Pay on Interim Basis	Approx. Amount Seeking to Pay on Final Basis
Safety and Reliability Vendors and Service Providers	\$28,600,000	\$110,600,000
Outage Vendors and Service Providers	\$1,200,000	\$4,500,000
Nuclear Facility Vendors and Service Providers	\$300,000	\$1,100,000
Total Estimated Operational Integrity Supplier Claims	\$30,100,000	\$116,200,000

A. The Debtors’ Operational Integrity Suppliers

In order to fulfill their obligations to provide safe electric and natural gas service to their approximately 16 million customers in northern and central California, the Debtors rely on the goods and services provided by the Operational Integrity Suppliers to maintain and safely and reliably operate their vast network of production, transmission, and distribution facilities. Due to the complex, technical, and potentially hazardous nature of the Debtors’ facilities, the Debtors often do business with a select vendor for particular goods or services and rely on such vendor as the Debtors’ primary supplier or service provider (i.e., the supply source for certain complex parts and specialty equipment, specifically designed systems, and specialized labor necessary to the Debtors’ operations). Additionally, certain of the Operational Integrity Suppliers have developed capabilities and expertise specific to the Debtors’ needs that cannot be easily or cost-effectively replaced, if at all, and which

would be lost if the Debtors were forced to seek similar services elsewhere. Further, due to the myriad of federal and state regulations under which the Debtors operate, many of the Operational Integrity Suppliers are required to possess certain certifications, permits, or licenses in order to provide goods or services to the Debtors. The universe of vendors that possess such certifications, permits, or licenses is limited, and, thus, the Debtors are likely to encounter significant difficulty replacing such Operational Integrity Suppliers on a timely basis, if at all.

The Operational Integrity Suppliers generally fall into three primary categories: (i) entities that provide goods and services necessary for safe and reliable electric and natural gas service (the “**Safety and Reliability Vendors**”); (ii) entities that provide goods and services related to planned and unplanned outages (the “**Outage Vendors**”); and (iii) entities that provide goods and services in connection with the Debtors’ operation and decommissioning of their nuclear reactor power units (the “**Nuclear Facility Vendors**”). Each of these categories of Operational Integrity Suppliers is discussed in further detail below.

1. Safety and Reliability Vendors

Safety is a core value for a utility company. The potentially hazardous nature of the transmission and distribution of electricity and natural gas and the generation of electricity mandates a focus on the safety of the public, the Debtors’ workforce, and the Debtors’ contractors. Further, reliable electric and natural gas service is of the utmost importance to the safety, health, and welfare of the Debtors’ customers and their communities, as well as to the efficiency of the economy of central and northern California.

The Safety and Reliability Vendors generally fall into one or more of the following subcategories: (i) entities that provide goods and services that are highly specialized (the “**Specialized Vendors**”) and/or closely integrated with the Debtor’s business operations and customer relationships (the “**Integrated Vendors**” and, together with the Specialized Vendors, the “**Specialized and Integrated Vendors**”); (ii) select, pre-qualified, or geographically limited providers of critical goods (the “**Critical Goods Vendors**”); and (iii) entities that provide goods and services related to the Debtor’s regulatory compliance obligations (the “**Regulatory Compliance Vendors**”).

a) **Specialized and Integrated Vendors**

The Debtors rely on Specialized and Integrated Vendors to provide specialized services that are closely integrated with the Debtors' transmission, distribution, generation, and retail business operations. In certain cases, the Debtors must obtain the services of a Specialized Vendor because state and federal laws and regulations require vendors to possess certain certifications, permits, licenses, particular knowledge, or technical "know-how." Consequently, certain services (*e.g.*, electrical, line-related, welding, waste-removal, earth-moving, information-technology, security, and cybersecurity services) may only be performed by Specialized Vendors due to the risks posed by the nature of the Debtors' facilities, which expose Specialized Vendors to, among other things, high-voltage electricity, high-pressure gas, high-speed rotation motors, and potentially hazardous or radioactive substances. A very limited number of vendors possess the certifications, permits, licenses, knowledge, technical "know-how," experience, or safety qualifications necessary to perform the services that are provided by the Specialized Vendors, and, therefore, such vendors cannot be easily replaced.

For example, the Debtors rely on Specialized Vendors such as wildland firefighting and rescue servicers to provide onsite fire suppression services. The Debtors also rely on Specialized Vendors to provide base camp services for the Debtors' personnel. These base camp services include providing materials to support the Debtors' fleet operations, and providing telecommunications, electrical support, housing, and meals for the Debtors' personnel on the field.

Integrated Vendors provide the Debtors with certain customer-facing services, such as customer outreach and account management (*e.g.*, establishing and disconnecting service, metering, billing, and collecting payments). These services are crucial to maintaining the Debtors' customer relationships and executing their business strategies. Even if the Debtors could identify substitute or replacement vendors in a timely fashion that possess the necessary qualifications, experience, and skill to provide these customer-facing services, the Integrated Vendors have specific knowledge of the Debtors' business operations, facilities, and customer demands, which knowledge has been developed over the course of the Debtors' longstanding relationships with the Integrated Vendors and which cannot be easily replaced. Moreover, attempting to replace the Integrated Vendors during this critical

1 early period of the Chapter 11 Cases likely would cause significant disruption to the Debtors'
2 operations and relationships with their customers, to the detriment and prejudice of all parties in
3 interest.

4 **b) Critical Goods Vendors**

5 The Debtors rely on Critical Goods Vendors to supply essential electrical and gas equipment,
6 specialized materials and replacement parts, operations consumables, raw materials, fuels, and certain
7 other goods required to operate the Debtors' electric and natural gas transmission and distribution
8 systems and generation units. In some cases, there is no alternative provider for certain of these
9 critical goods. For example, certain Critical Goods Vendors supply the Debtors with specialized
10 electrical equipment, transformers, specially fabricated repair and replacement parts, and other
11 equipment necessary for the Debtors' transmission, distribution, generation, and gas assets. These
12 parts and materials are based on patented or trade-secreted designs and are available only from limited
13 sources.

14 In other cases, alternative vendors cannot supply the requisite critical goods in sufficient
15 quantity or with sufficient reliability, or such vendors are unable to supply critical goods of sufficient
16 quality on a cost-effective or timely basis in the appropriate geographic areas. For example, the
17 modern electrical grid relies on switch gear, transformers, and other state-of-the-art equipment to
18 manage advanced electronic metering, communications, and control technologies. Maintaining the
19 reliability of the electrical transmission and distribution system, therefore, requires the immediate
20 availability of replacement parts for this critical equipment when such equipment is out of service.
21 Similarly, certain of the Debtors' electricity generation facilities are designed to utilize bulk quantities
22 of specialized chemicals as part of their energy-production and pollution-control activities. Due to the
23 chemical specifications and the quantities involved, the Debtors are dependent on a few Critical Goods
24 Vendors to keep the electricity generation facilities in operation. Certain raw materials and fuels used
25 in the Debtors' generation facilities and gas assets are sourced locally because of the expense and
26 inefficiency associated with transporting such materials and fuels. In many cases, there may be limited
27 capacity to provide critical equipment, materials, or fuels within the general vicinity of a given electric
28 or natural gas transmission or distribution asset or generation facility.

c) Regulatory Compliance Vendors

The Debtors rely on Regulatory Compliance Vendors to assist in complying with various state and federal laws and regulations. For example, among other things, the Debtors rely on certain Regulatory Compliance Vendors to (i) manage the vegetation that grows near the Debtors' transmission and distribution lines, (ii) perform safety checks and quality-assurance monitoring on electric transmission and distribution equipment, (iii) test emissions from the Debtors' facilities to ensure compliance with environmental laws and regulations, and (iv) remove regulated waste and chemicals from the Debtors' facilities for proper disposal.

The services provided by the Regulatory Compliance Vendors are critical to maintaining the safety and compliance of the Debtors' operations. Proper vegetation management reduces the risk of creating dangerous or hazardous conditions within the Debtors' service area. Even the briefest disruption in the services provided by the Regulatory Compliance Vendors could cause significant disruption to the Debtors' operations or increase the risk to the public. In addition, proper disposal of regulated waste and chemicals not only protects the environment and benefits the public health, but also ensures the safety of the Debtors' employees. Further, absent the services provided by the Regulatory Compliance Vendors, governmental entities may attempt to take various actions that would have severe negative consequences on the Debtors' operations, including levying fines or penalties against the Debtors, disallowing cost recovery for such services, requiring that certain of the Debtors' facilities be idled or closed, or potentially revoking the Debtors' permits or licenses.

2. Outage Vendors

The Debtors regularly plan outages of certain of their electric transmission and distribution assets, generation units, and gas facilities. During such planned outages, Outage Vendors perform maintenance on and repair, replace, upgrade, refuel, refurbish, and stress-test the Debtors' generation and gas assets in an effort to ensure that such assets perform optimally during periods when electricity and gas consumption are at their peak. The Debtors schedule the planned outages for the least amount of time possible.

Additionally, certain unplanned outages occur, oftentimes as a result of natural hazards or mechanical failures, particularly during storm season. To restore service to their customers as quickly

1 as possible, the Debtors utilize Outage Vendors to assist their crews in repairing power lines, poles,
2 and transmission equipment. Certain of the Outage Vendors also provide critical monitoring services
3 during storms or periods of high wind to reduce the occurrence and/or impact of unplanned outages.

4 The Debtors' Outage Vendors are skilled professionals and have specialized knowledge
5 necessary to safely and reliably perform the required tasks during both planned and unplanned outages.
6 It would be difficult for the Debtors to replace the Outage Vendors in a quick, safe, and cost-efficient
7 manner and, therefore, the Outage Vendors are necessary and critical to the Debtors' operations.

8 Any delay in obtaining goods and services from the Outage Vendors likely would extend the
9 duration of both planned and unplanned outages, which, in addition to increasing the cost of the
10 outages, would adversely impact the reliability of the Debtors' electric transmission and distribution
11 assets, generation units, and gas facilities, as well as the supply of electricity and gas to the Debtors'
12 customers.

13 3. Nuclear Facility Vendors

14 The Nuclear Facility Vendors provide goods and services in connection with the Debtors'
15 operation and decommissioning of their nuclear reactor power units located at the DCPD and
16 Humboldt Bay Power Plant. The Nuclear Facility Vendors maintain, repair, inspect, and refurbish the
17 equipment located at these facilities and provide fuel and parts, as well as disposal, quality-control,
18 physical-plant-security, and cybersecurity services. The Debtors' nuclear operations and
19 decommissioning activities are subject to extensive oversight by the United States Nuclear Regulatory
20 Commission and other regulatory bodies. The Nuclear Facility Vendors are highly skilled and have
21 specialized knowledge in the nuclear reactor space. Replacing Nuclear Facility Vendors would be
22 difficult, time-consuming, and expensive. Any disruption with respect to the Debtors' current nuclear
23 assets could have significant regulatory consequences for the continued operation of those assets and
24 adversely affect the public safety and health, as well as the reliability of the California electricity
25 market.

26 The Operational Integrity Suppliers are essential to the Debtors' businesses and the lack of any
27 of their particular goods, services, or skills, even for a short duration, could present public health and
28 safety risks, would disrupt the Debtors' operations, and would cause irreparable harm to the Debtors

1 and their reorganization efforts under chapter 11. In addition, many of the Operational Integrity
2 Suppliers are smaller, independent, or regional operators and, given the already limited pool of such
3 vendors and service providers in the geographic area, which pool has been further limited by the
4 Debtors' current financial situation, it would be difficult (and at times impossible) to replace such
5 vendors or suppliers on a timely basis.

6 **B. Identification of the Operational Integrity Suppliers**

7 The Debtors, with the assistance of their advisors, spent significant time prior to the Petition
8 Date analyzing and reviewing their operations, books and records, accounts payable systems, and
9 prepetition vendor and service provider lists to identify those vendors, suppliers, and service providers
10 that are in fact critical to the Debtors' operations and public health and safety, the loss of which could
11 materially harm the Debtors' businesses and/or their customers and the public, in order to determine
12 the Operational Integrity Suppliers. Through this process, the Debtors considered the following
13 criteria: (i) whether a particular vendor or service provider is a select supplier or service provider; (ii)
14 whether the services provided by the vendor are so vital, or the vendors' operations are so intertwined
15 with the Debtors' businesses, that even the briefest disruption would raise safety or reliability risks or
16 cause significant harm to the Debtors' operations; (iii) whether the Debtors would be unable to obtain
17 comparable goods or services from alternative sources on a cost-effective basis within a reasonable
18 timeframe; (iv) whether the Debtors' current inventory levels or service coverage is sufficient to meet
19 customer demands while an alternative vendor or service provider could be located or qualified; (v)
20 whether a vendor is party to an executory contract with the Debtors; and (vi) whether the vendor or
21 service provider might be able to obtain (or has obtained) mechanics' liens, possessory liens, shippers'
22 liens, or similar state-law trade liens on property necessary for the Debtors' ongoing operations.

23 After evaluating the information relevant to the above criteria, the Debtors have and, upon
24 approval of the Court, will continue to designate, in their discretion, certain vendors as critical to the
25 Debtors' operations and, therefore, as Operational Integrity Suppliers. To do so, the Debtors have
26 designated a centralized, high-level team comprised of representatives of the Debtors' supply chain,
27 finance, treasury, and in-house legal departments (collectively, the "**Supplier Management**
28 **Committee**") to review, assess, and (if the relief requested in the Operational Integrity Suppliers

Motion is granted), authorize payment to Operational Integrity Suppliers. The Debtors and their advisors have already implemented a detailed protocol (the “**Payment Protocol**”) to route all requests for Operational Integrity Supplier treatment through the Supplier Management Committee and to educate procurement, payables, and operations personnel on the process.

1. Proposed Conditions to Receiving Payment

To minimize the amount of payments required if the relief sought in the Operational Integrity Suppliers Motion is granted, the Debtors will utilize the Payment Protocol to identify particular Operational Integrity Suppliers and pay Operational Integrity Supplier Claims. The Debtors’ Payment Protocol can be generally summarized as follows:

- i. All aspects of any proposed payment of an Operational Integrity Supplier Claim will be scrutinized for, among other things, the amount of payment at issue, the terms offered by the particular vendor, whether the supplier is party to an executory contract, and the business need for the goods or services at issue.
- ii. All requests for Operational Integrity Supplier treatment, or vendors refusing shipment of goods or the provision of services due to non-payment of prepetition claims, will be received and reviewed by the Debtors’ Supplier Management Committee. Operational Integrity Supplier Claims will not be paid unless approved by the Supplier Management Committee. Additionally, the Supplier Management Committee will consult with the Debtors’ outside legal and financial advisors, as necessary, to ensure compliance with the Payment Protocol and that only those claims that are essential to maintaining the Debtors’ operations are paid pursuant to the Operational Integrity Suppliers Motion.
- iii. In addition to approval from the Supplier Management Committee, any request for payment of an Operational Integrity Supplier Claim in excess of \$5,000,000 must be approved by the Debtors’ Chief Financial Officer.
- iv. The Debtors shall endeavor to document all proposed payments pursuant to an executed Vendor Agreement (as defined below).
- v. Payments may be executed by specifically designated members of the Debtors’ Supplier Management Committee when the Payment Protocol has been completed and upon presentation of completed documentation.

Although the Debtors and their advisors have effectively “pre-screened” certain vendors that have satisfied the criteria for Operational Integrity Supplier treatment, the Debtors are keenly aware that they must be prepared to address new or additional exigencies should they emerge, particularly in light of the size and scope of the Debtors’ operations. Thus, the Debtors’ Payment Protocol includes specific processes by which suppliers and vendors, including suppliers and vendors that may provide

1 essential goods or services outside of the aforementioned representative categories, may be designated
2 as “Operational Integrity Suppliers” on a case-by-case and ongoing basis.

3 2. Vendor Agreements

4 The Debtors propose to condition the payment of Operational Integrity Supplier Claims on the
5 agreement of individual Operational Integrity Suppliers to supply goods and services to the Debtors (i)
6 on the normal and customary trade terms, practices, and programs (including credit limits, pricing
7 rebates, cash discounts, timing of payments, coupon reconciliation, and other applicable terms and
8 programs) that were in effect between such Operational Integrity Supplier and the Debtors within the
9 twenty-four (24) month period prior to the Petition Date (the “**Customary Trade Terms**”), or (ii) such
10 other trade terms as agreed to by the Debtors and an Operational Integrity Supplier. If the Debtors are
11 unable to negotiate the continued supply of goods or the provision of services upon Customary Trade
12 Terms, the Debtors seek authority, based on their business judgment, to pay Operational Integrity
13 Suppliers all or a portion of their Operational Integrity Supplier Claims in return for the continued
14 supply of critical goods or the provision of services.

15 To ensure that Operational Integrity Suppliers continue doing business with the Debtors on
16 Customary Trade Terms or on such other terms as agreed to by the Debtors and an Operational
17 Integrity Supplier, the Debtors propose (i) that a letter substantially in the form attached to the
18 Operational Integrity Suppliers Motion as Exhibit B (the “**Vendor Agreement**”) be delivered to, and
19 executed by, the Operational Integrity Suppliers, along with a copy of the order granting the relief
20 requested in the Operational Integrity Suppliers Motion, and (ii) that payment of Operational Integrity
21 Supplier Claims include a communication of the following statement:

22 By accepting this payment, the payee agrees to the terms of the order of
23 the United States Bankruptcy Court for the Northern District of
24 California, dated _____, 2019, in the chapter 11 cases of PG&E
25 Corporation and Pacific Gas and Electric Company (Case No. 19-
_____(___)), authorizing the Debtors to pay prepetition obligations of
Operational Integrity Suppliers.

26 If the Debtors, in their discretion, determine that an Operational Integrity Supplier has not
27 complied with the terms and provisions of the Vendor Agreement or has failed to continue to comply
28 with the Customary Trade Terms or such other terms that are individually agreed to by the Debtors and

1 such Operational Integrity Supplier, following the date of the agreement, the Debtors may terminate a
2 Vendor Agreement. If a Vendor Agreement is so terminated, or if an Operational Integrity Supplier
3 that has received payment of a prepetition claim later refuses to continue to supply goods or services in
4 compliance with the Vendor Agreement or as otherwise agreed with the Debtors, the Debtors reserve
5 their rights to and may seek approval from this Court to (i) deem such payment to apply to postpetition
6 amounts payable to such Operational Integrity Supplier, if applicable, or (ii) take any and all
7 appropriate steps to cause such Operational Integrity Supplier to repay payments made to it on account
8 of its Operational Integrity Supplier Claim to the extent that such payments exceed the postpetition
9 amounts then owing to such Operational Integrity Supplier. The Operational Integrity Supplier Claim
10 shall then be reinstated in such an amount so as to restore the Debtors and the Operational Integrity
11 Supplier to their original positions as if the payment of the Operational Integrity Supplier Claim had
12 not been made.

13 Some of the Operational Integrity Suppliers may also possess or have the right to assert Liens
14 on the Debtors' assets based upon the claims held by those Operational Integrity Suppliers. As a
15 further condition of receiving payment of an Operational Integrity Supplier Claim, the Debtors propose
16 that an Operational Integrity Supplier must agree to take whatever action is necessary to remove the
17 Lien at the Operational Integrity Supplier's sole expense.

18 Finally, the Debtors propose to maintain a matrix summarizing (i) the name of each
19 Operational Integrity Supplier paid, (ii) the amount paid to each Operational Integrity Supplier on
20 account of its Operational Integrity Supplier Claim (and any 503(b)(9) Claims), and (iii) the type of
21 goods or services provided by that Operational Integrity Supplier. This matrix will be provided, upon
22 request, to the U.S. Trustee and the professionals retained by any official committee appointed in the
23 Chapter 11 Cases; provided, that the professionals for any such committee shall keep the matrix
24 confidential and shall not disclose any of the information in the matrix to anyone, including any
25 member of such statutory committee, without the prior written consent of the Debtors.

26 The Debtors have more than ample liquidity in the form of cash on hand and a commitment for
27 approximately \$5.5 billion in debtor-in-possession financing. I believe that some of the Operational
28

1 Integrity Suppliers will demand that the Debtors satisfy their prepetition obligations as a condition of
2 doing business on a go-forward basis as a result of the commencement of the Chapter 11 Cases. In the
3 three weeks leading up to the Petition Date, the Debtors estimate that they have experienced
4 approximately \$811 million in trade contraction from vendors and suppliers that have demanded
5 accelerated payment, cash-in-advance, new or additional cash collateral, or have stopped shipping
6 altogether. Further trade contraction from additional vendors could irreparably harm the Debtors'
7 business operations. In addition, the Utility relies on goods and services supplied by certain of the
8 Operational Integrity Suppliers to comply with the order appointing a third-party monitor issued by the
9 U.S. District Court for the Northern District of California as part of the Utility's compliance with the
10 sentencing terms of its January 27, 2017 federal criminal convictions. The goal of the monitor is to
11 help ensure that the Utility takes reasonable and appropriate steps to, among other things, maintain the
12 safety of its gas and electric operations.

13 Failure to pay the Operational Integrity Supplier Claims would severely inhibit the Debtors'
14 ability to acquire necessary materials and services and maintain their electric transmission and
15 distribution system, generation units, and gas facilities in order to safely and reliably provide essential
16 utilities to the population of northern and central California, as well as remain in compliance with state
17 and federal laws and regulations, including the 2017 monitor order. Such failure would cause
18 irreparable financial harm to the Debtors and may jeopardize the Debtors' ability to operate in a safe
19 and reliable manner. Thus, I believe that the goods and services provided by the Operational Integrity
20 Suppliers are so vital that the costs associated with even the briefest of disruption in goods and services
21 would exceed the Operational Integrity Suppliers' prepetition claims and, therefore, that payment of
22 the Operational Integrity Suppliers Claims as requested in the Operational Integrity Supplier Motion is
23 plainly an exercise of sound business judgment and necessary to a successful reorganization.
24 Moreover, as noted above, the Operational Integrity Supplier Claims are limited to approximately
25 5.5% of the Debtors' total outstanding trade debt as of the Petition Date.

26 In addition, payment of any 503(b)(9) Claims of any Operational Integrity Supplier merely
27 accelerates the timing of payment and not the ultimate treatment of such claims, especially here where
28

1 the Debtors have ample liquidity. Accordingly, the relief should be granted and the Debtors should be
2 authorized to pay the 503(b)(9) Claims of any Operational Integrity Supplier in accordance with the
3 procedures and protocols set forth herein.

4 For the reasons set forth herein, I respectfully submit that the relief requested in the Operational
5 Integrity Supplier Motion is necessary and appropriate, is in the best interests of their estates and all
6 parties in interest, is necessary to avoid immediate and irreparable harm to the Debtors, and should be
7 granted.

8 **VIII. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 362(d), 363(b), 363(c),**
9 **AND 364 AND FED. R. BANKR. P. 4001, 6003, AND 6004 FOR INTERIM AND FINAL**
10 **ORDERS (I) AUTHORIZING THE DEBTOR TO MAINTAIN INSURANCE**
11 **POLICIES, WORKERS' COMPENSATION PROGRAM, AND SURETY BOND**
12 **PROGRAM AND PAY ALL OBLIGATIONS WITH RESPECT THERETO; AND (II)**
13 **GRANTING RELIEF FROM THE AUTOMATIC STAY WITH RESPECT TO**
14 **WORKERS' COMPENSATION CLAIMS (THE "INSURANCE MOTION")**

15 Pursuant to the Insurance Motion, the Debtors request entry of interim and final orders
16 authorizing the Debtors to (i) (a) maintain their Insurance Policies, Workers' Compensation Program,
17 and Surety Bond Program (each as defined below) in accordance with their prepetition practices and
18 pursuant to the policies and agreements related thereto, and perform their obligations with respect to
19 the foregoing during the Chapter 11 Cases, and (b) pay any prepetition obligations arising under the
20 Insurance Policies, Workers' Compensation Program, and Surety Bond Program; (ii) modify the
21 automatic stay to the extent necessary to permit the Debtors' employees to proceed with any claims
22 they may have under the Workers' Compensation Program, and for related relief.

23 In the ordinary course of their operations, including the transmission and distribution of natural
24 gas and electricity to the Debtors' commercial and retail customers and operating and maintaining
25 power generation and storage facilities, the Debtors maintain a workers' compensation program (the
26 "**Workers' Compensation Program**") and various liability, property, and other insurance
27 arrangements (collectively, the "**Insurance Policies**," and all premiums and other obligations related
28 thereto, including any broker or advisor fees, associated federal excise taxes and state taxes, other fees,
and deductibles, collectively, the "**Insurance Obligations**") through several insurance carriers (each,
an "**Insurer**"). Certain of the Insurance Policies, including the Debtors' nuclear property liability

1 policies, provide unique coverage or terms and it would be difficult for the Debtors to obtain
2 replacement policies in the market. A list of the Insurance Policies is annexed to the Insurance Motion
3 as Exhibit B.³⁶ A description of the Workers Compensation Program and the various Insurance
4 Policies is set forth below.

5 **A. The Workers' Compensation Program**

6 California Labor Code §§ 3700-3823 mandate that the Debtors provide for payment of all
7 injury claims suffered by the Debtors' employees arising out of the course and scope of their
8 employment (the "**Workers' Compensation Claims**"), either by obtaining third-party insurance or
9 obtaining a certificate to self-insure from the California Department of Industrial Relations. The
10 Workers' Compensation Program covers, among other things, workers' compensation and employer
11 liability for accidents, death, or disease sustained by employees. The Debtors generally self-insure
12 Workers' Compensation Claims and the annual cost of administering the Workers' Compensation
13 Program, including labor costs, medical payments, and costs associated with the investigation of
14 claims, medical records, examinations and bills, is approximately \$10.2 million. This does not
15 encompass the payment of any Workers' Compensation Claims.

16 To maintain the Workers' Compensation Program, the Debtors are required to participate in the
17 California Self-Insurers' Security Fund (the "**CSISF**"), which covers workers' compensation claims
18 when self-insured companies default on their obligations. The CSISF also has the right to require that
19 participants provide cash or other collateral (the "**Collateral**") to secure their obligations if they
20 default. To participate in the CSISF for the period July 1, 2018 through June 30, 2019, the Debtors
21 paid an annual fee of approximately \$750,000 on July 14, 2018. The Debtors also are subject to an
22 annual assessment of approximately \$1,500,000, paid to the California State Division of Workers'

23
24 ³⁶ The Debtors have made an extensive and good-faith effort to identify all of their Insurance Policies
25 and Insurers on Exhibit B to the Insurance Motion. However, due to the size and complexity of the
26 Debtors' operations, certain Insurance Policies and Insurers may not be listed therein. Accordingly,
27 Exhibit B to the Insurance Motion is a non-exhaustive list of the Debtors' Insurance Policies. Further,
28 the Debtors may, in the future, enter into new Insurance Policies. To the extent that the Debtors
identify additional Insurance Policies not listed on Exhibit B to the Insurance Motion, or enter into new
Insurance Policies, pursuant to the Insurance Motion, the Debtors seek the authority to continue such
Insurance Policies uninterrupted and honor, in the Debtors' discretion, all Insurance Obligations
relating thereto.

1 Compensation to cover costs associated with administering the CSISF. The Debtors paid this annual
2 assessment on December 18, 2018 for the period July 1, 2018 through June 30, 2019. The Debtors’
3 Workers’ Compensation Program also includes coverage for certain employees (the “**LHW**
4 **Employees**”) protected under the Longshore and Harbor Workers’ Compensation Act (the
5 “**LHWCA**”), 33 U.S.C. §§ 901–950. Pursuant to the LHWCA, the Debtors posted collateral in the
6 form of two evergreen letters of credit in the amounts of \$800,000 and \$300,000 (the “**LHWCA**
7 **LOCs**”), respectively, with the United States Department of Labor.

8 Although the Debtors generally self-insure and self-administer all Workers’ Compensation
9 Claims under their Workers’ Compensation Program, the Debtors also obtain third-party insurance in
10 connection with (i) their employees working outside of California through Employers Insurance
11 Company of Wausau, with an annual policy premium of approximately \$9,000 (the “**Wausau**
12 **Policy**”), and (ii) claims that exceed \$10 million per occurrence through AEGIS Insurance Services,
13 Inc., with an annual premium of approximately \$230,000 (the “**AEGIS Policy**”). As of the Petition
14 Date, there are no outstanding premiums due under the Wausau Policy or the AEGIS Policy.

15 In the ordinary course of business, because the Debtors are largely self-insured, the Debtors
16 may be obligated to pay all or part of a Workers’ Compensation Claim directly to an employee, his or
17 her medical providers, or his or her heirs or legal representatives. As of the Petition Date, the Debtors
18 estimate that there were approximately 7,700 open claims under the Workers’ Compensation Program.
19 The Debtors estimate that they pay an average of approximately \$2.9 million per month on account of
20 Workers’ Compensation Claims. The Debtors seek authority to maintain the Workers’ Compensation
21 Program in the ordinary course of business and to pay all prepetition amounts related to the Workers’
22 Compensation Program as well as amounts that may become due and owing with respect to the
23 Workers’ Compensation Program during these Chapter 11 Cases. Pursuant to the Insurance Motion,
24 the Debtors also seek authority to provide Collateral to the CSISF to the extent required.

25 **B. Insurance Policies**

26 The Debtors maintain various liability and property Insurance Policies which provide the
27 Debtors with insurance coverage for general commercial claims, property damage, nuclear property
28 liability claims, cyber liability claims, crime, pollution and environmental-related claims, collision and

1 other liabilities arising from company-owned vehicles, claims relating to the administration of
2 employee benefit plans and the Debtors' employment practices, directors' and officers' liability, and
3 other property-related and general liabilities, as well as excess policies related to the same. The
4 Debtors maintain the Insurance Policies to, among other things, help manage the various risks
5 associated with their electricity and natural gas business. Continuation of the Insurance Policies is
6 essential to the ongoing operation of the Debtors' business.

7 Pursuant to each of the Insurance Policies, the Debtors are required to pay premiums based
8 upon a fixed rate established and billed by each Insurer³⁷ in addition to covering applicable
9 deductibles. The Insurance Policies each have an annual premium that is paid prospectively. The
10 annual premiums for the Insurance Policies currently in effect aggregate to approximately
11 \$439,000,000. The Debtors are not aware of any outstanding premiums or other amounts owed to the
12 various Insurers for the Insurance Policies.

13 C. The Debtors' Surety Bond Program

14 In the ordinary course of business, the Debtors are required to provide surety bonds (each, a
15 "Surety Bond") to certain third parties, including governmental units and other public agencies, to
16 secure the Debtors' payment or performance of certain obligations (the "Surety Bond Program").
17 These include, among other things, Surety Bonds related to various construction and environmental
18 remediation projects and related permits and/or or licenses, self-insurance obligations, lease
19 agreements with the State of California, land maintenance obligations, and certain tax obligations.
20 Often, statutes or ordinances require the Debtors to post the Surety Bonds. A list of Surety Bonds in
21
22
23
24

25 ³⁷ The Debtors purchase certain of their Insurance Policies through a participation agreement with
26 Energy Insurance Services, Inc. ("EIS"), a "sponsored captive insurer". Although EIS does not itself
27 write any policies, EIS procures insurance coverage from third-party insurers, for the benefit of the
28 Debtors, allowing the Debtors to take advantage of reinsurance markets (accessible to EIS but
otherwise inaccessible to the Debtors), and thereby securing lower premiums and supplemental
coverage that would otherwise be unavailable to the Debtors. With respect to Insurance Policies that
are procured through EIS, the Debtors pay any related premiums directly to EIS.

1 the Surety Bond Program is attached as Exhibit C to the Insurance Motion.³⁸ The Surety Bonds are
2 issued by XL Specialty Insurance Company and Liberty Mutual Insurance Company and certain of its
3 subsidiaries (each, a “**Surety**”). The Debtors estimate that as of the Petition Date, the total face
4 amount of all outstanding Surety Bonds is approximately \$166,000,000.

5 As a condition to issuing the Surety Bonds, the Sureties require the Debtors to enter into
6 indemnity agreements (collectively, the “**Surety Indemnity Agreements**”), pursuant to which the
7 Debtors indemnify the Sureties from any loss, cost, or expense that the Sureties may incur on account
8 of the issuance of the Surety Bonds on behalf of the Debtors (the “**Indemnity Obligations**”). Under
9 the terms of the Surety Indemnity Agreements, the Sureties may demand cash collateral or letters of
10 credit to secure the Indemnity Obligations at any point during the time the Surety Bonds remain
11 outstanding. As of the Petition Date, the Debtors have not posted any cash collateral or letters of credit
12 in connection with the Surety Indemnity Agreements. Just recently, however, Liberty Mutual, the
13 Debtors’ principal Surety Bond provider, issued a notice of cancellation of certain Surety Bonds and a
14 demand for security in the form of a letter of credit in the amount of \$50,000,000.

15 Pursuant to the Surety Bond Program, the Debtors pay premiums based upon a fixed rate
16 established and billed by each Surety thereunder (collectively, the “**Surety Premiums**” and, together
17 with the Indemnity Obligations, the “**Surety Bond Obligations**”). The Surety Premiums are generally
18 determined on an annual basis and total in the aggregate approximately \$820,000 per year. The
19 Debtors remit Surety Premium payments when the bonds are issued or renewed, typically on an annual
20 basis. The Debtors are not aware of any Surety Premiums that are outstanding as of the Petition Date.
21 In addition, the Debtors are not aware of any Surety Bonds that have been drawn.

22 To continue their business operations during these Chapter 11 Cases, the Debtors must be able
23 to continue to provide financial and other assurances to state governments, regulatory agencies, and

24 ³⁸ The Debtors have made an extensive and good-faith effort to identify all of their Surety Bonds on
25 Exhibit C to the Insurance Motion. However, due to the size and complexity of the Debtors’
26 operations, Surety Bonds and Sureties may not be listed on Exhibit C to the Insurance Motion.
27 Accordingly, Exhibit C to the Insurance Motion is a non-exhaustive list of the Debtors’ Surety Bonds.
28 Further, the Debtors may, in the future, obtain new Surety Bonds not listed on Exhibit C. To the extent
that the Debtors identify additional Surety Bonds not listed on Exhibit C or obtain new Surety Bonds,
the Debtors seek the authority to continue such Surety Bonds uninterrupted and honor, in the Debtors’
discretion, all Surety Bond Obligations (as defined herein) relating thereto.

1 other third parties in the form of Surety Bonds. This requires the Debtors to maintain their existing
2 Surety Bond Program, including the payment of Surety Bond Obligations as and when they come due,
3 providing the Sureties with collateral, if required, renewing or potentially acquiring additional bonding
4 capacity as needed in the ordinary course of their business, and executing other indemnity agreements,
5 as needed, in connection with the Surety Bond Program. Accordingly, approval of the relief requested
6 in the Insurance Motion with respect to the Surety Bond Obligations is warranted and the Debtors
7 should be authorized to maintain and continue their Surety Bond Program and pay all Surety Bond
8 Obligations, including, without limitation, any Surety Bond Obligations related to the period prior to
9 the Petition Date. It is important to note that substantially all, if not all, of the outstanding Surety
10 Bonds were provided in connection with ongoing projects and other matters that the Debtors will
11 continue in the ordinary course of their business and, accordingly, the Debtors do not expect that any
12 outstanding Surety Bonds will be called upon. The Debtors also expect that if the relief sought in the
13 Insurance Motion is granted, it should address the concerns raised by Liberty Mutual and result in a
14 withdrawal of its notice of cancellation of the Surety Bonds.

15 **D. The Debtors' Insurance Service Providers**

16 The Debtors employ brokers (the "**Brokers**"), including Marsh, LLC, Price Forbes & Partners,
17 and Guy Carpenter & Company, LLC, to coordinate the procurement and negotiation of certain
18 Insurance Policies including, but not limited to, those related to workers' compensation, directors' and
19 officers' liability, fiduciary liability, general commercial liability, and first-party property liability
20 policies. With respect to most of the Insurance Policies as to which the Brokers are involved, the
21 Insurers charge the Brokers directly for all insurance premiums and other amounts due under such
22 Insurance Policies. The Brokers then send the Debtors a statement for the payment of such insurance
23 premiums, and, once paid by the Debtors, the Brokers submit the payments to the Insurers.³⁹ The
24 Brokers receive a fee (the "**Broker Fees**") from the Debtors for administering certain of the Insurance
25 Policies.

26
27 ³⁹ With respect to Insurance Policies that are procured through EIS, the Debtors pay any related
28 premiums directly to EIS and do not use Brokers.

1 The Debtors also employ a third-party administrator (the “**Insurance Administrator**”) to
2 investigate, administer, and pay claims arising under their Insurance Policies. The Debtors pay fees for
3 these services on a monthly basis (such fees, together with the Brokers’ Fees, the “**Service Provider**
4 **Fees**”). The Service Provider Fees are budgeted based on a flat fee and total approximately
5 \$5,500,000 each year.

6 Because the Brokers and Insurance Administrator are intimately familiar with the Debtors and
7 the Insurance Policies, the Debtors request authority, but not direction, to pay any prepetition Service
8 Providers’ Fees that may be owed, including as a result of any future reconciliations, and to continue to
9 honor all of their obligations to them in the ordinary course. Based on the information currently
10 available, the Debtors are not aware of any Service Provider Fees that are owed with respect to the
11 period prior to the Petition Date.

12 In light of the risks applicable to the Debtors’ operations and the critical need for the Debtors to
13 protect their assets and operations from such risks and to provide Surety Bonds as required, it is
14 essential that the Debtors maintain the Insurance Policies, and the Surety Bond Program and pay all
15 Insurance Obligations, Surety Bond Obligations, and Service Provider Fees during the course of these
16 Chapter 11 Cases. Without authority to maintain and pay amounts owing in connection with these
17 programs, the ability of the Debtors to conduct operations in many locations could come to a halt to the
18 detriment and prejudice of all parties in interest. Additionally, based on the Debtors’ current
19 circumstances, it is not likely that the Debtors will be able to renew or replace their existing Insurance
20 Policies or Surety Bonds on terms more favorable than those currently offered by the Insurers and
21 Sureties. The process of establishing new programs would also be burdensome and costly to the
22 Debtors. Additionally, the relief sought in the Insurance Motion will avoid the risk of any potential
23 disruption of necessary coverage and the Debtors’ potential exposure to significant liability and to
24 fines under various applicable federal and state laws and regulations.

25 For the reasons set forth herein, I respectfully submit that the relief requested in the Insurance
26 Motion is necessary and appropriate, is in the best interests of their estates and all parties in interest, is
27 necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

IX. **MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 363(b), 507(a) AND 541(d) AND FED. R. BANKR. P. 6003 AND 6004 FOR INTERIM AND FINAL AUTHORITY TO PAY CERTAIN PREPETITION TAXES AND ASSESSMENTS AND GRANTING RELATED RELIEF (THE “TAXES MOTION”)**

Pursuant to the Taxes Motion, the Debtors request entry of interim and final orders authorizing, but not directing, the Debtors to pay prepetition taxes, assessments, fees, and other charges in the ordinary course of business, including any such taxes, assessments, fees, and charges subsequently determined upon audit, or otherwise, to be owed (collectively, the “**Taxes and Assessments**”).

In the ordinary course of their businesses, the Debtors collect, withhold, and incur a variety of Taxes and Assessments that they remit periodically to various federal, state, and local taxing, licensing, regulatory, and other governmental authorities (collectively, the “**Taxing Authorities**”). A list of the Taxing Authorities is annexed to the Taxes Motion as Exhibit B (the “**Taxing Authorities List**”).⁴⁰

As set forth in further detail below, the Debtors generally pay the Taxes and Assessments bi-monthly, monthly, quarterly or annually, in each case, as required by applicable laws and regulations. As of the Petition Date, the Debtors estimate that an aggregate amount of approximately \$139,200,000 in Taxes and Assessments are due and owing to the various Taxing Authorities, of which, approximately \$11,300,000 will come due during the Interim Period. A chart outlining the various categories and approximate amounts of the Taxes and Assessments that the Debtors are seeking authority to pay pursuant to the Taxes Motion is set forth below. The amounts of the Taxes and Assessments set forth below are good faith estimates based on the Debtors’ books and records and remain subject to potential audits and other adjustments. As such, the Debtors also seek authority to pay any Taxes and Assessments due and owing following any such audit and adjustments.

⁴⁰ The Debtors have made an extensive and good-faith effort to identify all Taxing Authorities to which the Debtors owe any amount on Exhibit B to the Taxes Motion. However, due to the size and complexity of the Debtors’ operations, certain Taxing Authorities may not be listed therein. Accordingly, Exhibit B to the Taxes Motion is a non-exhaustive list of Taxing Authorities to which the Debtors may owe Taxes and Assessments. To the extent that the Debtors identify additional Taxing Authorities not listed on Exhibit B to the Taxes Motion, the Debtors seek the authority to pay any Taxes and Assessments due and owing to such Taxing Authorities.

Categories of Taxes and Assessments	Approx. Amount Seeking Authority to Pay on Interim Basis	Approx. Amount Seeking Authority to Pay on Final Basis
Sales and Use Taxes	\$1,100,000	\$1,100,000
Property Taxes	\$0	\$43,500,000
Income Taxes	<i>De minimis</i>	<i>De minimis</i>
Excise Taxes	\$200,000	\$200,000
San Francisco Gross Receipts Tax and Payroll Tax	\$3,200,000	\$5,500,000
Pass Through Fees	\$6,800,000	\$79,700,000
Regulatory Fees	\$0	\$9,200,000
Other Taxes and Fees	<i>De minimis</i>	<i>De minimis</i>
Total Taxes and Assessments:	\$11,300,000	\$139,200,000

A. Sales and Use Taxes

The Debtors incur sales tax on account of the purchase of tangible personal property utilized by the Debtors in the ordinary course of business (collectively, the “**Sales Taxes**”). The Debtors incur use taxes on account of the purchase of tangible personal property utilized by the Debtors in the ordinary course of business from vendors who do not collect sales tax (collectively, the “**Use Taxes**” and, together with the Sales Taxes, the “**Sales and Use Taxes**”).

The Debtors pay approximately \$500,000 to \$4,000,000 per month in aggregate Sales and Use Taxes depending on the volume of nuclear fuel purchases, which can be seasonal. Although the Debtors believe they are current with respect to their payment of Sales and Use Taxes, the Debtors estimate that, as of the Petition Date, they owe approximately \$1,100,000 in Sales and Use Taxes, all of which will become due and payable during the Interim Period.

B. Property Taxes

The Debtors own real and personal property located in approximately fifty (50) counties within the State of California, as well as Texas and Nevada, that are subject to state and local real and personal property taxes (the “**Property Taxes**”). The California State Board of Equalization determines the aggregate value of all real and personal property owned by the Debtors in the state and allocates that value among each of the counties where property is located. The counties then tax the Debtors based on the allocated property values. Property Taxes accrue on an annualized basis and are paid twice a year. Property Taxes with respect to real property create a statutory first priority lien on

1 the taxed property to the extent not paid. In fiscal year 2018, the Debtors paid approximately
2 \$491,900,000 in aggregate Property Taxes to the relevant Taxing Authorities. The Debtors estimate
3 that, as of the Petition Date, approximately \$43,500,000 of Property Taxes have accrued or relate to the
4 period prior to the Petition Date but have not yet been paid, none of which will become due and
5 payable during the Interim Period.

6 **C. Income Taxes**

7 Under certain applicable laws, federal, state, and local Taxing Authorities levy taxes based on
8 the Debtors' income (the "**Income Taxes**").⁴¹ The Debtors allocate income tax liability between
9 themselves pursuant to that certain *Tax Sharing Agreement* dated as of January 1, 1997. In California,
10 Taxing Authorities are entitled to assert statutory liens on the Debtors' property that is located, or
11 subject to tax, in the respective jurisdiction if these income taxes are not paid. Moreover, in California,
12 directors and officers may be personally liable for failure to timely pay these taxes. The Debtors also
13 pay a relatively minor amount of Income Taxes in several other states and in the District of Columbia.
14 The Debtors are required to pay Income Taxes on a quarterly pre-payment basis (which is offset
15 against amounts the Debtors are ultimately determined to owe on an annual basis). The Debtors have
16 substantial net operating losses and do not anticipate the need to pay any federal or California Income
17 Taxes for the period prior to the fiscal year ending December 31, 2017. The Debtors estimate that, as
18 of the Petition Date, they owe a *de minimis* amount of state and local Income Taxes in jurisdictions
19 other than California, which will come due during the Interim Period.

20 **D. Excise Taxes**

21 Under applicable laws, federal, state, and local Taxing Authorities levy taxes based on the
22 Debtors' purchases or sales of specific goods (e.g., alternative fuel excise tax) or services (e.g.,
23 insurance premiums paid to foreign insurance companies) (collectively, the "**Excise Taxes**"). The
24 Debtors generally pay Excise Taxes on a quarterly basis or as otherwise required by applicable laws
25 and regulations. The Debtors estimate that, as of the Petition Date, they owe approximately \$200,000
26 in Excise Taxes, all of which will become due and payable during the Interim Period.

27
28 ⁴¹ Income Taxes includes California franchise taxes, which are calculated based on income.

E. San Francisco Gross Receipts and Payroll Tax

The Debtors incur a Gross Receipts and Payroll Tax assessed by the City of San Francisco (the “**Gross Receipts Tax**”) to operate their businesses in that city. The Gross Receipts Tax is generally remitted by the Debtors several times a year and is based on San Francisco gross receipts and payroll. In 2018, the Debtors’ aggregate liability for the Gross Receipts Tax was approximately \$13,300,000. Although the Debtors believe they are current with respect to their payment of the Gross Receipts Tax, the Debtors estimate that, as of the Petition Date, they owe approximately \$5,500,000 in Gross Receipts Tax, \$3,200,000 of which will become due and payable during the Interim Period.

F. Pass Through Fees

The Debtors collect a variety of fees and taxes, including, but not limited to, utility users tax, excessive electric use tax, business license tax, and city franchise surcharges and other fees collected through customer billings and remitted to the applicable state and local municipalities (collectively, the “**Pass Through Fees**”). Pass Through Fees are generally remitted by the Debtors to the applicable Taxing Authorities several times a year. Pass Through Fees vary by county and are typically based on total revenues allocated based on public and private miles of electricity lines. Pass Through Fees paid to cities are either based on the Debtors’ revenues within the city’s boundaries or are calculated using the same formula that is used by the counties. In fiscal year 2018, the Debtors accrued approximately \$690,500,000 in aggregate Pass Through Fees to the relevant Taxing Authorities. Although the Debtors believe that they are current with respect to their payment of Pass Through Fees, the Debtors estimate that, as of the Petition Date, they owe approximately \$79,700,000 in Pass Through Fees, approximately \$6,800,000 of which will become due and payable during the Interim Period.

G. Regulatory Fees

The Debtors collect and remit various regulatory fees to commissions that regulate public utility companies, including for audit costs incurred by such commissions (the “**Regulatory Fees**”). These commissions include, without limitation, the California Energy Resources Conservation and Development Commission the Federal Energy Regulatory Commission, Nuclear Regulatory

Commission, and the California Public Utilities Commission.⁴² Regulatory Fees are generally remitted by the Debtors to the applicable Taxing Authorities quarterly. The Debtors estimate that approximately \$9,200,000 in Regulatory Fees have accrued and remain unpaid as of the Petition Date, none of which will become due and owing during the Interim Period.

H. Other Taxes and Fees

In addition to the foregoing, the Debtors collect, withhold, or incur certain other taxes, fees, and charges, including, but not limited to, taxes, license and registration fees, environmental permit fees, land fees, and encroachment fees paid on behalf of the Debtors and their subsidiaries (collectively, “Other Taxes and Fees”). Although the Debtors believe that they are current with respect to their payment of Other Taxes and Fees, the Debtors estimate that, as of the Petition Date, they owe a *de minimis* amount of Other Taxes and Fees, which will become due and payable during the Interim Period.

The Debtors must continue to pay the Taxes and Assessments to continue operating in certain jurisdictions and to avoid the incurrence of unnecessary costs during the Chapter 11 Cases. Specifically, it is my understanding that the Debtors’ failure to pay the Taxes and Assessments may interfere with the Debtors’ continued operations and restructuring, and increase the scope of secured and priority claims held by the applicable Taxing Authorities against the Debtors’ estates. I further understand, based on discussions with counsel, that certain of the Taxes and Assessments (such as certain Pass Through Fees) may constitute “trust fund” taxes, which the Debtors are required to collect or hold in trust for payment to the Taxing Authorities. Moreover, failure to pay certain of the Taxes and Assessments may expose the Debtors’ directors and officers to personal liability, which would cause further distraction and delays and negatively impact the administration of these Chapter 11 Cases.

⁴² California Public Utilities Commission Regulatory Fees include not only direct regulatory fees, but also the costs of indirect regulatory expenses, such as directed contract costs for Commission auditors and consultants; and the costs of intervenor compensation awards pursuant to California Public Utilities Code §§ 1801-1812, which require Commission jurisdictional utilities to pay the reasonable costs of an intervenor's participation if that party makes a substantial contribution to the Commission's proceedings. The costs of these direct and indirect Regulatory Fees are recovered in the Debtors’ utility rates.

Accordingly, for the reasons set forth herein, I respectfully submit that the relief requested in the Taxes Motion is necessary and appropriate, is in the best interests of their estates and all parties in interest, is necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

X. **MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 366 AND 105(a) REQUESTING ENTRY OF AN ORDER (I) APPROVING DEBTORS' PROPOSED FORM OF ADEQUATE ASSURANCE OF PAYMENT TO UTILITY PROVIDERS, (II) ESTABLISHING PROCEDURES PROVIDING ADEQUATE ASSURANCE AND RESOLVING OBJECTIONS OF UTILITY PROVIDERS, AND (III) PROHIBITING UTILITY PROVIDERS FROM ALTERING, REFUSING, OR DISCONTINUING UTILITY SERVICE (THE "UTILITIES MOTION")**

Pursuant to the Utilities Motion, the Debtors are seeking entry of an order (i) approving the Debtors' proposed form of adequate assurance of payment for postpetition Utility Services (as defined below), (ii) establishing procedures for providing adequate assurance and resolving objections of Utility Providers (as defined below) relating to the adequacy of the proposed adequate assurance, and (iii) prohibiting the Utility Providers from altering, refusing, or discontinuing service to, or discriminating against, the Debtors because of the commencement of the Chapter 11 Cases or a debt that is owed by the Debtors for Utility Services rendered prior to the Petition Date.

A. **The Debtor's Utility Services**

1. **Utility Providers**

In the ordinary course of their businesses, the Debtors incur expenses for electricity, natural gas, oil, water, sewer, telephone, and other utility services (collectively, the "**Utility Services**"). A list (the "**Utility Service List**") of the approximately 150 utility providers (collectively, the "**Utility Providers**") that provide Utility Services to the Debtors as of the Petition Date is attached to the Utilities Motion as Exhibit B.⁴³

Historically, the Debtors have a good payment history with the Utility Providers. To the best of the Debtors' knowledge, there are no defaults or material arrearages for the Debtors' undisputed invoices for prepetition Utility Services other than payment interruptions that may be caused by the

⁴³ The Debtors reserve the right to amend or supplement the Utility Service List to include any Utility Provider omitted. The inclusion of any entity on the Utility Service List is not an admission that such entity is a utility within the meaning of section 366 of the Bankruptcy Code, and the Debtors reserve the right to contest any such characterization in the future. Additionally, the Debtors themselves provide significant Utility Services to their business operations. For obvious reasons those Utility Services are not included in the Utilities Motion.

1 commencement of the Chapter 11 Cases. Based on the monthly average for the twelve (12) months
2 prior to the Petition Date, the Debtors estimate that their cost of Utility Services for the next thirty (30)
3 days will be approximately \$8,600,000.

4 Uninterrupted Utility Services are essential to the Debtors' ongoing operations and, therefore,
5 the success of the Debtors' reorganization. The Debtors coordinate their complex businesses through
6 their headquarters in San Francisco, California and their other facilities located in Northern California,
7 including without limitation, their numerous power generation facilities, distribution facilities,
8 compressor stations, and storage facilities. Any interruption of Utility Services provided at these
9 locations would disrupt the Debtors' ability to communicate with, and provide the necessary support
10 and services to, their employees, vendors, various regulatory authorities, and, most importantly, their
11 customers. Should any Utility Provider alter, refuse, or discontinue service, even briefly, the Debtors'
12 business operations could be severely disrupted, which, in turn, could lead to subsequent power
13 outages or other service disruptions for the Debtors' customers. Any disruptions, therefore, would
14 negatively impact the Debtors' business operations, customers, and all parties in interest.

15 **B. Proposed Adequate Assurance**

16 The Debtors intend to pay all postpetition obligations owed to the Utility Providers in a timely
17 manner and have sufficient funds to do so. The Debtors have a commitment for debtor in possession
18 financing, which, together with existing cash and cash generated from operations, is more than
19 adequate to fund their day to day expenses, including postpetition amounts for Utility Services.
20 Notwithstanding the foregoing, to provide adequate assurance of payment to the Utility Providers
21 pursuant to section 366(c) of the Bankruptcy Code, the Debtors propose to deposit into a segregated,
22 interest-bearing bank account (the "**Adequate Assurance Account**") a sum equal to the cost of two (2)
23 weeks of Utility Services, calculated based on the historical average of the Debtors' utility expenses
24 over the twelve-month period prior to the Petition Date (the "**Adequate Assurance Deposit**"). The
25 Adequate Assurance Deposit will not, however, include any amount on account of any Utility Provider
26 that (a) agrees to a lesser amount, (b) already holds a deposit, letter of credit, surety bond, or other type
27 of instrument securing the Debtors' performance equal to or greater than two weeks of Utility Services,
28

1 or (c) is paid in advance for its Utility Services.⁴⁴ Based on the foregoing calculation, the Debtors
2 estimate that the total amount of the Adequate Assurance Deposit will be approximately \$4,800,000.

3 The Debtors shall, however, have the right to reduce the Adequate Assurance Deposit to the
4 extent that any of the following occurs: (a) the Adequate Assurance Deposit includes any amount on
5 account of a Utility Provider that the Debtors subsequently determine should be removed from the
6 Utility Service List; (b) a Utility Provider properly serves an Additional Adequate Assurance Request
7 (as defined below), and any settlement results in such Utility Provider's removal from the Utility
8 Service List or in the Debtors' provision of alternate assurance to the Utility Provider; or (c) any
9 Utility Provider has instead been provided with a letter of credit, cash deposit, or some other form of
10 security acceptable to the Utility Provider. The Debtors submit that the Adequate Assurance Deposit,
11 together with the Debtors' ability to pay for future Utility Services in the ordinary course of business
12 (the "**Proposed Adequate Assurance**"), constitutes sufficient adequate assurance to the Utility
13 Providers.

14 **C. Proposed Adequate Assurance Procedures and the Resolution of Objections**

15 The Debtors propose that the procedures described below (the "**Adequate Assurance**
16 **Procedures**") be utilized in connection with the Proposed Adequate Assurance:

- 17 a. The Debtors will fax, e-mail, serve by overnight mail, or otherwise
18 expeditiously send a copy of the Proposed Order (as approved by the
19 Bankruptcy Court), which includes the proposed Adequate Assurance
20 Procedures, to each Utility Provider on the Utility Service List within three (3)
21 business days after entry of the Proposed Order by the Bankruptcy Court.
- 22 b. The Debtors will deposit the Adequate Assurance Deposit in the Adequate
23 Assurance Account within five (5) business days of entry of the Proposed Order;
24 provided, that to the extent any Utility Provider receives any additional
25 assurance of payment as set forth herein, the Debtors may reduce the Adequate
26 Assurance Deposit maintained in the Adequate Assurance Account by such
27 amount.
- 28 c. The portion of the Adequate Assurance Deposit attributable to each Utility
Provider shall be returned to the Debtors on the earlier of (i) the date on which
the Debtors have terminated the service from such provider and have satisfied in
full all postpetition obligations due and owing to the applicable Utility Provider
and (ii) the effective date of a plan of reorganization in the Chapter 11 Cases, if
not applied earlier.

⁴⁴ To the extent that any Utility Provider is or will hold any cash deposit from the Debtors that is in
excess of two (2) weeks' worth of the average utility cost, the Debtors reserve their right to demand
return of such excess amounts.

- 1 d. Any Utility Provider not satisfied with the Proposed Adequate Assurance must
2 serve a written request for additional assurance (an “**Additional Assurance**
3 **Request**”) on the following parties: (i) the Debtors, 77 Beale Street, San
4 Francisco, CA 94105 (Attn: Mari Becker and Nicholas Bijur); (ii) Weil, Gotshal
5 & Manges LLP, 767 Fifth Avenue, New York, New York 10153 (Attn.: Stephen
6 Karotkin, Esq. and Lisa Lansio, Esq.); and (iii) Keller & Benvenuti, 650
7 California Street, Suite 1900, San Francisco, CA 94108 (Attn: Tobias S. Keller,
8 Esq. and Jane Kim, Esq.) (collectively, the “**Adequate Assurance Notice**
9 **Parties**”).
- 10 e. Any Additional Assurance Request must (i) be made in writing, (ii) set forth the
11 location for which Utility Services are provided, (iii) include a summary of the
12 Debtors’ payment history relevant to the affected account(s), including the
13 amounts of any security deposits, and (iv) set forth an explanation of why the
14 Utility Provider believes the Proposed Adequate Assurance is not sufficient
15 adequate assurance of future payment.
- 16 f. Any Additional Assurance Request must be made and actually received by the
17 Adequate Assurance Notice Parties by no later than twenty (20) days after entry
18 of the Proposed Order by the Court, or such greater period as may be agreed to
19 by the Debtors and the relevant Utility Provider. If a Utility Provider fails to
20 timely file and serve an Additional Assurance Request, it shall: (i) be deemed to
21 have received adequate assurance of payment “satisfactory” to such Utility
22 Provider in compliance with section 366 of the Bankruptcy Code; and (ii) be
23 forbidden to discontinue, alter, or refuse service to, or discriminate against, the
24 Debtors on account of any unpaid prepetition charges, or require additional
25 assurance of payment other than the Proposed Adequate Assurance.
- 26 g. Upon receipt by the Adequate Assurance Notice Parties of any Additional
27 Assurance Request as set forth above, the Debtors shall have the greater of (i)
28 twenty (20) days from the receipt of such Additional Assurance Request, and (ii)
thirty (30) days from entry of the Proposed Order (the “**Resolution Period**”) to
negotiate with such Utility Provider to resolve such Utility Provider’s Additional
Assurance Request, or such greater period as may be agreed to by the Debtors
and the relevant Utility Provider.
- h. If the Debtors, in their sole discretion, determine that an Additional Assurance
Request or any consensual agreement reached in connection therewith is
reasonable, the Debtors may resolve any Additional Assurance Request without
further order of the Court, and may, in connection with any such agreement, in
their sole discretion, provide a Utility Provider with additional adequate
assurance of future payment, including but not limited to cash deposits,
prepayments, or other forms of security.
- i. If the Debtors determine that the Additional Assurance Request is not
reasonable and are not able to reach a resolution with the Utility Provider during
the Resolution Period, the Debtors, during or immediately after the Resolution
Period, will schedule a hearing before this Court to determine the adequacy of
assurances of payment with respect to such Utility Provider (the
“**Determination Hearing**”) pursuant to section 366(c)(3) of the Bankruptcy
Code.
- j. Pending resolution of a disputed Additional Assurance Request at the
Determination Hearing, the relevant Utility Provider shall be prohibited from
discontinuing, altering, or refusing service to the Debtors on account of unpaid

charges for prepetition services or on account of any objections to the Proposed Adequate Assurance.

Absent compliance by the Utility Providers with the above Adequate Assurance Procedures, the Debtors request that the Utility Providers be prohibited from altering, refusing, or discontinuing service on account of any unpaid prepetition charges and be deemed to have received adequate assurance of payment in compliance with section 366 of the Bankruptcy Code.

D. Subsequent Modifications of Utility Service List

The Debtors have made an extensive and good-faith effort to identify all of their Utility Providers and include them on the Utility Service List. Nonetheless, to the extent that the Debtors subsequently identify additional Utility Providers, the Debtors seek authority, in their sole discretion, to amend the Utility Service List to add any Utility Provider. The Debtors further request that the Court's order approving the Utilities Motion be deemed to apply to any such subsequently identified Utility Provider, regardless of when such Utility Provider is added to the Utility Service List. The Debtors will serve a copy of the Utilities Motion and the Proposed Order on any such Utility Provider subsequently added to the Utility Service List and deposit two weeks' worth of estimated utility costs in the Adequate Assurance Account for the benefit of such Utility Provider (less any amounts already on deposit with any such subsequently added Utility Provider that exceed outstanding prepetition amounts). Subsequently added Utility Providers shall have twenty (20) days from the date of service of the Proposed Order to make an Additional Assurance Request in accordance with the Adequate Assurance Procedures.

Any Utility Provider subsequently added to the Utility Service List that objects to the Proposed Order with respect to such Utility Provider must file an objection in accordance with the Federal Rules of Bankruptcy Procedure, the Bankruptcy Local Rules, and the Adequate Assurance Procedures.

I respectfully submit that the relief requested will ensure that the Debtors' operations will not be disrupted, which would severely impact their businesses and prospects for a successful reorganization. The relief requested provides the Utility Providers with fair and orderly procedures for determining requests for Additional Adequate Assurance, without which the Debtors could be forced to address in excess of one hundred requests by Utility Providers in a disorganized manner at a critical

1 period in the Chapter 11 Cases when the Debtors' efforts should be more productively focused on
2 operations for the benefit of all parties in interest.

3 Accordingly, for the reasons set forth herein, I respectfully submit that the relief requested in
4 the Utilities Motion is necessary and appropriate, is in the best interests of their estates and all parties
5 in interest, and should be granted.

6 **XI. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a) AND 362 FOR INTERIM**
7 **AND FINAL ORDERS ESTABLISHING NOTIFICATION PROCEDURES AND**
8 **APPROVING RESTRICTIONS ON CERTAIN TRANSFERS OF STOCK OF, AND**
9 **CLAIMS AGAINST, THE DEBTORS (THE "NOL MOTION")**

10 Pursuant to the NOL Motion, the Debtors seek entry of interim and final orders authorizing the
11 Debtors to establish procedures (the "**Procedures**") to protect the potential value of the Debtors'
12 consolidated net operating loss carryforwards ("**NOLs**") and other tax benefits (collectively, the "**Tax**
13 **Attributes**") for use in connection with the reorganization of the Debtors. The Procedures apply to (a)
14 common stock of PG&E Corp. (the "**Common Stock**") and preferred stock of the Utility ("**Preferred**
15 **Stock**") (together with the Common Stock, the "**PG&E Stock**") and any options or similar rights
16 (within the meaning of applicable Treasury Regulations) to acquire such stock (the "**Options**"), and (b)
17 claims (each, as defined in section 101(5) of the Bankruptcy Code) against one or more of the Debtors
18 (a "**Claim**"). The Debtors request relief effective *nunc pro tunc* to the date hereof.

19 **A. The Debtors' Tax Attributes**

20 The Debtors possess certain Tax Attributes, including, as of the Petition Date, estimated federal
21 NOLs of approximately \$4 billion and certain tax credits (including investment tax credits and research
22 and development tax credits) of approximately \$115 million. The Tax Attributes are valuable assets.

23 It is my understanding based upon discussions with counsel that Title 26 of the United States
24 Code (the "**Tax Code**") generally permits a corporation to carry forward its NOLs to reduce future
25 taxable income, thereby reducing, along with available tax credits, such corporation's tax liability in
26 future periods. *See, e.g.*, 26 U.S.C. §§ 38 and 172. Accordingly, absent any intervening limitations
27 and depending on future operating results and the consummation of taxable asset dispositions by the
28 Debtors, the Tax Attributes could substantially reduce the Debtors' U.S. federal income tax liability for
current and future periods, including during the pendency of these Chapter 11 Cases. The Tax

1 Attributes are available to reduce the Debtors' federal income tax liability through the taxable year that
2 includes the effective date of a chapter 11 plan and potentially thereafter, depending on the
3 consequences of the restructuring. The Tax Attributes, therefore, could translate into future tax
4 savings over time, and any such savings could enhance the Debtors' cash position for the benefit of all
5 parties in interest and contribute to the Debtors' efforts toward a successful reorganization.

6 It is my understanding based upon discussions with counsel that the Debtors' ability to utilize
7 the Tax Attributes to reduce future tax liability is subject to certain statutory limitations. Sections 382
8 and 383 of the Tax Code limit a corporation's ability to utilize its NOLs, tax credits, and certain other
9 tax benefits to offset future income once that corporation has undergone an "ownership change" within
10 the meaning of section 382 of the Tax Code (an "**Ownership Change**"). Pursuant to section 382 of
11 the Tax Code, an Ownership Change generally occurs when the percentage of a corporation's equity
12 held by one or more of its "**5-percent shareholders**" (each, as that term is used in section 382 of the
13 Tax Code, a "**5-Percent Shareholder**") increases by more than fifty (50) percentage points above the
14 lowest percentage of the corporation's equity owned by such shareholder(s) at any time during the
15 relevant testing period (usually three years).

16 The Debtors do not believe that PG&E Corp. has undergone an Ownership Change prior to the
17 Petition Date. Accordingly, the Debtors believe that they have significant Tax Attributes that would be
18 severely impaired by the occurrence of an Ownership Change during the pendency of these Chapter 11
19 Cases. Therefore, it is in the best interests of the Debtors and their stakeholders (including a customer
20 base of over 16 million residential and non-residential customers) to restrict acquisitions of PG&E
21 Stock that could result in an Ownership Change occurring *before* the effective date of a chapter 11 plan
22 or any applicable bankruptcy court order. Such a restriction would protect the Debtors' ability to use
23 the Tax Attributes during the pendency of these chapter 11 cases or, potentially, in the event of a future
24 transaction, to offset gain or other income recognized in connection with the Debtors' sale or
25 ownership of their assets, which may be significant in amount. In the event a pre-effective date
26 Ownership Change occurred, the resulting limitation on the Debtors' Tax Attributes primarily depends
27 on the value of the PG&E Stock at such time, and thus becomes increasingly severe as the value of the
28

1 PG&E Stock declines. Although (as described below) the limitations imposed by section 382 of the
2 Tax Code may be significantly less restrictive when an Ownership Change occurs pursuant to a
3 confirmed chapter 11 plan (or any applicable bankruptcy court order), the benefits available under
4 section 382 of the Tax Code in connection with a confirmed chapter 11 plan (or any applicable
5 bankruptcy court order) are not applied retroactively to reduce the limitations imposed on a
6 corporation's ability to utilize its tax benefits resulting from a previous Ownership Change (such as an
7 Ownership Change occurring during the pendency of a chapter 11 case).

8 A chapter 11 plan that contemplates a reorganization of the Debtors may involve the issuance
9 of new common stock in the Debtors (or any successor to the Debtors) and the distribution of such
10 stock to certain creditors in satisfaction, in whole or in part, of their respective Claims. This issuance
11 and distribution could potentially result in an Ownership Change. In such event, it is possible that the
12 special relief afforded by section 382(l)(5) of the Tax Code could be both available and beneficial to
13 the Debtors; the Debtors, in that circumstance, may seek to qualify the restructuring for such relief.
14 Such relief, however, may become unavailable to the Debtors if the trading and accumulation of
15 certain Claims prior to the effective date of a chapter 11 plan is left unrestricted.

16 **B. The Proposed Procedures Relating to PG&E Stock**

17 By establishing procedures for monitoring acquisitions of PG&E Stock (the "**Stock**
18 **Procedures**"), the Debtors can preserve their ability to seek the necessary relief if it appears that any
19 such acquisition(s) may impair the Debtors' ability to utilize their Tax Attributes. Therefore, the
20 Debtors propose the following Stock Procedures:⁴⁵

21 (a) Definitions. For purposes of these Stock Procedures, the following terms have
22 the following meanings:

23 (i) "**Acquiring Group**" shall mean any group of persons (including any
24 Entity) that has a plan or arrangement to acquire beneficial ownership of the stock of more than one
25 Debtor within the meaning of Treasury Regulations section 1.1502-92(c)(3)(i).

26 (ii) "**Beneficial ownership**" of PG&E Stock and Options to acquire PG&E
27 Stock shall be determined in accordance with section 382 of the Tax Code, the regulations
28 promulgated by the U.S. Department of the Treasury under the Tax Code (the "**Treasury**
Regulations"), and rulings issued by the Internal Revenue Service (the "**IRS**"), and as described in the

⁴⁵ The Security Procedures delineated herein summarize the relevant portion of Exhibit 1 to the proposed orders annexed to the NOL Motion, which sets forth the Procedures.

NOL Motion, and, thus, to the extent provided in those sources, from time to time shall include, without limitation, (A) direct and indirect ownership (but determined without regard to any rule that treats stock of an entity as to which the constructive ownership rules apply as no longer owned by that entity) e.g., a holding company would be considered to beneficially own all stock owned or acquired by its subsidiaries, (B) ownership by a holder's family members, (C) ownership by any Entity, and (D) to the extent set forth in Treasury Regulations section 1.382-4, the ownership of an Option to acquire PG&E Stock.

(iii) **"Entity"** shall mean any "entity" as such term is defined in Treasury Regulations section 1.382-3(a), including any group of persons acting pursuant to a formal or informal understanding among themselves to make a coordinated acquisition of PG&E Stock.

(iv) **"Substantial Stockholder"** shall mean any person (including any Entity) or Acquiring Group that beneficially owns at least 24.6 million shares of Common Stock (representing approximately 4.75% of all issued and outstanding shares of Common Stock).

(b) Notice of Substantial Ownership. Any person (including any Entity) or Acquiring Group that beneficially owns, at any time on or after the Petition Date, PG&E Stock in an amount sufficient to qualify such person or Acquiring Group as a Substantial Stockholder shall file with this Court and serve upon (i) PG&E Corporation, 77 Beale Street, P.O. Box 770000 San Francisco, California 94177 (Attn: Mark Caron); (ii) Weil, Gotshal & Manges LLP, 767 Fifth Avenue, New York, New York 10153 (Attn: Stephen Karotkin, Esq.; Jessica Liou, Esq.; and Matthew Goren, Esq., as proposed counsel to the Debtors; (iii) counsel to any statutory committees appointed in the Chapter 11 Cases (each, an **"Official Committee"**); and (iv) counsel to the lenders under the Debtors' proposed debtor in possession financing facilities (the **"DIP Lenders"**) (collectively, the **"Disclosure Parties"**) a notice of such person's or Acquiring Group's substantial ownership (a **"Substantial Stock Ownership Notice"**), in substantially the form annexed to the proposed orders to the NOL Motion as Exhibit 2, which describes specifically and in detail such person's or Acquiring Group's ownership of PG&E Stock, on or before the date that is the later of (x) twenty (20) calendar days after the entry of the order granting the requested relief or (y) ten (10) business days after such person or Acquiring Group qualifies as a Substantial Stockholder. At the election of the filing person or Acquiring Group, the Substantial Stockholder Ownership Notice to be filed with this Court (but not the Substantial Stock Ownership Notice that is served upon the Debtors, the attorneys for the Debtors, and the attorneys for any Official Committee) may be redacted to exclude the taxpayer identification number and the amount of PG&E Stock beneficially owned.

(c) Acquisition of PG&E Stock. At least twenty (20) business days prior to the proposed date of any transfer of PG&E Stock or exercise of any Option to acquire PG&E Stock that would result in an increase in the amount of PG&E Stock beneficially owned by any person (including any Entity) or Acquiring Group that currently is or, as a result of the proposed transaction, would be a Substantial Stockholder (a **"Proposed Acquisition Transaction"**), such person, Acquiring Group or Substantial Stockholder (a **"Proposed Transferee"**) shall file with this Court and serve upon the Disclosure Parties a notice of such Proposed Transferee's intent to purchase, acquire, or otherwise accumulate PG&E Stock (an **"Acquisition Notice"**), in substantially the form annexed to the proposed orders to the NOL Motion as Exhibit 3, which describes specifically and in detail the Proposed Acquisition Transaction. At the election of the filing person or Acquiring Group, the Acquisition Notice to be filed with this Court (but not the Acquisition Notice that is served upon the Debtors, the attorneys for the Debtors, and the attorneys for any Official Committee) may be redacted to exclude the taxpayer identification number and the amount of PG&E Stock beneficially owned.

(d) Objection Procedures. The Debtors and any Official Committee shall have fifteen (15) business days after the filing of an Acquisition Notice (the **"Objection Period"**) to file with this Court and serve on a Proposed Transferee, an objection (each, an **"Objection"**) to any Proposed Acquisition Transaction described in such Acquisition Notice. If the Debtors or any Official Committee files an Objection by the expiration of the Objection Period (the **"Objection Deadline"**),

then the applicable Proposed Acquisition Transaction shall not be effective unless approved by a final and nonappealable order of this Court. If neither the Debtors nor any Official Committee file an Objection by the Objection Deadline or if the Debtors and any and all Official Committees provide written authorization to the Proposed Transferee, approving the Proposed Acquisition Transaction then such Proposed Acquisition Transaction may proceed solely as specifically described in the applicable Acquisition Notice. Any further Proposed Acquisition Transaction must be the subject of an additional Acquisition Notice and Objection Period.

C. The Proposed Procedures Relating to Claims

The procedures relating to the trading of Claims (the “**Claims Procedures**”), which only will become effective upon entry of the order granting the requested relief on a final basis, permit the full trading of Claims until the Debtors or another Plan Proponent (as defined below) decides to pursue a plan of reorganization contemplating the potential utilization of section 382(l)(5) of the Tax Code, at which point, if necessary for the Debtors to utilize that provision, a purchaser of certain Claims on or after the Petition Date may be required to resell some or all of such Claims. The following are certain principal provisions of the proposed Claims Procedures:⁴⁶

(a) Disclosure of 382(l)(5) Plan. If the proponent of a Plan (a “**Plan Proponent**”) determines that the reorganized Debtors likely will benefit from the application of section 382(l)(5) of the Tax Code and reasonably anticipates that the reorganized Debtors (or any successors thereto) (the “**Post-Emergence PG&E**”) will invoke such section (a “**382(l)(5) Plan**”), then the Plan Proponent shall disclose the following in its proposed disclosure statement or, in the case of items (iii) through (v) described below, a later, separate notice (collectively, the “**Proposed 382(l)(5) Disclosure Statement**”):

(i) Adequate information about the incremental tax benefits anticipated to be realized through the use of section 382(l)(5) of the Tax Code that, taking into account the Debtors’ anticipated net unrealized built-in gains or net unrealized built-in losses, would not otherwise be available;

(ii) A summary of any restrictions expected to be imposed on the transferability of securities issued under the Plan in order to preserve such incremental tax benefits;

(iii) The (A) dollar amount of Claims (by class or other applicable classification) expected to result in a one-percent (1%) interest in the equity of Post-Emergence PG&E (the “**New PG&E Stock**”) and (B) number of any of the specified interests (the “**Owned Interests**”) in the Debtors expected to result in a one-percent (1%) interest in the New PG&E Stock, in each case based upon then-available information;

(iv) A specified date (the “**Determination Date**”) that is not less than ten (10) calendar days after the service of the notice of the hearing with respect to the Proposed 382(l)(5) Disclosure Statement; and

(v) A specified date (the “**Reporting Deadline**”) that is not less than five (5) calendar days after the Determination Date, by which persons (including Entities, which for purposes

⁴⁶ The complete proposed Claims Procedures are set forth in Exhibit 1 to the Proposed Final Order to the NOL Motion (the “**Proposed Final NOL Order**”), which sets forth the Procedures.

of the Claims Procedures also includes an “entity” within the meaning of Treasury Regulations section 1.382-3(a)) must serve on various parties the Notice of Substantial Claim Ownership (as defined in paragraph B(3) of Exhibit 1 to the Proposed Final NOL Order) required by these Claims Procedures.

(b) Claims Trading Before and After the Determination Date.

(i) Any person generally may trade freely and make a market in Claims until the Determination Date.

(ii) After the Determination Date, any acquisition of Claims by a person (including any Entity) who filed or was required to file a Notice of Substantial Claim Ownership or by a person who would be required to file a Notice of Substantial Claim Ownership as a result of the consummation of the contemplated transaction if the proposed acquisition date had been the Determination Date (each such person, a “**Proposed Claims Transferee**”), shall not be effective unless consummated in compliance with the Claims Procedures.

(iii) At least ten (10) business days prior to the proposed date of any acquisition of Claims by a Proposed Claims Transferee (each acquisition, a “**Proposed Claims Acquisition Transaction**”), such Proposed Claims Transferee shall serve upon the Plan Proponent and its counsel (and the Debtors and their counsel if not the Plan Proponent), counsel to the DIP Lenders, and counsel to any Official Committee a notice of such Proposed Claims Transferee’s request to purchase, acquire, or otherwise accumulate a Claim (a “**Claims Acquisition Request**”), in substantially the form annexed to the Proposed Final NOL Order as Exhibit 6, which describes specifically and in detail the Proposed Claims Acquisition Transaction, regardless of whether such transfer would be subject to the filing, notice, and hearing requirements set forth in Bankruptcy Rule 3001.

(iv) The Plan Proponent may determine, in consultation with the Debtors (if not the Plan Proponent), counsel to any Official Committee and counsel to the DIP Lenders, whether to approve a Claims Acquisition Request. If the Plan Proponent does not approve a Claims Acquisition Request in writing within eight (8) business days after the Claims Acquisition Request is filed with the Court, the Claims Acquisition Request shall be deemed rejected.

(c) Creditor Conduct and Sell-Downs

(i) Following the Determination Date, if the Plan Proponent determines that certain persons holding Claims must sell or transfer all or a portion of their beneficial ownership of Claims so that the requirements of section 382(l)(5) of the Tax Code will be satisfied, the Plan Proponent may request—after notice to counsel to any Official Committee, counsel to the DIP Lenders, and the relevant claimholder(s), and a hearing—that this Court enter an order approving the issuance of a notice (a “**Sell-Down Notice**”) that such claimholder(s) must sell, cause to sell, or otherwise transfer a specified amount of its beneficial ownership of Claims. Notwithstanding anything to the contrary in the NOL Motion, no claimholder shall be required to sell, cause to sell, or otherwise transfer any beneficial ownership of Claims if such sale or transfer would result in the claimholder’s beneficial ownership of an aggregate amount of Claims (by class or other applicable classification) that is less than such claimholder’s “Protected Amount” (as defined in paragraph B(1)(p) of Exhibit 1 to the Proposed Final NOL Order).

(ii) Each Sell-Down Notice shall direct such claimholder to sell, cause to sell, or otherwise transfer its beneficial ownership of the amount of Claims specified in the Sell-Down Notice to certain permitted transferees.

(iii) Any person (including any Entity) that violates its obligations under the Claims Procedures shall be precluded from receiving, directly or indirectly, any consideration consisting of a beneficial ownership of New PG&E Stock that is attributable to the “Excess Amount of

1 Claims” (as defined in paragraph B(5)(b) of Exhibit 1 to the Proposed Final NOL Order) for such
2 person, including any consideration in lieu thereof, *provided* that such person may be entitled to
3 receive any other consideration to which such person may be entitled by virtue of holding Claims.

4 The Procedures are necessary to avoid severely impairing the Debtors’ ability to utilize their
5 Tax Attributes. The Debtors’ ability to preserve their Tax Attributes may be seriously impaired unless
6 the Stock Procedures are established immediately and *nunc pro tunc* to the Petition Date to ensure that
7 the acquisition of PG&E Stock is either precluded or closely monitored and made subject to Court
8 approval.

9 The Stock Procedures must be implemented as soon as possible. Even if a transfer were to be
10 null and void under section 362 of the Bankruptcy Code or as a result of a final order of the Court that
11 prohibited such a transfer retroactively to the Petition Date, under federal income tax law, such transfer
12 nevertheless may be regarded as having occurred for tax purposes, in which event the Debtors’ estates
13 could suffer an irrevocable loss of value. Accordingly, if a transfer occurs that limits the Debtors’
14 ability to utilize their Tax Attributes under section 382 of the Tax Code, the Debtors’ ability to realize
15 the value of their Tax Attributes may be permanently lost. The relief requested, therefore, is crucial to
16 prevent an irrevocable diminution of the value of the Debtors’ estates.

17 The Claims Procedures permit the full trading of Claims until the Debtors or another Plan
18 Proponent decides to pursue a Plan that contemplates the potential utilization of section 382(l)(5) of
19 the Tax Code, at which point, if necessary for the Debtors’ ability to utilize that provision, a purchaser
20 of certain Claims on or after the Petition Date may be required to resell some or all of such Claims.

21 It is my understanding based upon discussions with counsel that, under the De Minimis Rule,
22 a debtor may, for purposes of the Section 382(l)(5) Safe Harbor, “treat indebtedness as always having
23 been owned by the beneficial owner of the indebtedness immediately before the [O]wnership [C]hange
24 if the beneficial owner is not, immediately after the [O]wnership [C]hange, either a 5-[P]ercent
25 [S]hareholder or an [E]ntity through which a 5-[P]ercent [S]hareholder owns an indirect ownership
26 interest” in the debtor. 26 C.F.R. § 1.382-9(d)(3). If a creditor is treated as having continuously
27 owned its Claim(s) under the De Minimis Rule, such creditor will be regarded as a Qualified Creditor
28 so long as the particular Claim(s) that it holds either (a) arose in the ordinary course of the debtor’s
business or (b) came into existence at least eighteen (18) months prior to the Petition Date.

1 It is my understanding based upon discussions with counsel that the requested relief will ensure
2 that the Debtors will have flexibility, if the Debtors determine it to be desirable, to structure a chapter
3 11 plan or other distributions to comply with the requirements of the Section 382(l)(5) Safe Harbor and
4 thus to preserve the Tax Attributes to the fullest extent possible.

5 Accordingly, for the reasons set forth herein, I respectfully submit that the relief requested in
6 the NOL Motion is necessary and appropriate, is in the best interests of their estates and all parties in
7 interest, is necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

8 **XII. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 521(A) AND 105(A) AND FED.**
9 **R. BANKR. P. 1007(C) FOR ENTRY OF ORDER (I) EXTENDING TIME TO FILE**
10 **SCHEDULES OF ASSETS AND LIABILITIES AND STATEMENTS OF FINANCIAL**
11 **AFFAIRS, AND (II) EXTENDING TIME TO FILE 2015.3 REPORTS (THE**
12 **“EXTENSION OF TIME TO FILE SCHEDULES AND STATEMENTS MOTION”)**

13 Pursuant to the Extension of Time to File Schedules and Statements Motion, the Debtors
14 request entry of an order extending the initial fourteen (14) day period to file their schedules of assets
15 and liabilities and statements of financial affairs (collectively, the “**Schedules and Statements**”) by
16 sixty (60) days, to allow the Debtors a total of seventy-four (74) days after the Petition Date to file
17 their Schedules and Statements (the “**Schedules and Statements Deadline**”), without prejudice to the
18 Debtors’ right to request additional time if necessary. Additionally, the Debtors request that the Court
19 grant an extension until thirty (30) days after the meeting of creditors to be held pursuant to section
20 341 of the Bankruptcy Code for the Debtors to either file their initial reports of financial information
21 with respect to entities in which their chapter 11 estates hold a controlling or substantial interest, as set
22 forth in Bankruptcy Rule 2015.3 (the “**2015.3 Reports**”), or file a motion with the Court seeking a
23 modification of such reporting requirements for cause.

24 The Debtors own and operate approximately 136 generating facilities, nine (9) natural gas
25 compressor stations, over 120,000 circuit miles of electric transmission and distribution lines, and
26 nearly 50,000 miles of natural gas transmission and distribution pipelines throughout California. The
27 scope and complexity of the Debtors’ businesses, coupled with the limited time available to the
28 Debtors to assemble the required information, necessitate an extension of the Schedules and
Statements Deadline and the deadline to file the 2015.3 Reports. It is my understanding that collecting

1 the necessary information to prepare the Schedules and Statements and the 2015.3 Reports requires an
2 enormous expenditure of time and effort on the part of the Debtors, their employees, and their
3 professionals.

4 In light of the foregoing, I respectfully submit that given the volume of work entailed in
5 completing the Schedules and Statements and the 2015.3 Reports, as well as the competing demands
6 on the Debtors' employees and professionals to stabilize the Debtors' business operations and address
7 the other many issues that arise during the critical postpetition period, the Debtors, as a practical
8 matter, are unable to properly and accurately complete the Schedules and Statements and 2015.3
9 Reports within the initial statutory period and that the requested extensions are necessary.

10 **XIII. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105(a), 342(a) AND 521(a)(1)**
11 **AND FED. R. BANKR. P. 1007 AND 2002 FOR ENTRY OF ORDER (I) WAIVING THE**
12 **REQUIREMENTS TO FILE LISTS OF CREDITORS AND EQUITY HOLDERS AND**
13 **GRANTING RELATED RELIEF; AND (II) AUTHORIZING AND APPROVING**
14 **PROCEDURES FOR PROVIDING NOTICE OF THE COMMENCEMENT OF**
15 **CHAPTER 11 CASES (THE "CREDITOR MATRIX AND NOTICE OF**
16 **COMMENCEMENT MOTION")**

17 Pursuant to the Creditor Matrix and Notice of Commencement Motion, the Debtors request
18 entry of an order (i) waiving the requirements that the Debtors file lists of creditors and equity holders
19 on the Petition Date, as set forth in section 521(a)(1) of the Bankruptcy Code, Bankruptcy Rules
20 1007(a)(1) and (a)(3), and Amended General Order 13 (the "**General Order**") of the United States
21 Bankruptcy Court for the Northern District of California (collectively, the "**Notice Rules**"); and (ii)
22 authorizing the Debtors to implement certain procedures for the mailing and publication of the notice
23 announcing the commencement of these Chapter 11 Cases and the meeting of creditors to be held
24 pursuant to section 341 of the Bankruptcy Code (the "**Notice of Commencement**").

25 It is my understanding based upon discussions with counsel that, pursuant to the Notice Rules,
26 unless a debtor's schedules of assets and liabilities are filed simultaneously with a chapter 11 petition,
27 a debtor must file a list of creditors as of the Petition Date (the "**List of Creditors**") with the petition.
28 Similarly, it is my understanding based upon discussions with counsel that the Notice Rules require
that unless the Court orders otherwise, the debtor must file within fourteen (14) days after entry of the
order for relief a list of the debtor's equity security holders of each class (the "**List of Equity**");

1 **Holders**”) showing the number and kinds of interests registered in the name of each holder, and the
2 last known address or place of business for each holder. I respectfully submit that waiving the
3 requirements to file a List of Creditors and, for PG&E Corp., a List of Equity Holders is appropriate.

4 Contemporaneously with the Creditor Matrix and Notice of Commencement Motion, the
5 Debtors have filed the Extension of Time to File Schedules and Statements Motion, requesting an
6 extension of the time to file their Schedules and Statements, and, therefore, have not yet filed their
7 Schedules and Statements with the Bankruptcy Court. Accordingly, without the relief requested in the
8 Creditor Matrix and Notice of Commencement Motion, the Notice Rules would require the Debtors to
9 each file a separate List of Creditors on the date hereof.

10 The Debtors have filed the Claims and Noticing Agent Retention Application (as defined
11 below) in these Chapter 11 Cases. It is my understanding based upon discussions with counsel that the
12 Court is empowered to use outside facilities or services to provide notices and other administrative
13 information to parties in interest, if the costs are paid from the assets of the estates. Under the
14 proposed Notice of Commencement Procedures (as defined and as set forth below), as soon as
15 practicable after the Petition Date, the Debtors will furnish their consolidated List of Creditors to Prime
16 Clerk, LLC (“**Prime Clerk**”) so that Prime Clerk can mail the Notice of Commencement to creditors
17 identified on the Debtors’ List of Creditors. I respectfully submit that the requirement that the List of
18 Creditors be filed on the Petition Date should be waived.

19 All of the outstanding common stock of the Utility is owned by PG&E Corp. This information
20 is set forth in the List of Equity Holders filed as a part of the Utility’s chapter 11 petition. With respect
21 to PG&E Corp., however, I respectfully submit that the requirement that it file a List of Equity Holders
22 should be waived. PG&E Corp. is a public company and, as of October 25, 2018, had 518,674,276
23 shares of common stock outstanding. The ownership of these shares changes daily, if not more
24 frequently. I respectfully submit that preparing the List of Equity Holders with last-known addresses
25 will be expensive for the Debtors, time consuming, and difficult to accomplish quickly and accurately.
26 I further submit that PG&E Corp.’s equity security holders will not be prejudiced if the List of Equity
27 Holders is not filed. As set forth in the Notice of Commencement Procedures, such parties will receive
28

1 appropriate notice of the commencement of these Chapter 11 Cases. Accordingly, the requirement that
2 the Debtors file a List of Equity Holders for PG&E Corp. should be waived.

3 **A. Proposed Procedures for Service of the Notice of Commencement**

4 The Debtors propose the following procedures (the “**Notice of Commencement Procedures**”)
5 with respect to service and publication of the Notice of Commencement:

6 **1. Mailing of the Notice of Commencement**

7 Pursuant to the Creditor Matrix and Notice of Commencement Motion, in light of the
8 requirement to notify creditors and shareholders of the commencement of these Chapter 11 Cases and
9 to notify creditors of the meeting of creditors under section 341 of the Bankruptcy Code (the “**Section**
10 **341 Meeting**”), the Debtors seek authority to have Prime Clerk undertake the mailing of the Notice of
11 Commencement, substantially in the form annexed as Exhibit 1 to the proposed order filed with the
12 Creditor Matrix and Notice of Commencement Motion, to the creditors listed on the Debtors’
13 consolidated List of Creditors.

14 For purposes of the Creditor Matrix and Notice of Commencement Motion, the Debtors have
15 not included their 16 million customers or their nearly 24,000 employees as creditors on the List of
16 Creditors (other than any customers or employees that may otherwise be creditors (e.g., litigation
17 claimants)) and, it is my understanding based upon discussions with counsel, that the Notice Rules do
18 not require the Debtors to provide the Notice of Commencement to such parties. Moreover, Prime
19 Clerk estimates that the cost of mailing the Notice of Commencement to such parties via traditional
20 first class mail would increase the cost of preparing and mailing the Notice of Commencement by
21 approximately \$9.4 million. Nevertheless, employees will be made aware of the commencement of
22 these Chapter 11 Cases through customary employee communication channels that the Debtors have
23 historically utilized. Additionally, given the extensive media coverage of these Chapter 11 Cases and
24 the proposed publication procedures described below, I believe that the Debtors’ customers will also
25 be adequately informed regarding the commencement of these Chapter 11 Cases.

26 As set forth above, as PG&E Corp. is a public company, the ownership of its shares changes on
27 a daily, if not more frequent, basis. Accordingly, serving the Notice of Commencement on holders of
28 PG&E Corp.’s equity interests by mail also would be a very costly undertaking and not necessarily

1 very effective. Further, it is highly likely that PG&E Corp.'s equity security holders will learn of these
2 Chapter 11 Cases through the financial press, the extensive publication proposed by the Debtors below,
3 as well as the Debtors' reporting with the United States Securities and Exchange Commission.
4 Accordingly, I respectfully submit that the requirement that the Debtors provide the Notice of
5 Commencement to holders of equity interests in PG&E Corp. should be waived.

6 **2. Publication of the Notice of Commencement**

7 In addition to providing the Notice of Commencement to the Debtors' creditors as set forth
8 above, the Debtors propose to publish, as soon as practicable, the Notice of Commencement,
9 substantially in the form attached to the Proposed Order (i) once in the national editions of the *Wall*
10 *Street Journal* and *USA Today*, and (ii) once in each of the *Los Angeles Times*, *San Francisco*
11 *Chronicle*, *The Bakersfield Californian*, *The Fresno Bee*, *The Modesto Bee*, *The Sacramento Bee*, *The*
12 *Santa Rosa Press Democrat*, *The San Jose Mercury News*, *The East Bay Times*, *The Stockton Record*,
13 the *Paradise Post*, and the *Chico Enterprise-Record*. The Debtors also propose to post the Notice of
14 Commencement on the website to be established by Prime Clerk (as defined below) and on the
15 Debtors' website. Publication of the Notice of Commencement as proposed above is the most practical
16 method by which to notify customers, employees and equity holders who do not receive the Notice of
17 Commencement by mail and other parties in interest of the commencement of these Chapter 11 Cases.
18 Notice by publication also will ensure an efficient use of estate resources.

19 Based on the foregoing, I respectfully submit that the proposed Notice of Commencement
20 Procedures will ease administrative burdens that would otherwise fall upon the Court and the U.S.
21 Trustee, while at the same time ensuring that actual notice is provided to all of the Debtors' creditors,
22 equity holders, and customers in an efficient and cost-effective manner. Accordingly, I respectfully
23 submit that the relief requested is appropriate in these Chapter 11 Cases to provide adequate notice to
24 all parties in interest.

1 XIV. **MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 503(b)(9) AND 105(a) FOR**
2 **ENTRY OF ORDER ESTABLISHING PROCEDURES FOR THE ASSERTION,**
3 **RESOLUTION, AND SATISFACTION OF CLAIMS ASSERTED PURSUANT TO 11**
4 **U.S.C. § 503(b)(9) (THE “503(b)(9) PROCEDURES MOTION”)**

5 Pursuant to the 503(b)(9) Procedures Motion, the Debtors request entry of an order establishing
6 procedures for the assertion, resolution, and satisfaction of unpaid 503(b)(9) Claims.

7 Prior to the Petition Date and in the ordinary course of their business, the Debtors purchased on
8 credit a variety of raw materials, equipment, specially fabricated repair and replacement parts, supplies,
9 and other goods (collectively, the “**Goods**”) for use in their electric and natural gas transmission,
10 distribution, generation and other operations. As of the Petition Date, the Debtors were in possession
11 of certain Goods that had been delivered to them by various Vendors, but for which the Debtors had
12 not yet made payment.

13 There will be some uncertainty among Vendors over the procedures and methods they must
14 undertake to properly assert administrative expense claims pursuant to section 503(b)(9) of the
15 Bankruptcy Code. This may result in numerous inquiries and demands on the Debtors’ employees and
16 professionals, as well as in the initiation of piecemeal litigation, which would divert the attention of the
17 Debtors and their professionals from the more pressing task of administering these Chapter 11 Cases
18 and overseeing the Debtors’ operations in a safe and reliable manner. To avoid the resulting
19 distraction, delay, and expense that may ensue, I respectfully submit that the following Procedures
20 should be the sole and exclusive method for the assertion, resolution, allowance, and satisfaction of
21 503(b)(9) Claims:

22 (a) Any Vendor asserting a 503(b)(9) Claim must prepare a proof of claim (a
23 “**Proof of 503(b)(9) Claim**”), substantially in the form annexed as Schedule 1 to the
24 proposed order for the 503(b)(9) Procedures Motion (the “**Proof of 503(b)(9) Claim**
25 **Form**”) that sets forth: (i) the value of the Goods the Vendor contends the Debtors
26 received within twenty (20) days prior to the Petition Date; (ii) documentation,
27 including invoices, receipts, bills of lading, and the like, identifying the particular
28 Goods for which the claim is being asserted; (iii) documentation regarding which
Debtor the Goods were shipped to, the date the Goods were received by such Debtor,
and the alleged value of such Goods; and (iv) a statement indicating (I) whether the
value of such Goods listed in the Proof of 503(b)(9) Claim represents a combination of
services and Goods, (II) the percentage of value related to services and related to
Goods, and (III) whether the Vendor has filed any other claim against any Debtor
regarding the Goods underlying its Proof of 503(b)(9) Claim;

(b) All Proofs of 503(b)(9) Claims must be submitted to the Debtors' proposed claims and noticing agent, Prime Clerk, so as to be received no later than the fiftieth (50th) day after the Petition Date (the "**503(b)(9) Claim Filing Deadline**"), either (i) by mail or hand delivery at PG&E Corporation Claims Processing Center c/o Prime Clerk, 850 3rd Avenue, Suite 412, Brooklyn, New York 11232, or (ii) electronically via the interface provided on Prime Clerk's website at <http://restructuring.primeclerk.com/PGE/EPOC-index>. Proofs of 503(b)(9) Claims sent by facsimile or electronic mail will not be accepted;

(c) The Debtors shall have seventy-five (75) days (or such later date as may be approved by the Court) after the 503(b)(9) Claim Filing Deadline to file with the Court and serve any objections (the "**Objections**") to timely filed 503(b)(9) Claims (the "**Objection Deadline**"), without prejudice to the Debtors' right to set an extension to such Objection Deadline;

(d) Vendors shall have until twenty (20) days after the filing of the applicable Objection to file with the Court and serve on the Notice Parties any replies to such Objections;

(e) All timely filed 503(b)(9) Claims will be deemed allowed unless objected to by the Debtors on or before the Objection Deadline;

(f) Notwithstanding and without limiting the foregoing, the Debtors are authorized, but not required, to negotiate, in their sole discretion, with any Vendor and to seek an agreement resolving any Objection to such Vendor's 503(b)(9) Claim without the need for any further order by the Court;

(g) If the Debtors cannot reach agreement with a Vendor regarding a particular Objection to such Vendor's 503(b)(9) Claim, the Debtors will schedule the matter for a hearing by the Court;

(h) To the extent a 503(b)(9) Claim is allowed, such 503(b)(9) Claim will be satisfied pursuant to and as set forth in, a chapter 11 plan for the Debtors as confirmed by the Court, or as otherwise ordered by the Court after notice and an opportunity for a hearing; provided, that the Debtors reserve the right to exercise any lawful right of setoff against any 503(b)(9) Claim; and

(i) Vendors shall be forever barred, without further order of the Court, from asserting 503(b)(9) Claims after the expiration of the 503(b)(9) Claim Filing Deadline, but shall not be barred from asserting related or unrelated general unsecured claims in accordance with any unsecured claims bar date established in these Chapter 11 Cases.

Pursuant to the 503(b)(9) Procedures Motion, the Debtors propose that the Procedures be the sole and exclusive method for the assertion, resolution, allowance, and satisfaction of 503(b)(9) Claims and request that all Vendors be prohibited from invoking any other means therefor, including, without limitation, the filing of a motion for allowance, or to compel payment, of any 503(b)(9) Claims.

1 It is my understanding based upon discussions with counsel that deferring litigation of claims
2 asserted under section 503(b)(9) of the Bankruptcy Code and establishing uniform procedures for
3 resolving such claims is a common practice in chapter 11 cases, as is the establishment of a bar date.
4 Moreover, the Debtors believe that the Procedures will facilitate their ability to resolve claims with
5 Vendors asserting a 503(b)(9) Claim, expediting the resolution of 503(b)(9) Claims, and assisting with
6 the administration of these Chapter 11 Cases.

7 Accordingly, I respectfully submit that the relief requested in the 503(b)(9) Claims Motion
8 should be granted.

9 **XV. MOTION OF DEBTORS FOR ENTRY OF ORDER PURSUANT TO 11 U.S.C. §§ 546(c)**
10 **AND 105(a) AND FED. R. BANKR. P. 9019 ESTABLISHING AND IMPLEMENTING**
11 **EXCLUSIVE AND GLOBAL PROCEDURES FOR THE TREATMENT OF**
12 **RECLAMATION CLAIMS (THE “RECLAMATION PROCEDURES MOTION”).**

13 Pursuant to the Reclamation Procedures Motion, the Debtors are seeking entry of an order
14 establishing procedures for the treatment of all claims that may be asserted against the Debtors seeking
15 the reclamation of Goods pursuant to section 546(c) of the Bankruptcy Code (the “**Reclamation**
16 **Claims**”) and prohibiting any Seller from (as defined below) from taking any other remedial action
17 with respect to its Goods, including any other effort to reclaim the same.

18 As a result of the commencement of these Chapter 11 Cases, the Debtors have received, and
19 expect to continue to receive, Reclamation Claims from various parties (collectively, the “**Sellers**”)
20 that, in the ordinary course of business, sold and delivered a variety of Goods to the Debtors prior to
21 the Petition Date, but for which the Debtors have not yet been invoiced or made payment to the Seller
22 in full.⁴⁷

23 To avoid potentially extensive piecemeal litigation that would interfere with the orderly
24 administration of these Chapter 11 Cases, the Debtors seek to establish the Reclamation Procedures for
25 the reconciliation and allowance of Reclamation Claims. The Reclamation Procedures will effectively

26 ⁴⁷ Certain Sellers may receive payment on account of their prepetition claims pursuant to certain other
27 motions filed by the Debtors contemporaneously herewith. To the extent a Seller receives payment on
28 account of its prepetition claim pursuant to an order approving any such motion, the Reclamation
Procedures shall not apply to such Seller.

1 and efficiently streamline the process of resolving any potential Reclamation Claims for the benefit of
2 the Debtors and all other parties in interest.

3 The Debtors propose the following procedures (the “**Reclamation Procedures**”) for processing
4 and reconciling Reclamation Claims:

5 (a) any Seller asserting a Reclamation Claim must satisfy all procedural and
6 timing requirements entitling it to have a right to reclamation under section 546(c) of
the Bankruptcy Code;

7 (b) any Seller asserting a Reclamation Claim must submit a written demand
8 asserting such Reclamation Claim (a “**Reclamation Demand**”), which must include, to
9 the extent such information is already available or known to such Seller, (i) a
10 description of the Goods subject to the Reclamation Demand; (ii) copies of any
11 purchasing orders, invoices, receipts, bills of lading and the like, identifying the
12 particular Goods for which the Reclamation Demand is being asserted; (iii) any
13 evidence regarding the date(s) such Goods were shipped to and received by the Debtors
14 and the alleged value of such Goods; and (iv) a statement indicating whether the Seller
15 has filed or intends to file any other claim against the Debtors regarding the Goods
16 underlying its Reclamation Demand (collectively, the “**Reclamation Demand
Requirements**”);

17 (c) all Reclamation Demands must be submitted to Prime Clerk, by the
18 applicable deadline set forth below, either by mail or hand delivery at PG&E
19 Corporation Reclamations Demands, c/o Prime Clerk LLC, 850 3rd Avenue, Suite 412,
20 Brooklyn, New York 11232, and not filed on the Court docket;

21 (d) to the extent that any Seller asserted a Reclamation Demand prior to
22 entry of the proposed order (the “**Reclamation Procedures Order**”) granting the relief
23 requested in the Reclamation Procedures Motion that complied with the procedures and
24 timing requirements of section 546(c) of the Bankruptcy Code, but otherwise did not
25 meet the Reclamation Demand Requirements, such Seller shall have twenty (20) days
26 from the date of entry of the Reclamation Procedures Order to submit to the Debtors
27 (via Prime Clerk as set forth in (c) above) the supplemental information or evidence
28 required to meet the Reclamation Demand Requirements;

(e) unless a Seller has already submitted a Reclamation Demand to the
Debtors within the forty-five (45) days prior to the Petition Date, any Seller asserting a
Reclamation Claim must have submitted a Reclamation Demand (subject to the Seller’s
right to supplement the Reclamation Demand as set forth in (d) above to meet the
Reclamation Demand Requirements) so that it was received by the Debtors (via Prime
Clerk as set forth in (c) above) on or before twenty (20) days after the Petition Date (the
“**Reclamation Deadline**”);

(f) upon entry of the Reclamation Procedures Order, the Debtors will serve
upon all Sellers who have submitted a Reclamation Demand by the Reclamation
Deadline a copy of such order at the address indicated in its Reclamation Demand;

(g) no later than 120 days after entry of the Reclamation Procedures Order (the “**Reclamation Notice Deadline**”), the Debtors will file with the Court a notice (the “**Reclamation Notice**”) listing the timely submitted Reclamation Claims and the amounts (if any) and proposed status and treatment of each such Reclamation Claim that the Debtors determine to be valid. The Debtors will serve the Reclamation Notice on (i) the United States Trustee for Region 17; (ii) the attorneys for any statutory committees appointed in these Chapter 11 Cases; (iii) counsel to the agent(s) under the Debtors’ proposed debtor-in-possession financing facilities, and (iv) each Seller listed in the Reclamation Notice, at the address indicated in the respective Seller’s Reclamation Demand (collectively, the “**Notice Parties**”);

(h) if the Debtors fail to file the Reclamation Notice by the Reclamation Notice Deadline, any holder of a Reclamation Claim that submitted a timely Reclamation Demand in accordance with the Reclamation Procedures may bring a motion on its own behalf to seek relief with respect to its Reclamation Claim;

(i) any party that wishes to object to the Reclamation Notice must file and serve an objection (a “**Reclamation Notice Objection**”) on the Notice Parties, so as to be received no later than 4:00 p.m. (prevailing Eastern Time) on the twentieth (20th) day after the date on which the Reclamation Notice is filed (the “**Reclamation Objection Deadline**”). Any Reclamation Notice Objection must include (i) a copy of the Reclamation Demand, with evidence of the date mailed to the Debtors; and (ii) a statement describing with specificity the objections to the Reclamation Notice and any legal and factual bases for such objections;

(j) any Reclamation Claim listed in the Reclamation Notice for which no Reclamation Notice Objection is filed and served by the Reclamation Objection Deadline shall be deemed allowed by the Court in the amount identified by the Debtors in the Reclamation Notice, *provided* that all issues relating to the treatment of any such allowed Reclamation Claim under a chapter 11 plan for the Debtors shall be reserved;

(k) notwithstanding and without limiting the foregoing, the Debtors will be authorized, but not required, to negotiate, with any Seller to seek an agreement resolving the Seller’s Reclamation Claim. If no agreement is reached resolving the Reclamation Notice Objection, the Debtors or the Sellers may file a motion with the Court requesting a hearing with respect to the Reclamation Notice Objection. If the Debtors and a Seller agree on the validity, amount, or treatment of the Seller’s Reclamation Claim, the Debtors will file with the Court a notice of settlement (a “**Settlement Notice**”) and serve such Settlement Notice on the Notice Parties. Each Notice Party will have ten (10) days from the date of service of such Settlement Notice to file with the Court and serve on the other Notice Parties and attorneys for the Debtors an objection thereto (a “**Settlement Objection**”);

(l) if no Settlement Objection is timely filed and served, such Reclamation Claim will be treated in accordance with the Settlement Notice without further order of the Court;

1 (m) if a Settlement Objection is timely filed and served, the parties may
2 negotiate a consensual resolution of such objection to be incorporated in a stipulation
3 filed with the Court (a “**Settlement Stipulation**”). Upon the filing of a Settlement
4 Stipulation, the applicable Reclamation Claim shall be allowed and treated in
5 accordance with the terms of the Settlement Stipulation without further order of the
6 Court;

7 (n) if no consensual resolution of a Settlement Objection is reached, the
8 Debtors may file a motion with the Court requesting a hearing with respect to the
9 Settlement Notice;

10 (o) if a Seller receives payment on account of the Seller’s prepetition claims
11 pursuant to any other motion that has been or may be filed by the Debtors, including,
12 without limitation, (i) the 503(b)(9) Procedures Motion; and (ii) the Operational
13 Integrity Suppliers Motion, to the extent a Seller receives payment on account of its
14 prepetition claim pursuant to an order approving any of such motions, the Reclamation
15 Procedures shall not apply to such Seller to the extent of any such payment; and

16 (p) all Sellers shall be forever barred, without further order of the Court,
17 from asserting a Reclamation Demand after the expiration of the Reclamation Deadline,
18 but shall not be barred from asserting, subject to applicable deadlines, related or
19 unrelated general unsecured claims or administrative expense status pursuant to section
20 503(b)(9) of the Bankruptcy Code.

21 The Debtors propose that the Reclamation Procedures shall be the sole and exclusive method
22 for addressing and resolving Reclamation Claims. As a result, pursuant to the Reclamation Procedures
23 Motion, the Debtors request that all Sellers be prohibited from seeking any other means for the
24 resolution or treatment of their Reclamation Claims, including, without limitation, the following: (a)
25 commencing adversary proceedings or contested matters in connection with any Reclamation Claim,
26 (b) seeking to obtain possession of any Goods except as may be permitted by the Reclamation
27 Procedures, or (c) interfering with the delivery of any Goods to the Debtors or the retention of any
28 Goods by the Debtors. The Reclamation Procedures will effectively and efficiently streamline the
process of resolving the Reclamation Claims for the Debtors and the Sellers alike, without impacting
the parties’ substantive rights to pursue or contest the Reclamation Claims.

I respectfully submit that the Reclamation Procedures will effectively and efficiently streamline
the process of resolving the Reclamation Claims for the Debtors and the Sellers alike, without
impacting the parties’ substantive rights to pursue or contest the Reclamation Claims. Accordingly, I
respectfully submit that the relief requested in the Reclamation Procedures Motion should be granted.

1 **XVI. DEBTORS' APPLICATION PURSUANT TO 28 U.S.C. § 156(C) FOR APPOINTMENT**
2 **OF PRIME CLERK LLC AS CLAIMS AND NOTICING AGENT (THE "SECTION**
3 **156(C) APPLICATION")**

4 Pursuant to the 156(c) Application, the Debtors are seeking entry of an order appointing Prime
5 Clerk as their claims and noticing agent (the "**Claims and Noticing Agent**") for the Debtors and their
6 Chapter 11 Cases, including assuming full responsibility for the distribution of notices and the
7 maintenance, processing and docketing of proofs of claim filed in the Chapter 11 Cases, including
8 assuming full responsibility for the distribution of notices and the maintenance, processing, and
9 docketing of proofs of claim filed in the Chapter 11 Cases, as set forth in the Engagement Agreement
10 attached as Exhibit B to the Section 156(c) Application; *provided, however*, the Debtors are seeking
11 approval solely of those terms and provisions set forth in the Section 156(c) Application. By separate
12 application, the debtors will seek authorization to retain and employ Prime Clerk as administrative
13 advisor in the Chapter 11 Cases pursuant to section 327(a) of the Bankruptcy Code because the
14 administration of the Chapter 11 Cases will require Prime Clerk to perform duties outside the scope of
15 28 U.S.C. § 156(c).

16 By appointing Prime Clerk as the Claims and Noticing Agent in the Chapter 11 Cases, the
17 distribution of notices and the processing of claims will be expedited, and the Office of the Clerk of the
18 Bankruptcy Court will be relieved of the administrative burden of processing what may be an
19 overwhelming number of claims. Accordingly, I respectfully submit that the Section 156(c)
20 Application should be approved.

21 **XVII. MOTION OF DEBTORS PURSUANT TO 11 U.S.C. §§ 105, 362, 363, AND 364 AND**
22 **FED. R. BANKR. P. 6003 AND 6004 TO (A) HONOR PREPETITION OBLIGATIONS**
23 **TO NATURAL GAS AND ELECTRICITY EXCHANGE OPERATORS, (B) GRANT**
24 **ADMINISTRATIVE EXPENSE CLAIMS AND AUTHORIZE POSTING OF**
25 **COLLATERAL TO EXCHANGE OPERATORS TRADING COUNTERPARTIES,**
26 **AND FUTURE COMMISSION MERCHANTS, (C) MODIFY THE AUTOMATIC**
27 **STAY, AND (D) GRANT RELATED RELIEF (THE "EXCHANGE OPERATORS**
28 **MOTION")**

Pursuant to the Exchange Operators Motion, the Debtors are seeking interim and final authority
to (i) pay all outstanding Prepetition Exchange Obligations (as defined below) owed to ICE NGX
Canada Inc. (together with certain of its affiliates and subsidiaries, "**ICE NGX**") and California
Independent System Operator Corporation ("**CAISO**" and, together with ICE NGX, the "**Exchange**

1 **Operators”**), under those certain Prepetition Exchange Agreements (as defined below), in the ordinary
2 course as they come due, (ii) provide the Exchange Operators with administrative expense claims on
3 account of all Exchange Obligations (as defined below), (iii) confirm the existing liens and security
4 interests of the Exchange Operators in their collateral and authorize the Utility to pledge additional
5 collateral to the Exchange Operators in the form of cash, letters of credit, and/or other forms of
6 collateral acceptable to the parties on account of all Postpetition Exchange Obligations (as defined
7 below), (iv) permit the Trading Counterparties (as defined below) to apply existing cash collateral to
8 their prepetition obligations and authorize the Utility to provide cash collateral for postpetition
9 obligations to Trading Counterparties, (v) provide cash or other collateral to the Future Commission
10 Merchants (as defined below), and (vi) modify the automatic stay under section 362 of the Bankruptcy
11 Code to the extent necessary to allow the (A) Exchange Operators to exercise any valid rights of setoff
12 or recoupment (the **“Trade Setoff”**), and to apply collateral and the proceeds thereof and settle
13 transactions, whether undertaken with respect to collateral or obligations that arose, and whether such
14 collateral and proceeds were posted or arose, prior to or after the Petition Date, and, upon default,
15 exercise their rights, in each case under and in accordance with the terms of the agreements and tariffs
16 that govern the relationship between the Exchange Operators and the Utility, and (B) Trading
17 Counterparties to exercise any valid right to setoff, settle or recoup any mutual obligations owing by
18 the Utility to such Trading Counterparties, and to apply cash collateral to prepetition obligations,
19 notwithstanding any limits otherwise imposed by section 553 of the Bankruptcy Code, and (vii) grant
20 related relief.

21 **A. ICE NGX**

22 To clear transactions relating to the procurement of natural gas, the Utility is party to that
23 certain contracting party agreement (the **“CPA”**) with ICE NGX. ICE NGX is a centralized exchange
24 and clearinghouse (the **“NGX Exchange”** and the Utility’s obligations thereunder, the **“NGX**
25 **Exchange Obligations”**) that provides electronic trading, central counterparty clearing, and data
26 services to natural gas, crude oil, and electricity markets in North America. Pursuant to the CPA, the
27 Utility purchases natural gas from ICE NGX for (i) its core gas supply, which is delivered to “core”
28

1 customers (e.g., residential and small commercial customers), (ii) its electric gas supply, which is used
2 to fuel the Utility's gas-fired electric generation facilities, including certain units operating under
3 tolling agreements, and (iii) for temporary storage in both Utility-owned and third party-owned gas
4 storage facilities. The Utility also sells excess natural gas through the NGX Exchange.

5 The Utility participates on the NGX Exchange primarily through the purchase of futures
6 contracts for natural gas. The Utility typically orders natural gas supply through ICE NGX for a
7 particular month – the month's "flow" – in the prior month, but the Utility may also enter into daily
8 orders for the next day's "flow." For example, in January 2019, the Utility placed orders through ICE
9 NGX on the NGX Exchange to cover its February 2019 "flow." Payment to ICE NGX is generally not
10 due until the 25th day of the month following the month in which the natural gas is delivered to the
11 Utility.

12 Given the delay between the placement of orders for natural gas, deliveries of natural gas, and
13 the payment thereon, ICE NGX requires the Utility to post collateral and other credit support to secure
14 payment for transactions effected through the NGX Exchange (such collateral, and all proceeds
15 thereof, the "**NGX Collateral**"), and, in some instances, to prepay such obligations. ICE NGX is the
16 only party with any lien or security interest on the NGX Collateral, and ICE NGX holds a first-priority
17 lien on, and security interest in, all NGX Collateral.

18 Pursuant to the CPA, NGX Exchange Obligations are required to be fully-collateralized on a
19 daily basis and the value of collateral may change on a day-to-day basis due to fluctuations in natural
20 gas prices. The Utility's failure to post appropriate NGX Collateral can result in ICE NGX, among
21 other things, having the right or ability under the CPA to (i) declare all NGX Exchange Obligations
22 immediately due and payable, (ii) request additional NGX Collateral, (iii) terminate any open
23 transactions, and/or (iv) suspend the Utility's participation in the NGX Exchange. In addition, under
24 the CPA, ICE NGX is authorized to setoff, settle, or otherwise recoup amounts owed by the Utility to
25 ICE NGX against amounts owed by ICE NGX to the Utility.

26 The Utility purchases a significant amount of its natural gas each month through the NGX
27 Exchange, including approximately \$40 million for January 2019 deliveries, representing
28

1 approximately 92% of the supply needed for its electric gas supply, and approximately 19% for its core
2 gas supply customers. Given the Utility's current credit rating, its ability to procure natural gas from
3 alternative suppliers is extremely limited. Should the Utility be unable to procure gas through the
4 NGX Exchange, it may be foreclosed from participating in natural gas markets altogether. As a result,
5 the Utility would be required to deplete its limited reserves of natural gas in an effort to delay a natural
6 gas shortfall. Depending on weather conditions and the appetite for other natural gas suppliers to
7 honor existing contracts, gas in storage could be exhausted in a matter of weeks, forcing the Utility to
8 stop delivering natural gas to some customers.

9 Moreover, even if the Utility were able to secure alternative suppliers that may be willing to
10 supply natural gas to the Utility, such alternative suppliers would likely charge higher prices, which
11 may be passed on to the Utility's customers through higher bills. These alternative suppliers may also
12 impose extremely burdensome contract terms on the Utility. Accordingly, preserving the Utility's
13 ability to participate in the NGX Exchange is essential to accessing sufficient natural gas supplies
14 needed to maintain uninterrupted utility services and the success of these Chapter 11 Cases.

15 B. CAISO

16 Due to the complexities involved in storing electricity after it is generated and transmitting it to
17 end users, the Utility participates in energy markets operated by the CAISO (the "**CAISO Market**"
18 and, together with the NGX Exchange, the "**Exchanges**"). CAISO settles transactions by the Utility
19 and its other participants, including transactions in the CAISO Market, and issues charges for services
20 related to maintaining the reliability of the grid, pursuant to the rates, terms and conditions of a tariff
21 approved by the Federal Energy Regulatory Commission (the "**Tariff**" and, together with ICE NGX's
22 CPA, the "**Prepetition Exchange Agreements**"). CAISO controls a competitive wholesale electricity
23 market in California and manages access to, and the reliability of, the bulk of the transmission system
24 in California. CAISO provides the Utility with particular channels to buy and sell electricity, which is
25 critical to the Utility's operations, and to transmit the electricity it generates, buys and sells. The
26 Utility also utilizes CAISO to obtain transmission congestion instruments to mitigate the Utility's risks
27 associated with electricity generation assets. The Utility procures all of the energy needed to meet its
28 customers' demand through the CAISO Market. The Utility sells and transmits all of the power it

1 generates and purchases under power purchase agreements to CAISO. CAISO determines which of
2 the Utility's resources (or those controlled by other parties) to operate at which times to meet the
3 CAISO system wide load and ensure the reliability of the grid.

4 Given CAISO's central role in California's electricity market, the Utility consummates
5 transactions through CAISO that it would not otherwise be able to execute with any other party or
6 entity. Specifically, through CAISO and the CAISO Market, the Utility: (i) sells all of the energy from
7 its Utility owned generation units as well as those units it has under contract with third parties, (ii)
8 purchases all of the energy in the day-ahead and real-time energy markets to meet customer demands,
9 (iii) acts as a scheduling coordinator for the Utility's generation facilities as well as certain third-party
10 generation facilities, (iv) transmits the power it generates, buys, and sells, (v) sells and purchases
11 congestion revenue rights, and (vi) settles for other services as required as a load serving entity.
12 Because the Utility buys and sells all of the electricity through CAISO that it needs to meet customer
13 demand and to generate revenue from its generation portfolio, any disruption or the loss of access to
14 this market would severely impact the Utility's ability to operate. In that scenario, the Utility would be
15 unable to generate revenue from its owned and contracted resources and, likewise, would be unable to
16 buy electricity to meet the demands of its customers.

17 Although the Utility is often a "net" creditor of CAISO, because it has been a net seller of
18 energy to the CAISO Market, it may also at any given time owe money to CAISO on a net basis. To
19 minimize credit risk, the Utility's liabilities to CAISO for the charges described in the Tariff
20 (collectively, the "**CAISO Obligations**" and, together with the NGX Obligations, the "**Exchange**
21 **Obligations**") are secured by collateral, such as cash collateral and/or letters of credit, the amount and
22 form of which are controlled by the terms of the Tariff (the "**CAISO Collateral**" and, together with
23 the NGX Collateral, the "**Exchange Collateral**"). In addition, CAISO is authorized under the Tariff to
24 setoff, settle, or otherwise recoup amounts owed by the Utility to CAISO against amounts owed by
25 CAISO to the Utility. To the extent amounts owed by the Utility to CAISO exceed amounts owed by
26 CAISO, the Utility must pay the difference in cash. The Utility's failure to meet its obligations to
27 CAISO can result in CAISO's refusal to continue to do business with the Utility, and/or refusal to
28

1 allow the Utility to participate in the CAISO Market. The Utility may also be precluded from acting as
2 a scheduling coordinator for generation facilities.

3 The Utility's participation on the Exchanges is currently governed by the Utility's market risk
4 and credit policies, which establish internal policies and controls with respect to Exchange activity. As
5 of the Petition Date, the Utility estimates that it owes approximately \$38 million to ICE NGX and
6 approximately \$13.7 million to CAISO on account of prepetition Exchange Obligations (collectively,
7 the "**Prepetition Exchange Obligations**"). CAISO invoices its participants, including the Utility,
8 each Wednesday (and at other times depending on the charge type) and payment is due on the fourth
9 business day after the invoice is issued. ICE NGX's Prepetition Exchange Obligations will become
10 due and owing during the Interim Period. As of the Petition Date, ICE NGX and CAISO are holding
11 cash collateral in the amounts of \$36.4 million and \$40 million, respectively.

12 Participating in the Exchanges protects the Utility from harmful fluctuations in commodity
13 prices and helps it to better manage the future energy demands of its customers. Specifically,
14 participation in the Exchanges enables the Utility to procure natural gas for the long-term, thereby
15 fixing the Utility's exposure to pricing. The Utility can also make short-term purchases of gas and
16 power through the Exchanges, which enables the Utility to cover customer shortfalls quickly and
17 efficiently, or quickly sell excess supply, thereby mitigating the Utility's losses associated therewith.

18 To maintain continued access to the critical gas and power markets in which the Utility
19 operates, and to maintain the Utility's access to the power grid over which it must transmit nearly all of
20 the power it buys, sells, and generates, the Utility requests authority for the Exchange Operators to
21 setoff, settle, or recoup Prepetition Exchange Obligations and apply Exchange Collateral in satisfaction
22 thereof to the extent permitted by the terms of the Prepetition Exchange Agreements, and for the
23 Utility to pay the Prepetition Exchange Obligations in the ordinary course of business on a postpetition
24 basis including "true-up" amounts which may be invoiced in the future for prepetition delivery dates or
25 charges. (True-ups may result, for example, from revisions to estimated versus actual volumes and
26 service charges and may lag behind the initial invoice by months or more). In addition, the Utility is
27 seeking authority to ensure payment of ongoing Prepetition Exchange Obligations and postpetition
28

obligations to the Exchange Operators under the Prepetition Exchange Agreements (collectively, the “**Postpetition Exchange Obligations**,” which, together with the Prepetition Exchange Obligations, constitute Exchange Obligations) by: (i) providing the Exchange Operators with administrative expense claims on account of the Exchange Obligations under section 364(b) of the Bankruptcy Code (the “**Administrative Expense Claims**”), and (ii) confirming the first-priority liens and security interests of the Exchange Operators in the existing Exchange Collateral and seeking authority to pledge additional collateral to the Exchange Operators, as applicable, in the ordinary course of business and consistent with the Prepetition Exchange Agreements to secure postpetition obligations, including the Postpetition Exchange Obligations, on a first-priority basis in such collateral (the “**Postpetition Exchange Collateral**”). Because the Prepetition Exchange Obligations are fully secured, no other parties in interest will be prejudiced by the foregoing relief.

Additionally, the Utility participates in other gas and electricity markets and exchanges, and is concerned that certain counterparties in those markets and exchanges, such as natural gas suppliers, natural gas transportation providers, natural gas storage providers, gas fired electric generators, renewable electric generators, RPS shaping and firming providers, and buyers of the Utility’s resource adequacy and renewable energy products (collectively, the “**Trading Counterparties**”) may seek to terminate their agreements with the Utility or seek to liquidate the Utility’s natural gas or electricity positions as a result of the commencement of these Chapter 11 Cases. The Trading Counterparties currently hold cash collateral as security for outstanding obligations. In order to avoid a termination of their agreements, pursuant to the Exchange Operators Motion, the Utility also requests that the Trading Counterparties be authorized to exercise any valid setoff rights, apply cash collateral to outstanding obligations, and, to the extent of any excess cash collateral, continue to hold the same to secure postpetition obligations to the Trading Counterparties. The Utility also requests authority to provide the Trading Counterparties with cash or other collateral in connection with ongoing postpetition transactions.

C. FCM

In addition to the Exchange Operators, the Utility is party to certain agreements (the “**Prepetition FCM Agreements**”) with Macquarie Futures USA LLC and BNP Paribas Securities

1 Corp. (collectively, the “**Future Commission Merchants**”) to buy or sell futures contracts (or options
2 on futures contracts) and other forward contracts related to certain commodities and commodity related
3 products. The Future Commission Merchants solicit or accept orders to buy or sell futures contracts,
4 options on futures, retail off-exchange forex contracts or swaps, and accept money or other assets from
5 customers to support such orders. In connection with the Prepetition FCM Agreements, the Utility is
6 required to provide collateral, including initial margin and variation margin, from time to time in such
7 amounts, at such times, and in such form (usually cash) as requested by each Future Commission
8 Merchant in its discretion. The collateral amounts requested by a Future Commission Merchant may be
9 affected by the Utility’s open trading positions and the Future Commission Merchant’s perception of
10 the Utility’s credit risk. Again, in order to avoid a termination of the Prepetition FCM Agreements,
11 which provide the Utility with the ability to protect against price fluctuations, the Utility seeks
12 authority to provide such additional cash or other collateral required by the Prepetition FCM
13 Agreements in an amount not to exceed \$15,000,000.

14 I respectfully submit that allowing the Utility to continue its trading and exchange practices in
15 the ordinary course, without interruption, including the payment of any Prepetition Exchange
16 Obligations, and the furnishing of collateral in connection therewith, is a sound exercise of its business
17 judgment. The Utility has utilized the same, or substantially similar, exchange practices for years.
18 Indeed, it is impossible for the Utility to operate its business without such practices. In particular,
19 absent the ability to participate in the Exchanges, the Utility would simply be unable to effectively
20 procure and sell its natural gas and electricity—a result that may lead to the Utility’s inability to meet
21 customer demand, risks to gas and electric system reliability in California and, with respect to the
22 CAISO practices, to pricing volatility in the power markets or to a decrease in the reliability of the
23 state-wide system.

24 Payment of the Prepetition Exchange Obligations is essential to the Utility’s continued
25 operations and the proper functioning of the California gas and power markets within which the Utility
26 plays a crucial role. Any limitation on the Utility’s ability to continue their prepetition trading and
27 exchange practices will: (i) cause disruption to the Utility’s operations and, potentially, to the
28

1 California gas and power markets; and (ii) compromise the Utility's ability to procure natural gas and
2 power in amounts needed to satisfy customer demand and maintain system reliability. The Exchange
3 Operators are currently in possession of significant amounts of collateral and are fully secured with
4 respect to the Prepetition Exchange Obligations. Consequently, as stated, the relief requested in the
5 Exchange Operators Motion will not prejudice any party in interest, including the Utility's unsecured
6 creditors.

7 Accordingly, I respectfully submit that the relief requested in the Exchange Operators Motion
8 is necessary and appropriate, is in the best interests of their estates and all parties in interest, is
9 necessary to avoid immediate and irreparable harm to the Debtors, and should be granted.

10 **XVIII. MOTION OF DEBTORS PURSUANT TO BANKR. L. R. 9006-1 REQUESTING**
11 **ORDER SHORTENING TIME FOR HEARING ON FIRST DAY MOTIONS (THE**
"MOTION TO SHORTEN")

12 Pursuant to the Motion to Shorten, the Debtors are seeking entry of an order shortening time for
13 a hearing on the following First Day Motions: (i) Joint Administration Motion; (ii) DIP Financing
14 Motion; (iii) Cash Management Motion; (iv) Employee Wages and Benefits Motion; (v) Public
15 Purpose Programs Motion; (vi) Operational Integrity Suppliers Motion; (vii) Lien Claimants Motion;
16 (viii) Insurance Motion; (ix) Taxes Motion; (x) NOL Motion; (xi) Exchange Operator Motion; (xii)
17 Extension of Time to File Schedules and Statements Motion; (xiii) Creditor Matrix and Notice of
18 Commencement Motion; (xiv) Section 156(c) Application; and (xv) the Responsible Individual
19 Application (collectively, the "**Emergency First Day Motions**").

20 Specifically, the relief requested in the Emergency First Day Motions is necessary, to among
21 other things, protect the interests of the Debtors' employees and customers, to avoid disruption to their
22 operations, to maintain the cash management systems, and to maintain public programs (most of which
23 are mandated by statute or regulation) during the pendency of the Chapter 11 Cases. The relief
24 requested in the Emergency First Day Motions is designed to prevent unnecessary disruptions in the
25 operations of the Debtors' businesses generally, and all of such relief is necessary to preserve and
26 maximize the value of the Debtors' estates and operations for the benefit of all parties in interest.

1 Accordingly, for the reasons set forth herein, I respectfully submit that the relief requested in
2 the Motion to Shorten is necessary and appropriate, is in the best interests of their estates and all
3 parties in interest, and should be granted.

4 For the reasons set forth in the Emergency First Day Motions and herein, the relief requested in
5 the Emergency First Day Motions is essential to avoid the disruption of operations and to promote the
6 Debtors' smooth transition into chapter 11 for the benefit of all parties in interest.

1 Dated: January 29, 2019

2 Respectfully submitted,

3 By: 

4 Name: Jason P. Wells
